Woods Bros. Nurseries

Lincoln, Nebr.

FOREWORD

In the building up of our nursery department we have followed the same general plan that we have found to be successful in the development of our several other business lines. It is interesting to recall that when we first installed a nursery department the purpose was to supply trees, shrubbery and plants for our company's needs in beautifying and adorning the boulevards, parks and building locations in the numerous residence sections which we have improved and added to the city of Lincoln. But we had scarcely gotten the plan under way when there developed a demand for our nursery stock that compelled us to place our nursery department on a broader basis and make of it a commercial nursery.

We set apart ample acreage for this purpose. By the most careful selection we are producing a large and varied supply of shade trees, evergreens, shrubbery, flowering plants, etc., and are in position to furnish the most select nursery lines.

For many years we have dealt extensively in city and farm real estate; have imported draft horses from Europe on a large scale; have handled thousands of registered and high-grade breeding cattle, chiefly Holsteins, and are manufacturers of the famous Hinge-Door and Lansing Silos.

We have applied to our nursery business the same general principles that have enabled us to conduct these several lines successfully. The patron desiring a small order has the same consideration, the same attention, the same service as the patron in quest of a large order. We have followed this principle in every department during the many years that we have been established in business and we purpose to continue to apply this rule as long as we are in business.

The nursery department is under the direction of men of long nursery experience who are informed as to the kind and variety of shrubs, plants and trees best adapted to the territory in which we are building up our trade. We are in position to give intelligent service and to give it with the patrons' welfare always in mind.

We invite you to consult with us in reference to your decorative plans and to inform us of your needs

in the nursery line. We are able to make very attractive prices and suggest that it will be to your advantage to consider the prices and the character of the stock which we offer.

Write us at any time and call upon us at your pleasure.

Respectfully,

Woods Brothers Co., *Lincoln, Nebr*

Introductory

In dealing with our customers we have always endeavored to conduct our relations upon the high, broad plain of square dealing and upright business methods. We do not consider the transaction with our customer is completed when the goods are delivered and the bills collected. It is our one great ambition to be of real service to the planters and garden lovers of the Middle States. We want you to have the benefit of our experience and study.

That we have grown our stock with the greatest possible skill, have seen that it was properly transplanted and brought into perfect condition for sale and then stored and packed carefully for delivery is not enough. We want to do more than sell you some nursery stock. Let us help you make a little estate of your farm, or a place to really live of your house and lot. We can help you landscape your place, whether it is a large farm or estate or merely a town lot. Read of our free service plan for landscaping on the inside back cover of this catalog.

If you need information in regard to pruning or spraying, we will gladly give it without any charge to you. This service is always free to our customers. In latitudes north of Lincoln, there are some things which are not hardy that do well south. If you are in doubt write us, and we can furnish you the desired information.

Suggestions To Our Customers

WHEN TO ORDER. Order early. All orders should be sent in as early as possible to insure prompt attention. It is our rule to execute them in the order in which they come to hand; hence we cannot delay orders received first for those coming in late in the season, and requiring attention at once. In other words, where possible, it is advisable to forward orders early. If ground is not in condition to plant, when the shipment comes, they may be left in the boxes in a cool cellar or kept out of doors with the roots buried with earth.

HOW TO ORDER. All orders should be legibly written on the order blank which we enclose. This will prevent any mistakes. Where particular varieties are ordered and particular ages and sizes of trees, etc., it should be stated whether, and to what extent others may be substituted in case the order cannot be filled to the letter, as happens in all establishments.

PACKING AND SHIPPING TERMS. All trees and plants are carefully labeled and packed in the best manner and delivered on board cars at Lincoln at prices named in this catalog. It is requested that the postoffice address as well as the express office or freight station accompany each order. When it is left to us to choose the mode of conveyance, we will exercise our best judgment.

On account of the perishable nature of nursery stock, the safest and best way to ship small and medium sized packages is by express, as the rates at present on nursery stock are very low. In cities especially, goods are delivered by the express company free of charge, thus saving you the cartage. We pack in such a manner that fruit trees and small fruits, ornamental trees, shrubs, evergreens and roses go safely as freight. Hardy border plants should be shipped by express. Many plants in our catalog are marked "postpaid" and come by parcel post free of charge. We will state, however, that plants do not arrive in quite so good a condition when sent through the mail as they do when sent by express, for the simple reason that many times they are contained in large bags for hours at a time. However, we can send plants by parcel post to most points in the United States without severe injury to the stock.

CLAIMS. All claims for errors and deficiencies must be made immediately on arrival of shipment. We desire to be notified of mistakes as early as possible, so we may rectify the same without delay.

TERMS. All orders from unknown correspondents must be accompanied with a draft on some of the principal cities, or a postoffice or express money order for the amount. We gladly accept personal checks where they are drawn with the words "with exchange." In case you cannot send in either of these ways, it is advisable to send currency by registered letter.

GUARANTEE. While we exercise the greatest care to have all our trees and plants genuine and reliable, and hold ourselves prepared to replace all that may prove untrue to name; we do not give any warranty, expressed or implied, and in case of error on our part, it is mutually agreed between the purchaser and ourselves that we shall not at any time be held responsible for a greater amount than the original price of the stock bought.

PRICES. Our prices may not be the lowest, but price is a secondary matter when considering the purchasing of trees and plants. Quality should count for something, also our reputation for fair dealing with our customers. To buyers in large quantities special prices will be furnished on application.

OUR SHIPPING FACILITIES. Lincoln is one of the largest and best distributing points in the Middle West. It is served by five trunk railroads with 44 main and branch lines. It is only a matter of a few hours to reach anyone living within five or six hundred miles of Lincoln. This means that you will receive your shipment of nursery stock in the least possible time after it has been put on board the cars here.

PACKING SEASON. The spring packing and shipping season opens here about the first of April and continues until about May 15th, depending on the weather. The planting season is not regulated by any particular month or day, nor by the state of vegetation where the planting is done, but only by the condition of the trees to be planted: hence trees can be sent with safety from Lincoln to localities several degrees South, even if they do not arrive until the ordinary transplanting season, in that locality, is past. In autumn, we usually commence digging and packing the first week of October and continue until the ground freezes about the middle of November. Our packing facilities are good, and we can rush through your orders in the shortest possible time. All bales and boxes are lined with paper, and will be perfectly safe sent anywhere in the United States.

Shade Trees

ACER. Maple

Dasycarpum (Silver Maple). A good, cheap, large shade tree; a very rapid grower and much used for street planting. 8-10 ft., 75 cts.; 10-12 ft., \$1.00; specimens, \$2.00.

Plantanoides (Norway Maple). One of the finest and best trees for shade or ornamental planting; a moderate grower, making a dense shade. 6-8 ft., \$1.00; 8-10 ft., \$1.50; 10-12 ft., \$2.00.

Platanoides Schwedleri (Schwedler's Purple Leaved). A conspicuous and desirable variety with purple foliage early in the season. The beautiful leaves attract attention at all seasons, but are especially fine in spring when their gleaming red and purple contracts brightly with the delicate green of other trees. In mid-summer they are purplish green, in autumn golden yellow. 6-8 ft., \$1.50; 10-12 ft., \$2.00.

Polymorphum Atropurpureum (Japanese Purple Leaved). Forms a bushy shrub; foliage dark purple and deeply cut; very ornamental. The hardiest and altogether the best of the Japan Maples. Well branched specimens, \$2.00.

Saccharinum (Sugar or Rock Maple). An admirable tree, much used in street and ornamental planting. It is well adapted to a variety of soils and situations. 8-10 ft., \$1.50; 10-12 ft., \$2.00.

Tartaricum Ginnala (Siberian Maple). A small, bushy tree or shrub with small leaves, prettily cut and lobed. Foliage changes to bright colors in autumn. Very hardy. 2-3 ft., 50 cts.; 6-8 ft. specimens, \$1.50.

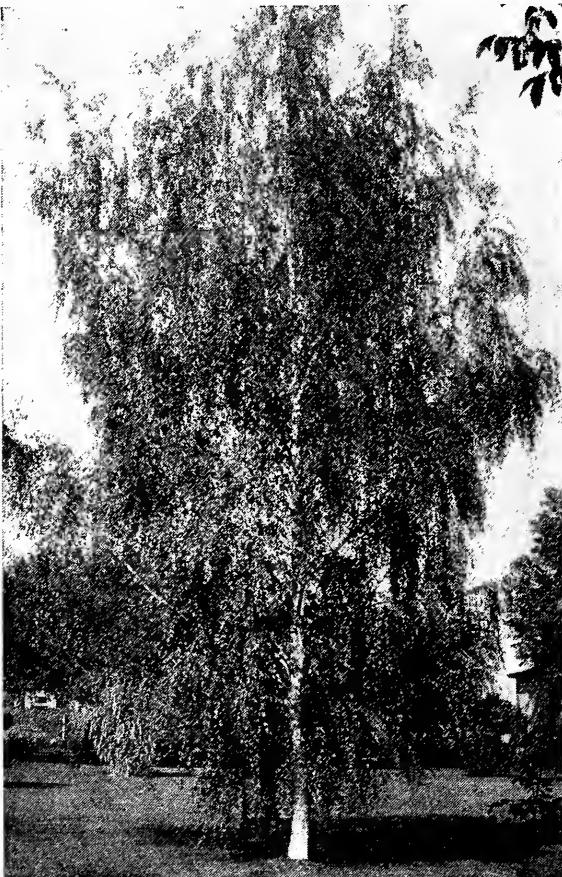

Virginicum Wieri Laciniata (Wier's Cut-Leaved Silver Maple). One of the best cut or dissected-leaved trees, being of rapid growth it soon produces an effect. Young shoots slender and drooping. 8-10 ft., \$1.00; 10-12 ft., \$1.50.

AESCVLUS. Chestnut

Hippocastanum (Horse Chestnut). This magnificent large sized tree has no superior on the lawn. In the spring it is profusely covered with panicles of white flowers, dotted with red. 5-6 ft., \$1.00; specimens, \$2.00.

AILANTHUS

Glandulosa (Tree of Heaven). A very rapid growing tree, with large pinnate foliage of bright green color and tropical appearance. Will thrive in any soil. 6-8 ft., 75 cts.; 8-10 ft., \$1.00.

English White Birch

Norway Maple

ALNUS

Glutinosa (European Alder). A very rapid growing tree with wedge-shaped foliage. Thrives in wet situations. 6-8 ft., 90 cts.; 8-10 ft., \$1.25.

ARALIA

Spinosa (Hercules Club). A very attractive plant with tropical foliage. The large bipinnat leaves are from 3 to 4 feet long. In mid-summer the ends of the branches are crowned with large clusters of white flowers. 3-4 ft., 50 cts.; 4-5 ft., 75 cts.; 6-8 ft., \$1.00.

BETULA

The various varieties of Birches are considered among the most graceful of the deciduous trees, and are almost indispensable in producing decorative effects. The various barks are always attractive.

Alba. (European White Birch). Of which Coleridge says: "Most beautiful of forest trees, the lady of the woods." 6-8 ft., \$1.00; 8-10 ft., \$1.50.

Populifolia (American White Birch). An American species, with triangular, taper pointed smooth, glossy leaves. Rapid grower. 6-8 ft., \$1.25; 8-10 ft., \$1.75.

CASTANEA. Chestnut

Americana (American Sweet Chestnut). A valuable native tree, both useful and ornamental; timber is very durable and possesses a fine grain for oil finish. Nuts sweet and of a delicate flavor, and a valuable article of commerce. No farm should be without a grove of these where the soil is adapted to their growth. 5-6 ft., 75 cts.; 6-8 ft., \$1.25.

Satina Paragon (Sober Paragon). One of the most successful nut trees for the northern sections of the United States. Rapid growth, early fruiting, and perfectly hardy. Nuts are large, often measuring 1½ inches across, and from 3 to 4 in a burr, as mild and sweet as the native American chestnut. If you are interested in chestnut culture you should plant several trees of this variety. We obtain our trees from the originator, orders should be placed early as we only order enough to supply our customers. 3-5 ft., \$2.00.

CATALPA

Bungei (Chinese Catalpa). An effective, tropical looking lawn tree. Foliage large and glossy. Top-grafted on tall stems, it makes a very pretty, round-headed tree. Very useful for planting along drives or in formal gardens. 1-year head, \$1.50; 2-year head, \$2.00.

Speciosa (Western Catalpa). A rapid growing tree, well adapted for forest and ornamental planting. It is being much planted for timber because of its rapid growth. The wood is light but very durable. White flowers borne in profusion in mid-summer. 8-10 ft., 75 cts.; 10-12 ft., \$1.00. Special prices furnished for large plantings.

CELTIS. Hackberry or Nettle Tree

Occidentalis. A native tree that deserves more general planting. Leaves are light green, glossy, pointed. Not subject to insect pests. Branches are slender and grow horizontally, forming a wide shaped head. Thrives in all soils. 6-8 ft., \$1.00; 8-10 ft., \$1.25; specimens, \$1.75 each.

CERCIS. American Judas Tree

Canadensis (Judas Tree or Red Bud). A very ornamental tree of medium size. Perfect heart shaped glossy leaves of a pure green color. The tree derives the name of Red Bud from the profusion of delicate reddish purple flowers with which it is covered before the leaves appear. One of our finest ornamental trees. 4-5 ft., 75 cts.; 5-6 ft., \$1.00.

CRATAEGUS. Thorn

Crus-Galli (Cockspur Thorn). A well-known native thorn; has long sharp spines or thorns; fruit bright red; valuable for hedging. 3-4 ft., 75 cts.

Coccinea (Scarlet Thorn). A fine native variety. Single white flowers in spring, scarlet fruit in autumn. 3-4 ft., 75 cts.

Oxyantha (Double White Thorn). Has small, double white flowers. A highly ornamental variety. On account of both foliage and flowers, makes a striking contrast when planted with the double scarlet. 3-4 ft., 75 cts.

FRAXINUS. Ash

Alba (American White Ash). A rapid growing native tree, valuable for planting along streets or in parks; may be extensively planted for timber; largely used in the manufacture of agricultural implements. 6-8 ft., 50c.; 8-10 ft., 75 cts.

GLEBITSCHIA. Honey Locust

Triacanthos. A rapid growing native tree, with powerful spines and delicate foliage. 5-6 ft., 50 cts.; 6-8 ft., 80 cts.

GYMNOCLADUS. Kentucky Coffee Tree

Dioica (Canadensis). A strikingly ornamental, irregular, open-topped tree, with peculiar rough-barked and twigless branches and immense, broad, double-compound foliage of a peculiar bluish-green color. The flowers are white, in open racemes, followed by immense, long, brown pods. A picturesque and desirable tree. 6-8 ft., \$1.00; 8-10 ft., \$1.50.

JUGLANS

Cinerea (Butternut). A native tree, of medium size, spreading habit, grayish colored bark and foliage resembling that of the *Alianthus*. Nut oblong, rough and of better quality than the Black Walnut. 5-6 ft., \$1.00; 6-8 ft., \$1.25.

Nigra (Black Walnut). Another native species of great size and majestic habit. Furnishes the well-known walnut lumber of commerce. Foliage resembles that of the Butternut, but is more divided. Nut round. 5-6 ft., 75 cts.; 6-8 ft., \$1.00.

Sieboldiana (Japan Seiboldi). From the mountains of Northern Japan. Leaves of immense size; a charming shade of green. Nuts resemble pecans and are produced in abundance, grow in clusters of ten to fifteen. Shell a little thicker than the English Walnut, but not so thick as the Black Walnut. Meat is sweet, flavored somewhat like a butternut, but less oily. Tree vigorous; handsome form; bears young, and very productive. Perfectly hardy in this section. Valuable as a nut and ornamental tree. Should be planted in all sections. 3-4 ft., 50 cts.; 5-6 ft., 75 cts.; 6-8 ft., \$1.00.

KOELREUTERIA PANICULATA. Varnish Tree

An ornamental tree from China. Forms a flat, spreading head, has large pinnate leaves, and bears immense panicles of orange-yellow flowers in July. Foliage takes on bright coloring in autumn. Very desirable since it blooms so late, when few if any trees are in flower. 5-6 ft., \$1.25; 6-8 ft., \$1.75.

LARIX. Larch

Europaea (European Larch). A pyramidal, coniferous tree, with beautiful light green foliage which appear with the first warm days of spring. For that reason best transplanted in the fall. Valuable for its timber. 5-6 ft., 75 cts.; 6-8 ft., \$1.00.

LIRIODENDRON. Tulip Tree

Tulipifera. One of our largest native trees, of rapid growth, with large, handsome leaves. Flowers in early June, tulip-shaped, greenish yellow, marked with orange. 5-6 ft., 80 cts.; 6-8 ft., \$1.00.

MAGNOLIA

The Magnolia is one of the most profuse blooming trees. Especially is this true of the Japanese and Chinese sorts. They are not easily transplanted and so we offer the choicer kinds with a large ball of earth. This ball of earth will be sewed in burlap and the tree will be well set with flower buds, insuring bloom the first season. When moved in this way they are almost certain to grow.

Acuminata (Cucumber Tree). One of the largest growing Magnolias native in this country. A rapid-growing, pyramidal tree of much beauty. Flowers yellowish white expanding in May, followed by fruit which resembles a cucumber when green, hence the name. 5-6 ft., \$1.00; 6-8 ft., \$1.50.

Soulangeana (Soulange's Magnolia). The best of all the flowering Magnolias. Of vigorous growth and most profuse bloom. Flowers pink on the outside of petals and white within, appearing before the leaves. Of Chinese origin. Balled. 3-4 ft., \$3.00; 4-5 ft., \$4.00. Fine specimens well set with buds, \$5-\$10 each.

Wier's Cut-Leaved Silver Maple

Flowering Chestnuts

Speciosa (Showy Magnolia). The flowers of this species are a trifle smaller and lighter colored than *Soulangeana*. They open about a week later and remain perfect on the tree longer than those of any other Chinese Magnolia. Very hardy. 3-4 ft., \$2.75; 4-5 ft., \$3.75.

MORUS. Mulberry

Alba (Russian Mulberry). Very hardy tree and bearing an abundance of black fruit. 6-8 ft., 50 cts.

Tatarica Pendula (Tea's Weeping Mulberry). Forms a perfect umbrella-shaped head, with long, slender branches drooping to the ground. Very hardy and one of the prettiest small weeping trees. 1 year head, \$1.50; strong 2 year head, \$1.75.

Globosa (Meehan's Globe Head Mulberry). Introduced last spring by Thomas Meehan for the first time. We are frequently asked as to its hardiness. It is a "sport" of the Russian mulberry, and will stand any climate where the Russian Mulberry will grow. It is hardy as the Tea's Weeping Mulberry and more attractive and better than *Catalpa Bungei*. 1 year head, \$2.50; 2 year head, \$3.00.

PLATANUS. Plane Tree

Occidentalis (American Sycamore). A tree of the largest size, growing rapid, very ornamental and entirely hardy. Fine for street planting. 6-8 ft., 75 cts.; 8-10 ft., \$1.00; specimens, \$2.00.

Orientalis (European Plane). A lofty, wide-spreading tree; large five-lobed leaves; valuable for its handsome foliage and free growth; makes an excellent street tree. Not very hardy north of this latitude. 8-10 ft., \$1.00.

POPULUS. Poplar

Alba (Silver Poplar). An old time native of spreading habit with beautiful silvery foliage. We only have a few. 5-6 ft., 75 cts.

Alba Bolleana (Bolle's Silver Poplar). New Pyramidal form, leaves dark green on upper side, brilliant silver underneath. Very beautiful. 6-8 ft., \$1.00; 8-10 ft., \$1.50.

Canadensis Van Geerti (Golden). The golden yellow foliage, retaining its brilliancy throughout the season. 6-8 ft., 50 cts.

Nigra Fastigata (Lombardi Poplar). Leaves roundish-cordate, with a short, sharp point, end small, somewhat regular teeth, smooth on both sides; trees spreading, much more so than *P. Monilifera*, and we think longer lived. A very pretty poplar for street planting. 6-8 ft., 40 cts.; 8-10 ft., 60 cts.; 10-12 ft., 75 cts.

Deltoides (Norway). Tree very hardy; is being planted quite extensively in many sections. Similar to *Carolina Poplar* in growth and appearance, but is claimed to be of more rapid growth and retains its size better as it mounts upward, and thus produces more lumber. Will thrive in most any soil or location. Valuable for street and park planting, also for screens and shelter belts. 8-10 ft., 75 cts.; 10-12 ft., \$1.00; specimens, \$1.50.

PRUNUS

Purpurea Hansoni (Hanson's Purple Plum). Tree of beautiful foliage, much resembling the *Pissardi*, the hardiest of all purple plums. 75 cts.

Tea's Weeping Mulberry

Pin Oak

Othello. Very similar to Hanson's plum, but although fully as hardy, it makes a much more rapid growth. Gives wonderful ornamental effects. 75 cts.

Padus (European Bird Cherry). A rapid growing beautiful tree, with glossy foliage and long bunches of white, fragrant flowers in May, succeeded by clusters of fruit like black currants. 6-8 ft., 75 cts.; 8-10 ft., \$1.25.

Pissardi (Purple-Leaved Plum). Tree of medium size, wood and leaves dark purple; fruit is also purple until ripened; a native of Persia. One of the most conspicuous ornamental trees. 3-4 ft., 75 cts.

Triloba (Double-Flowered Plum). Native of China. An interesting and desirable addition to hardy shrubs. Flowers, double, delicate pink, and are thickly set on long, slender branches. 3-4 ft., 75 cts.

PYRUS. Flowering Crab

Augustifolia (Bechtel's Double Flowering). The beauty and delicate fragrance of the bloom of the sweet-scented crab is a theme for poets and this new variety is a gem among hardy plants. The flowers are sometimes mistaken for small pink roses, and the perfume tends to increase rather than correct the delusion. 2-3 ft., 60cts.; 3-4 ft., \$1.00; 4-5 ft., \$1.25.

Floribunda (Single Flowering Crab). Flowers beautiful carmine in bud; white when open; May. Fruit very ornamental in autumn. 4-5 ft., \$1.20.

Floribunda Atrosanguinea (Red-Flowering Crab). Flowers crimson, in great profusion. A very fine variety. 3-4 ft., \$1.00.

Nedwietzkyana. From Siberia. All parts of this tree, with the exception of the old leaves, are red. Even the bark and wood. The pulp of the fruit, which has a fine flavor, is of a dark rosy color. 4-5 ft., \$1.25.

Spectabilis. Flowers pale red, large when open semi-double; buds of a deeper hue. From China. 3-4 ft., 90 cts.

QUERCUS. Oak

Coccinea (Scarlet Oak). Makes a large shapely tree with pyramidal outline. Especially attractive in autumn when the leaves change to a bright scarlet. 5-6 ft., \$1.00.

Palustris (Pin Oak). Probably the most beautiful of all Oaks. A good grower, assuming a drooping appearance with age. Leaves deep green and finely divided. A fine street tree. 5-6 ft., \$1.00; 6-8 ft., \$1.50.

Macrocarpa (Mossy Cup or Burr Oak). A native tree of spreading form. Foliage deeply lobed, and the largest and most beautiful among oak leaves. Bark corky. 4-5 ft., \$1.00.

Robur (English Oak). A broad, spreading, graceful tree of slow growth and long lived. 6-8 ft., \$1.50.

Rubra (Red Oak). A large, attractive tree. The young leaves and shoots are red in the spring and in the autumn the foliage turns to a purplish crimson. 6-8 ft., \$1.50; 8-10 ft., \$2.00.

ROBINIA. Acacia or Locust

Pseud-Acacia (Black Locust). A native tree, of large size, rapid growth; is being largely planted for timber; it is also quite ornamental. The flowers are in long racemes, white or yellowish, fragrant. Blooms in June. 5-6 ft., 60 cts.; 6-8 ft., 75 cts.

Hispida (Rose or Moss Locust). A native small tree, grafted on stems of the common Black Locust. Flowers rose colored in long clusters in June and at intervals through the summer. Grafted on 4-5 ft. stems, \$1.50.

SALIX. Willow

Dolorosa (Wisconsin Weeping Willow). Of drooping habit and beautiful form. The most hardy of all our weeping willows. 5-6 ft., 75 cts.; 6-8 ft., \$1.00.

Vitellina Aurea or Niobe (Golden Weeping Willow). A handsome tree. Conspicuous at all seasons, but especially in winter, on account of its yellow bark. 5-6 ft., 75 cts.; 6-8 ft., \$1.00; 8-10 ft., \$1.50; specimens, \$2.00-\$5.00.

SALISBURIA

Adiantifolia (Ginkgo or Maiden-Hair Tree). A remarkable tree from Japan, combining in its habits characteristics of the conifer and deciduous tree. Of medium size and rapid growth; beautiful and fern-like foliage, which in shape resembles somewhat a Maiden-Hair fern, hence the name. 6-8 ft., \$1.25.

SORBUS.

Aucuparia (European Mountain Ash). A fine hardy tree, head dense and regular; covered from July till winter with great clusters of bright scarlet berries. 6-8 ft., \$1.00; 8-10 ft., \$1.50.

Aucuparia. Var. Pendula (Weeping Mountain Ash). A picturesque little tree, excellent for lawn specimens or for covering arbors. It has beautiful pinnate foliage and bears white flowers in broad corymbs in May and June, followed by clusters of bright red currant-like fruit. 1 yr. head, \$1.25.

Quercifolia (Oak-Leaved Mountain Ash). A tree of fine pyramidal habit. Foliage deeply lobed, bright green above and downy beneath. A fine lawn tree, attaining 25 feet in height. 5-6 ft., 75 cts.; 6-8 ft., \$1.00.

SYRINGA. Lilac

Chinensis (Chinese Tree Lilac). The genuine in both this and Japan Tree Lilac are scarce. Many of the bush forms are trimmed high and offered as trees. The true Chinese

Bechtel's Flowering Crab

grows about 20 feet high, resembling the cherry tree in shape, with the trunk light green in color. Trees 4 inches through at the base were literally covered with snowy white flowers in early July this year. Fast growing and excites the greatest comment wherever seen. Hard to keep them on hand until they make much growth, as the demand keeps them always cleaned up. 5-6 ft., \$1.00.

Japonica (Japanese Tree Lilac). Matures into taller trees than the Chinese. We have known specimens of this tree to grow 35 feet high and 14 inches in diameter in this latitude. It is darker in bark and color, but habits much the same. Immense spikes of grayish blossoms. Both varieties are extremely hardy, lacking the natural enemy of the lilac. 5-6 ft., \$1.00; specimens, \$1.50-\$5.00.

TILIA. Basswood-Linden

Americana (American). A fine pyramidal tree, with large-sized leaves and fragrant flowers. 6-8 ft., 90 cts.; 8-10 ft., \$1.25.

Europaea (European). A fine pyramidal tree, with medium-sized leaves and fragrant flowers. 6-8 ft., 90 cts.; 8-10 ft., \$1.25.

ULMUS

Americana (American White Elm). A large, lofty growing tree, the limbs of which droop in wide-sweeping curves. A fine avenue tree. One of our best. 6-8 ft., 75 cts.; 8-10 ft., \$1.00; 10-12 ft., \$1.50; specimens, \$2.00.

American Pendula (Natural Weeping Elm). This is a "sport" of the above which has long weepers like the Willow. It is a wonderful tree. We have but a few of them. \$1.50.

Camperdown Pendula (Camperdown Weeping Elm). One of the finest weeping trees for the lawn. With broad foliage and branches drooping gracefully to the ground. 1 yr. head, \$1.50; 2 yr. head, \$2.00 each.

Campestre (English). A native of Europe; a noble, rapid-growing tree, forming a dense head; a desirable tree for streets, avenues, etc. 6-8 ft., \$1.25.

Stricta Purpurea (Purple Leaved Elm). An erect grower with dark purple foliage. 5-6 ft., 75 cts.; 6-8 ft., \$1.25.

Wheatlii. An elm which grows in shape much like the Lombardi Poplar. It is very hardy, long lived, and a very desirable tree for ornamental planting. 6-8 ft., \$1.50; 8-10 ft., \$2.25.

Camperdown Weeping Elm

Evergreens

All Evergreens in this list go out with a ball of earth, well burlapped.

ABIES

Balsamea (Balsam Fir). A very erect, regular, pyramidal tree, with dark green, sombre foliage. Of rapid growth and hardy. 2½-3 ft., \$3.25; 3-4 ft., \$4.50.

Douglasii (Douglas Spruce). Large conical form; branches spreading, horizontal; leaves light green above, glaucous below. 2-3 ft., \$3.00; 3-4 ft., \$4.00.

Normanniana (Nordmans Silver Fir). A beautiful tree, foliage wide, dark green, silvery beneath. It is a good moderate grower and forms a noble specimen in time. Contrasts well with lighter colored evergreens. 2-2½ ft., \$3.00; 2½-3 ft., \$3.50; 4 ft., \$6.00.

Veitchii (Veitch's Silver Fir). A very rare and beautiful species of slender outline; leaves are slightly grooved and silvery blue on under-surface; easily pliable. Forms a handsome specimen. 2½-3 ft., \$3.50; 3-4 ft., \$4.75; 4-4½ ft., \$6.50.

ABIES. Concolor Fir—Silver Fir of Colorado

Concolor. Without doubt the finest of the Rocky Mountain evergreens. Tree of graceful habit; broad, handsome foliage, bluish above, silvery beneath. A grand tree. 2-3 ft., \$3.50; 3-4 ft., \$4.50.

JUNIPERUS. Juniper

Chinensis (Chinese Juniper). A handsome, dense shrub with dark green foliage, and somewhat drooping branches. 2-2½ ft., \$1.75; 2½-3 ft., \$2.50.

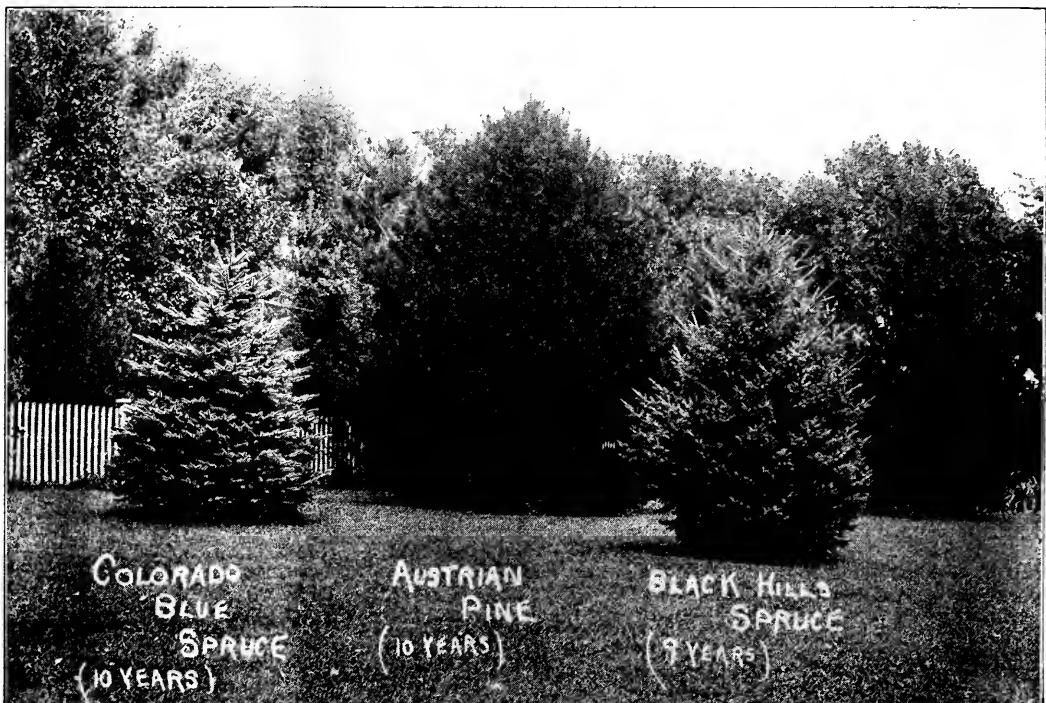

Hibernica (Irish Juniper). A distinct and beautiful variety of erect, dense, conical outline, resembling a pillar of green; very desirable. 2-3 ft., \$1.50; 3-4 ft., \$2.25.

Sabina (Savin Juniper). A dwarf, spreading shrub, with trailing branches. Thrives in the poorest soils. Very suitable for rock work. 1-1½ ft., \$2.00; 1½-2 ft., \$2.75.

Sabina Prostrata. Dull green leaves. Grows rapidly and

Coster's Blue Spruce

makes a very pleasing effect when planted on terraces; also used for covering rocks and bare, sunny positions. Specimens, \$1.50; \$2.25.

Sabina Tamariscifolia (Gray-Carpet Juniper). A distinct, trailing variety of Sabina. The needle-shaped leaves have a deceptive but pleasing shade of gray-green. Fine for edging. 1-1½ ft., \$2.25; 1½-2 ft., \$3.50.

Schottii. A fine, hardy evergreen, of columnar habit; foliage light green and feathery. 2-3 ft., \$3.75; 3-3½ ft., \$6.50.

Scopulorum (Colorado Silver Cedar). This Rocky Mountain species, related to *Juniperus Virginiana*, is distinct from its eastern relative in several important particulars. The foliage has the beautiful glaucus hue which is characteristic of so many Colorado evergreens; the tree makes an upright, pyramidal growth and retains its lower branches and symmetrical form to a great age; it is also distinct in requiring two years to mature its fruit. It retains a pleasing color throughout the winter. 1-2 ft., \$1.00; 2-3 ft., \$3.00; 3-4 ft., \$6.00.

Suecica (Swedish Juniper). A small-sized, handsome, pyramidal tree, with yellowish green foliage. It is very hardy. 2-3 ft., \$2.00; 3-4 ft., \$3.00.

Virginiana (Red Cedar). One of the most valuable trees for screens and windbreaks, perfectly hardy; too well known to need description. Our trees are all extra well shaped and have been several times transplanted. 18-24 inch, \$1.00; 2-3 ft., \$2.25; 3-4 ft., \$3.25.

Virginiana Canaertii. A fine, pyramidal, compact grower of dark green appearance; some of the branches lengthen out and droop, thus presenting a novel and pretty picture. 1½-2 ft., \$2.25; 2-3 ft., \$3.75; 3-3½ ft., \$6.50

Virginiana Elegantissimi Lee (Golden Juniper). Forms a columnar tree, while the side branchlets curve over effectively. Beautiful golden brown foliage, effective in winter, very distinct. 18-24 inch, \$1.75; 2-3 ft., \$4.00.

Virginiana Glauca (Silvery Red Cedar). Fine vigorous grower; cone shaped, and having a peculiar whitish color. The most satisfactory for latitudes north of Lincoln. Hardier than Irish. 12-18 inch, \$1.25; 18-24 inch, \$2.50; 2-3 ft., \$3.75.

Virginiana Pfitzeriana. Very distinct, being of a striking graceful habit; the color of foliage a bright silvery green; perfectly hardy. 18-24 inch, \$2.75; 2-2½ ft., \$3.50; 2½-3 ft., \$5.00.

PICEA. Spruce

Alba (White Spruce). A native tree of medium size, of pyramidal form. Foliage silvery gray and bark light colored. Very hardy and valuable. 18-24 inch, 90 cts.; 2-2½ ft., \$1.25; 2½-3 ft., \$2.00; 3-4 ft., \$3.00.

Alcockiana (Alcock's Spruce). From Japan. Foliage pale green, silvery underneath. Forms a beautiful tree of close habit. Valuable. 2-2½ ft., \$3.00; 2½-3 ft., \$4.00.

Canadensis (Black Hill Spruce). This is a truly remarkable tree, well suited to our varying climatic needs. Plant liberally of this splendid variety and you will never regret it. It grows to a large size, finally reaching a height of 75 to 100 feet. Moderately fast grower. 18-24 inch, 75 cts.; 2-3 ft., \$2.25; 3-4 ft., \$4.50.

Excelsa (Norway Spruce). From Europe. An elegant tree; extremely hardy, of lofty, rapid growth and pyramidal form. The branches assume a graceful, drooping habit when the tree attains 15 to 20 feet in height. One of the most popular evergreen for planting, either as single specimen trees, or in masses for effect or shelter. It is one of the best evergreen hedge plants. 18-24 inch, 90 cts.; 2-2½ ft., \$1.25; 2½-3 ft., \$2.00; 3-4 ft., \$4.00.

Pungens Glauca (Colorado Blue Spruce). This is the selected blue form of the *Picea Pungens*. Only a small percentage of this variety produces the true blue foliage. 2-3 ft., \$2.25; 3-4 ft., \$6.00.

Pungens Glauca Kosteriana (Koster's Blue Spruce). The richest colored of the tinted evergreens, hardy, vigorous grower, elegant habit. A beautiful tree for any lawn with its silvery blue sheen. We handle only the very best imported grafted trees of this variety. 18-24 inch, \$2.00; 2-3 ft., \$4.00; 3-4 ft., \$7.50.

Pungens Glauca Pendula (Koster's Weeping Spruce). Same as above with weeping habit. 2-2½ ft., \$3.25; 2½-3 ft., \$4.50.

PINUS. Pine

Austriaca (Austrian Pine) from Central Europe. Leaves or needles stiff and dark green. Hardy everywhere and one of the most valuable conifers for wind-breaks, belts, etc. 18-24 inch, 75 cts.; 24-30 inch, \$1.25.

Banksiana (Jack Pine). Very hardy rapid growing pine. 18-24 inch, 75 cts.; 2-3 ft., \$1.00.

Montana Mugho. (Dwarf Mountain Pine). Very distinct, leaves short, stiff, a little twisted and thickly distributed over the branches; does not grow tall, but spreads over the ground, generally assuming a globular form; very dense. 12-18 inch, \$2.00; 18-24 inch, \$3.00.

Scopulorum (Bull Pine). The northern form of *Pinus Ponderosa*, being the common pine of our foothills. It is one of the most noble and picturesque of American conifers, and is without doubt the best evergreen for wind protection throughout the region lying between the Mississippi River and the Rocky Mountains. Its hardy constitution and ornamental value are sufficient recommendation for use elsewhere. 18-24 inch, \$1.00; 2-3 ft., \$1.75.

Strobus (White Pine). An old and well-known native tree of rapid growth and entirely hardy. 18-24 inch, 75 cts.; 24-30 inch, \$1.00.

Sylvestris (Scotch Pine). A rapid grower; very hardy, from the central portion of Europe, with short, rigid, light green leaves. Very valuable for screens and for masses. 18-24 inch, 75 cts.; 24-30 inch, \$1.10.

THUYA. Arbor Vitae

Occidentalis (American Arbor Vitae). A beautiful native tree commonly known as the White Cedar; especially valuable for screens and hedges. 18-24 inch, 60 cts.; 2-3 ft., \$1.25; 12-18 inch size unbalanced for hedges at \$17.50 per hundred.

O. Globosa (Globe Arbor Vitae). A dense, light green evergreen of dwarf habit, grows naturally round like a ball. One of the best of the dwarf evergreens. 15-18 inch balls, \$1.50; 18-24 inch, \$2.25.

Siberica (Siberian Arbor Vitae). This is one of the most useful and hardy evergreens for the Northern states. Its excessive hardness, regular conical outline and peculiar dark, dense foliage makes it very popular for hedges or screens and is especially beautiful and more attractive than the other species. 18-24 inch, 75 cts.; 2-3 ft., \$1.50.

EVERGREEN WINDBREAKS FOR SHELTER

An evergreen windbreak sheltering the barn, barnyard, pastures and stock runs, takes the sting out of bitter weather for both man and beast. The houses are kept warmer with less attention to fires and less fuel. Livestock is kept comfortable and thriving. Your cattle, horses, sheep and pigs eat less and their food goes into growth. Chickens lay better because of being sheltered from penetrating winds, and the bees will benefit through the increased protection during the winter. Plant a row of Evergreens on the windward sides of your garden. Vegetables which would not mature in the windswept garden can be grown in the protected one. The productiveness of the entire garden is greatly increased. An Evergreen windbreak will protect your orchard and prevent many bushels of fruit blowing off your trees. The fruit will color and develop better. Spraying can be done on windy days in protected orchards. An Evergreen windbreak is the best, cheapest and most effective insurance.

We have selected the following seven varieties out of a large number of Evergreens as being particularly adapted for windbreak planting and we can highly recommend any of these trees for windbreak use.

Colorado Blue Spruce

Scotch Pine (Balled)

Shrubs

AMYGDALUS. Almond

A class of ornamental shrub or small tree introduced from the mountains of Asia Minor, and succeeding well in common garden soil. The flowers are very showy, produced in great abundance, and useful for their earliness. Fine plants to use in grouping or for lawns.

Japonica, var. Flore Rosea Plena. Small double pink flowers borne in abundance in May. 50 cts.

Japonica, var. Flore Alba Plena. Small double white flowers borne in abundance in May. 50 cts.

ARALIA

Pentaphylia. A shrub with long, slender branches and few spines. Fine for rocky slopes; foliage bright green and shiny. Flowers green in long umbels. 40 cts.

BERBERIS. Barberry

Thunbergii. From Japan. A very pretty species of dwarf habit, small foliage, changing to a beautiful coppery red in autumn. Valuable as an ornamental hedge.

	Each	10	100
18 to 24 inch	\$0.20	\$1.75	\$15.00

Barberry Thunbergii

BUDDLEIA. Butterfly Bush

Variabilis Magnifica. A most beautiful shrub and one that should be in every garden. A splendid shrub for park planting. It makes large shrubs even from small plants, the first season. Single plants will often have 50 or more flower spikes the first year. The second year after planting it generally begins to bloom in June and continues throughout the summer until frost nips it. The flowers are produced on long, graceful stems that terminate in tapering panicles of beautiful lilac colored flowers of miniature size and borne by the hundreds on flower heads frequently 10 inches long. This admirable shrub should be classed as semi-herbaceous, as it sometimes freezes back to the ground in severe winters, but comes up again from the roots. A mulch of manure, leaves or other suitable material should be given before heavy freezing weather sets in. You should try some of these; you will be delighted with them.

50 cts.; small size, 30 cts.

CALYCANTHUS. Carolina Allspice

Floridus. A well-known native bush, bearing very double, purple, fragrant flowers. 18-24 in., 25 cts.; 2-3 ft., 35 cts.

CARAGANA. Pea Tree

Arborescens. A handsome dwarf tree with bright yellow flowers in May and June. Very hardy in any of the Northern states. 3-4 ft., 75 cts.; 4-5 ft., \$1.00.

CEANOOTHUS. New Jersey Tea

Americanus. A low bush, an early bloomer, small white flowers in great profusion. 2-3 ft., 40 cts.

CLETHRAB. Sweet Pepper Bush

Alnifolia. A pretty little shrub that blossoms freely for several weeks in summer; very fragrant white flowers, in slender racemes; an excellent honey plant for bees. 18-24 in., 35 cts.; 2-3 ft., 50 cts.

COLUTEA. Bladder Senna

Arborescens (Tree Colutea). July. Foliage compound of a pleasing green; flowers pea-shaped, yellow and brownish red, followed by showy, curiously inflated, reddish seed pods. This is the shrub which grows native on Mount Vesuvius, and the last one seen in ascending to the crater. 2-3 ft., 35 cts.

CARYOPTERIS

Mastacanthus (Blue Spirea). A handsome, hardy perennial plant recently introduced from China. It is of a vigorous growth, producing flowers in great profusion the whole length of its branches, even young plants in small pots flowering freely. The color is of rich lavender or sky blue. A valuable plant either for bedding or pot culture. 18-24 in., 35 cts.

Calycanthus

CHIONANTHUS. White Fringe

Virginica (White Fringe). A small native tree, with ash-like leaves and clusters of snow white flowers, resembling an elegant fringe. 2-3 ft., 50 cts.; 3-4 ft., 75 cts.

CORNUS. Dogwood

Paniculata (Gray Dogwood). Ash-colored bark, leaves pointed, green above, whitish beneath; flowers greenish-white; fruit white. 2-3 ft., 35 cts.; 4-5 ft., 50 cts.

Sibirica. Grows 6 to 10 feet high, with clusters of fine white flowers, succeeded by a fall crop of ornamental berries, stem and branches turning to blood-red in winter. 2-3 ft., 30 cts.; 3-4 ft., 45 cts.

Sanguinea (Red Dogwood). June. Flowers greenish white, in flat cymes, followed by white fruit; bark deep red and very attractive in winter. When planted with other shrubs, the effect in winter is very striking. As a single lawn shrub it is well adapted, owing to its low branching habit and ornamental broad foliage. One of the best. 2-3 ft., 30 cts.; 3-4 ft., 45 cts.

Flowering Dogwood

Gracilis (Dwarf). A low bush, three or four feet in diameter; flowers pure white and graceful. One of the prettiest and most popular fall shrubs. Fine for winter forcing. 12-18 in., 30 cts.; 18-24 in., 40 cts.

DIERVILLA. Weigela

Beautiful shrubs that bloom in June and July. The flowers are produced in so great profusion as almost entirely to hide the foliage. They are very desirable for the border or for grouping, and also as specimen plants for the lawn.

Candida. Of vigorous habit, flowers pure white and produced in great profusion in June, and continue to bloom at intervals through the summer. 2-3 ft., 35 cts.; 3-4 ft., 50 cts.

Desboisii. A beautiful variety, with deep, rose-colored flowers, resembling *Rosea*, but flowers much darker. One of the best. 2-3 ft., 35 cts.; 3-4 ft., 50 cts.

Eva Rathke. A charming new Weigelia; flowers brilliant crimson; a beautiful, distinct, clear shade. Very attractive. 18-24 in., 35 cts.; 2-3 ft., 50 cts.

Rosea. One of the most popular shrubs known. Flowers bright rose. 2-3 ft., 35 cts.; 3-4 ft., 50 cts.

Stolonifera (Wild Red Dogwood). A native species with smooth and slender branches, which are usually red in winter. 18-24 in., 30 cts.; 2-3 ft., 40 cts.; 4-5 ft., 50 cts.

Stolonifera, var. Flaviramea (Yellow Branched Dogwood). A very pretty shrub for winter color effect, bark bright yellow. Rare. Very fine for landscaping. 18-24 in., 35 cts.; 2-3 ft., 45 cts.

CYDONIA JAPONICA.
Japanese Quince

Very early in spring this fine old shrub is completely covered with dazzling scarlet flowers, followed by small, quince-shaped fruits which are quite fragrant. Very hardy, withstanding drouth and cold. 18-24 in., 30 cts.; 2-3 ft., 40 cts.

Weigelia

Growth bushy and dense, with protecting thorns.

DEUTZIA

Showy Japanese shrubs of the highest ornamental merit and adapted to all good soils. Their clean foliage, upright, dense growth, free flowering nature, renders them especially valuable.

Crenata. The beautiful white single flowered species that is a mass of bloom in June. Often preferred to the double sorts. 2-3 ft., 40 cts.

C. Candidissima. Very pretty; pure white. 18-24 in., 30 cts.; 2-3 ft., 40 cts.

C. Pride of Rochester. A fine double variety, rather earlier than *Crenata*. Flowers pink in bud, white when fully expanded. Considered the prettiest of the Deutzias. 18-24 in., 30 cts.; 2-3 ft., 50 cts.

Lemoinei. A hybrid obtained by Mons. Lemoine of France by crossing the well-known *Deutzia Gracilis* with *Deutzia parviflora*. Flowers pure white, borne on stout branches, which are of upright growth. Habit dwarf and free-flowering. A decided acquisition. Hardest of all the Deutzias. 18-24 in., 30 cts.; 2-3 ft., 50 cts.

Deutzia

DIERVILLE. Weigela—Continued

Rosea, var. Kosteriana Follis Variegata (Koster's Weigelia). Foliage beautiful, margined with yellow; flowers pink. 18-24 in., 30c; 2-3 ft., 50c.

ELEAGNUS. Oleaster

Angustifolia (Russian Olive). A large shrub, sometimes of tree form, with long, narrow, silvery green foliage. The flowers are yellow, followed by yellow fruit. Extremely hardy. 3-4 ft., 50 cts.; 4-5 ft., 75 cts.

Longipes. A handsome, shapely silver-leaved shrub, with an ornamental reddish brown bark in winter; perfectly hardy and easy to grow; the bright yellow flowers appear in June on long stalks, but the greatest value of the shrub is in the fruit, which is produced in the greatest abundance along the whole length of the branches, oval in shape and about one-half inch long; color deep orange red; very showy and attractive. The fruit is not only very ornamental, but has a sprightly, sharp, pleasant flavor, and makes a delicious sauce when cooked. 18-24 in., 30 cts.; 2-3 ft., 40 cts.

EUONYMUS. Strawberry or Spindle Tree

Alatus (Cork Barked Euonymus). Dwarf, compact habit; wood very corky; leaves small; fruit red. Foliage turns bright red in fall. One of the very finest shrubs for autumn effect. 2-3 ft., 50 cts.

Americanus (American Burning Bush). Very conspicuous in autumn and winter, when loaded with scarlet seed-pods, from which the orange colored berries hang on slender threads. 2-3 ft., 45 cts.

FORSYTHIA. Golden Bell

Fortunei. Grows upright; foliage deep green; flowers bright yellow. 2-3 ft., 40 cts.

Suspensa. A very early and showy spring bloomer, flowers bright yellow; branches long and slender. 2-3 ft., 35 cts.

Viridissima. A fine hardy shrub. Leaves and bark deep green; flowers yellow. Very early in spring. 2-3 ft., 40 cts.

HIBISCUS. Althea or Rose of Sharon

These are very fine, hardy, free growing, flowering shrubs, of very easy cultivation, and very desirable on account of their late summer blooming. Should be in every garden. Our collection comprises a great variety of colors and shades.

Anemoneflora. Very large flower, measuring 3½ to 4 inches across; semi-double, red with a very deep red base on outer petals. Stamens showing prominently. 2-3 ft., 35 cts.; 3-4 ft., 40 cts.

Ardens. Double violet, 2½ to 3 inches across flower; petals quilled; vigorous; very fine. 2-3 ft., 35 cts.; 3-4 ft., 50 cts.

Boule de Feu. Large, 3½ to 4 inches across flower; very 50 cts. double, well formed, light rose; petals flecked at base with cardinal; one of the finest reds; vigorous. 2-3 ft., 35 cts.; 3-4 ft., 50 cts.

Coelestis. Single, flowers large, of a delicate shade of azure blue, showing red base. 2-3 ft., 35 cts.; 3-4 ft., 50 cts.

Duchesse d'Brabant. Large, reddish lilac flowers. 2-3 ft., 35 cts.; 3-4 ft., 50 cts.

Jeanne de Arc. One of the best; flowers pure white, double; strong grower. 2-3 ft., 35 cts.; 3-4 ft., 50 cts.

Pulcherima. Very large, 3½ to 4 inches across flower; double white shaded to pink; outer rows of petals broad and show cardinal base; inner petals quilled. A very fine variety. Strong grower. 2-3 ft., 35 cts.; 3-4 ft., 50 cts.

Purpurea. Purple, semi-double, showing cardinal base. 2-3 ft., 35 cts.; 3-4 ft., 50 cts.

Snowdrift. Pure white, variegated foliage. 2-3 ft., 35c; 3-4 ft., 50c.

TREE FORM. Anemoneflorus, Ardens, Jeanne d' Arc. 4 to 5 ft., 75 cents each.

HYDRANGEA

Arborescens Grandiflora. This beautiful shrub is being sent out under various names as "Snowball Hydrangea," "Hills of Snow," etc. This new American Hydrangea is believed to be the most beautiful, hardy flowering shrub introduced for many years. 18-24 in., 40 cts.; 2-3 ft., 50 cts.

Paniculata Grandiflora (Bush Shape). This is one of the most valuable hardy shrubs in cultivation. It attains a height of six to eight feet, and is perfectly hardy in all parts of the country. The flowers are white, borne in immense pyramidal panicles nearly a foot in length. It commences flowering in July and continues until November. This is the finest flowering shrub for cemetery planting we know of. 18-24 in., 35 cts.; 2-3 ft., 50 cts.

Paniculata Grandiflora (Tree Shape). These are fine specimen plants trained to tree shape, with about three feet of straight stem and nice shaped heads. Should bloom the first year. 3-4 ft., 75c.

Althea

Forsythia (Golden Bell)

Hydrangea

LIGUSTRUM. Privet

This Privet is now one of the best known shrubs, both for hedging and for ornamental planting on the lawn. All of the varieties offered have merit, some for their foliage, some for their berries. They are almost evergreen and of dense habit and bear shearing to any extent.

Amurensis (North) (Amoor River Privet). A distinct type which has been found hardy in the North. Foliage and habit of growth almost identical with the variety grown in the South. Flowers white; black fruit. Very hardy as far North as Canada.

	Each	10	100
18 to 24 inch.....	\$0.15	\$1.20	\$ 9.00
2 to 3 feet.....	.20	1.75	13.00

Ibota (North). This type is known as the upright Ibota and has been found to be perfectly hardy in the North. For northern sections this is undoubtedly the best of the Privet for hedges. Flowers white in upright panicles, fruit bluish-black.

	Each	10	100
18 to 24 inch.....	\$0.15	\$1.25	\$11.00
2 to 3 feet.....	.20	1.80	15.00

Japonicum Aureum (Golden Privet). A beautiful golden variegated form and very effective for associating with other dwarf shrubs.

	Each	10	100
18 to 24 inch	\$0.35	\$3.00	\$27.50

Polish. This Privet was brought from Poland over 20 years ago, and although it is the most wonderful of the Privet family, it has been little known until the last two or three years. It has been on the campus grounds at the State Agricultural School here at Lincoln for nearly twenty years, and has never been known to freeze. When grown untrimmed, it is upright in habit, usually growing 8 to 12 feet high. The leaves are bluish green and lustrous, half evergreen. The flower panicles, which resemble lilacs, are white and from 3 to 5 inches long. The foliage holds its characteristic color throughout the season and does not change in the least at the approach of cold weather. We have seen this privet as green at Christmas time as in August. When trimmed it will grow as dense as a box-wood. In the fall and winter it is covered with black berries. The growth is very rapid. This privet is by far the best and most satisfactory for this section of the country.

	Each	10	100
18 to 24 inch.....	\$0.20	\$1.75	\$15.00
2 to 3 feet.....	.25	2.00	17.50
3 to 4 feet.....	.50

Regelianum (Regal's Privet). A fine, hardy variety, desirable when grown singly as a specimen, or in mass planting; also suitable for hedges. This is one of the berried varieties.

	Each	10	100
2 to 3 feet.....	\$0.40	\$3.50	\$32.50

NOTICE. Beware of planting **California Privet** in this latitude, as it is absolutely not hardy here. We carry it in stock for our customers living south of here, where it thrives nicely.

**Hydrangea****LONICERA. Bush Honeysuckle**

Alberti (Siberian Honeysuckle). Dwarf bushy growth, about 2 feet, with silvery, pinnate foliage; fragrant, violaceous pink flowers in June. 12-18 in., 30 cts.

Fragrantissima. In sheltered situations the dark green leaves of this shrub are retained nearly all winter. Its pretty pink and white flowers are numerous, but not very showy. Delightful fragrance. It is easily trained into a handsome bush. 2-3 ft., 40 cts.; 3-4 ft., 50 cts.

Ledebouri. A new variety, very showy with bright red blooms in May. 18-24 in., 30 cts.; 2-3 ft., 40 cts.

Morowii. A fine variety from Japan; valuable for its handsome red fruit. 2-3 ft., 35 cts.

Tartarica Grandiflora Alba. Creamy white, fragrant flowers; forms a high bush. May and June. 2-3 ft., 40 cts.; 3-4 ft., 50 cts.

Tartarica Grandiflora Rosea. Pink flowers, which contrast beautifully with foliage. June. 2-3 ft., 40 cts.; 3-4 ft., 50 cts.

Tartarica Grandiflora Rubra. A beautiful shrub, very vigorous and producing large, bright red flowers striped with white in June. 2-3 ft., 40 cts.; 3-4 ft., 50 cts.

MAHONIA

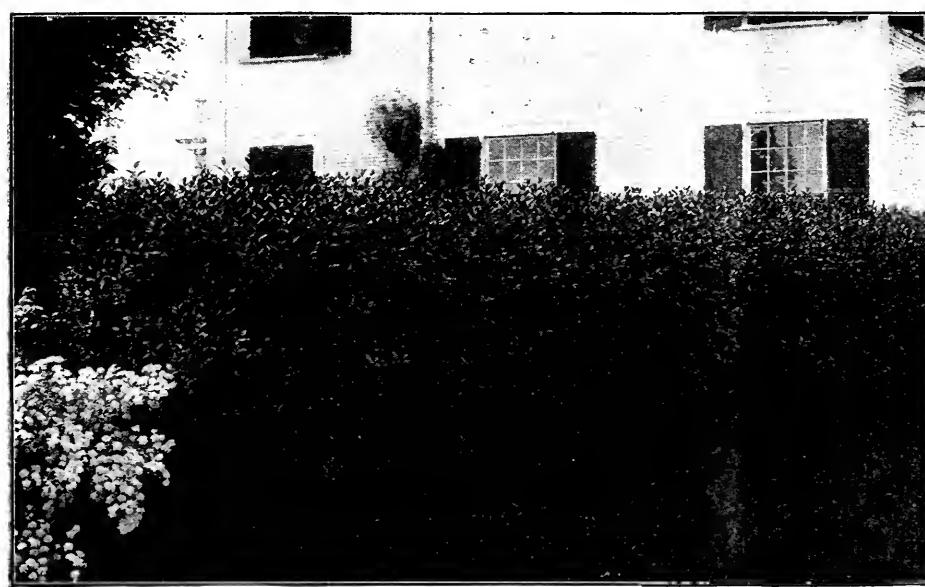

Aquifolia (Holly-Leaved Mahonia). A native species of medium size, evergreen, with purplish, shiny prickly leaves, and showy, bright yellow flowers in May, succeeded by bluish berries. Its glossy foliage and neat habit render it a very popular plant for decorative purposes. 18-24 in., 60 cts. 2 ft. specimens, \$1.00 and \$1.25.

PHILADELPHUS.**Syringa or Mock Orange**

For grouping with other shrubs, forming large screens or hedges which may not require pruning, or used as single specimen lawn plants they are desirable. They will bear heavy pruning and quickly reassume their free, semi-pendulous, picturesque effect.

Cor. Follis Aureis (Golden Syringa). A dense growing form, with clear, golden yellow foliage well retained in color all summer. One of the best golden foliaged shrubs offered. 18-24 in., 45 cts.

Coronarius (Mock Orange). Early June. Fragrant pure white flowers, in dense clusters so numerous as to bear the branches down when flowering. One of the best. 18-24 in., 35 cts.; 2-3 ft., 50 cts.

**Amurensis Privet**

PHILADELPHUS—Continued

Grandiflorus (Large Flowering). Has showy large flowers, slightly fragrant; branches somewhat straggling. 18-24 in., 35c; 2-3 ft., 50c.

Lemoinei. A charming variety of upright growth; flowers small, yellowish white, fragrant, completely covering the plant. 18-24 in., 35 cts.; 2-3 ft., 50 cts.

Mont Blanc. Tall, erect grower, with coarse foliage; large double or semi-double flowers, in clusters of a dozen or more at the axils of the leaves, so close together as to resemble branches of snow-balls. 2-3 ft., 50 cts.

Zeyheri. One of the most showy, with spreading branches. Literally covered with flowers an inch and a half across. 2-3 ft., 50 cts.

PYRUS

Arbutifolia (Black Chokeberry). A tall-growing shrub with light green foliage; small pinkish flowers in May; and shiny black berries late. 2-3 ft., 40 cts.

RHAMNUS

Catharticus (Buckthorn). A stiff, twiggy shrub with white flowers in June and July, succeeded by black berries. Splendid for massing in parks and public grounds. 2-3 ft., 30 cts.; 3-4 ft., 35 cts.

RHUS. Sumach

Cotinus (Purple Fringe). A much admired small tree or shrub for its curious fringe of hair-like flowers that cover the whole surface of the plants in middle summer. 2-3 ft., 35 cts.; 3-4 ft., 50 cts.

Glabra (Smooth Sumach). Very effective in autumn with its crimson seeds and foliage. 2-3 ft., 35 cts.; 3-4 ft., 50 cts.

Typhina (Staghorn Sumach). A large shrub or tree, brilliant foliage and scarlet fruit in autumn. 2-3 ft., 35 cts.; 3-4 ft., 50 cts.

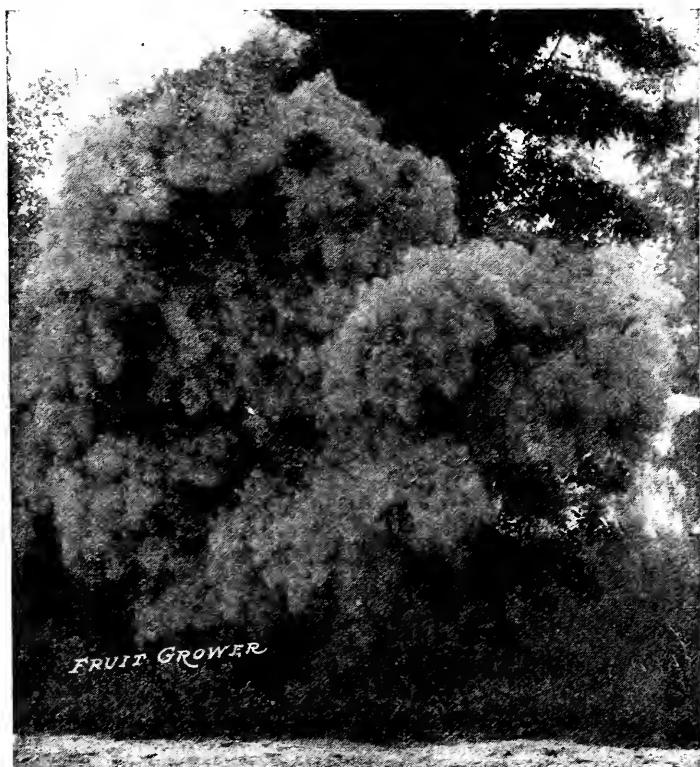

Typhina Laciniata (Staghorn Sumach). A large shrub or tree, brilliant foliage and scarlet fruit in autumn. 18-24 in., 35 cts.; 2-3 ft., 50 cts.

RHODOTYPOS. White Kerria

Kerrioides. A choice and rare Japanese shrub, recently introduced. It is a slender branched bush, with very pretty, deeply veined leaves, and pure white flowers, borne at intervals all summer. 18-24 in., 30 cts.; 2-3 ft., 40 cts.

RIBES

Hardy, bushy shrubs growing 8 to 10 feet high, prized on account of their early spring flowers; bright berries and dark; and pretty richly coloring foliage.

Purple Fringe

Philadelphus

Aureum (Golden Currant). Yellow flowers and dark brown fruits. 2-3 ft., 40 cts.

Sanguineum (Red Flowering Currant). Red barked twigs; and reddish purple flowers. 2-3 ft., 50 cts.

SAMBUCUS. Elder

Rapid-growing shrubs, with ornamental foliage, flowers and fruit. Will thrive in all soils, but give best fruiting results in that of a moist nature. The Golden Elder is one of the finest golden-leaved shrubs, and is very useful. It shows its color best on a dry soil.

Nigra, var. Aurea (Golden). A beautiful golden foliaged form. Very useful for foliage effect. 18-24 in., 30 cts.; 2-3 ft., 40 cts.; 3-4 ft., 60 cts.

Nigra, var. Laciniata (Cut-Leaved). Deeply cut foliage. 2-3 ft., 35 cts.; 3-4 ft., 50 cts.

Nigra Racemosa (Red-berried Elder). White flowers in panicles in spring, followed by bright red berries. 2-3 ft., 35c.

SPIREA. Meadow Sweet

An indispensable class of small to medium-sized shrubs, embracing a wide range of foliage, habit of growth, color of flowers and season of blooming. All of easiest culture in all soils.

Anthony Waterer. A new crimson flowered variety; one of the most beautiful of dwarf flowering shrubs. It makes a low, compact bush, 15 to 18 inches high, and is covered nearly the whole growing season with large umbels of deep crimson flowers. Perfectly hardy, it makes a fine compact plant for low clumps or for bedding purposes. Grown as a pot plant it is a fine plant for house decoration. 12-18 in., 30 cts.; 18-24 in., 40 cts.

Billardi. Medium sized shrub, producing spiked panicles of flowers, bright rose color. 18-24 in., 30 cts.; 2-3 ft., 40 cts.

Bumalda. A spreading, low bush, with dark leaves brightened by corymbs of pretty, light pink flowers in May, and at intervals all summer. 18-24 in., 35 cts.; 2-3 ft., 50 cts.

Callosa. A choice species; flowers in flattish umbels, bright pink and very showy. 18-24 in., 30 cts.; 2-3 ft., 50 cts.

Douglassi. Immense terminal spikes of deep rose colored flowers. One of the best. 2-3 ft., 40 cts.

SPIREA—Continued

Opulifolia (Nine Bark). A strong growing shrub with white flowers. 18-24 in., 30 cts.; 2-3 ft., 40 cts.

Opulifolia Aurea. Very conspicuous from the golden hue of its foliage; of strong growth. 18-24 in., 35 cts..

Prunifolia Fl. Pl. (Bridal Wreath). Very distinct, with numerous small, double white flowers, blooming early. 18-24 in., 30 cts.; 2-3 ft., 40 cts.

Reevesii (Lance-Leaved-Single). One of the most ornamental; showy flowers, pure white in umbels and very numerous. 2-3 ft., 40 cts.

Salicifolia (Willow-Leaved). Long, narrow, pointed leaves and rose-colored flowers in June and July. 2-3 ft., 40 cts.

Sorbifolia (Ash-Leaved Spirea). A vigorous species, with leaves like that of the Mountain Ash, long, elegant spikes of white flowers in July. 2-3 ft., 50 cts.

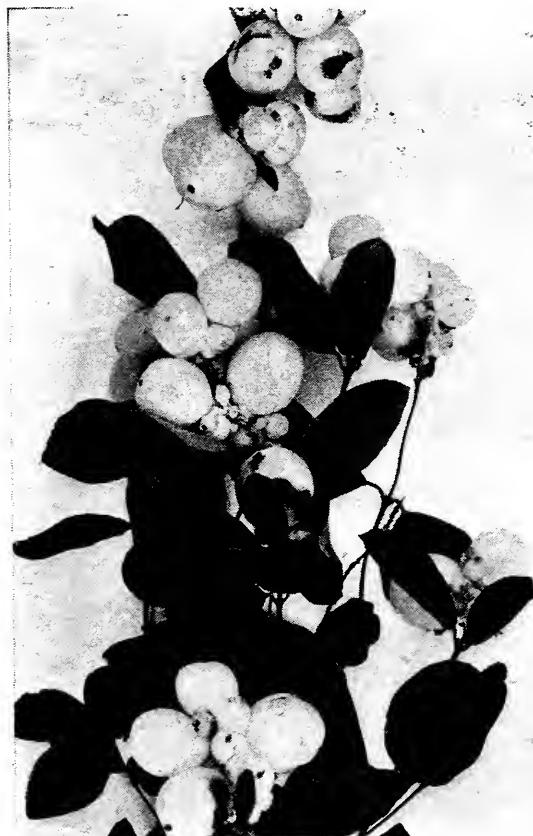

Thunbergii (Thunberg's). Dwarf habit and round graceful form, branches slender and somewhat drooping; foliage narrow and yellowish green. Flowers small, white. Esteemed on account of its neat, graceful habit and early blooming. 12-18 in., 30 cts.; 18-24 in., 40 cts.; 2-3 ft., 45 cts. Extra large clumps for immediate effect, 65 cts.

Van Houtte. The grandest of all the Spiraeas. It is a beautiful ornament for the lawn at any season, but when in flower it is a complete fountain of white bloom, the foliage hardly showing. Clusters of 20 to 30 flat white florets make up the racemes, and these clusters are set close along the drooping stem. Perfectly hardy and an early bloomer. 18-24 in., 25 cts.; 2-2½ ft., 30 cts.; 2½-3 ft., 40 cts.; very hardy specimen clumps, 65 cts.-75 cts.

SYMPHORICARPUS. St. Peter's Wort

Racemosus (Snowberry). Flowers inconspicuous, rose-colored, in June and July; leaves thin, dark green; fruits large, milk-white, clustered, persistent until late in winter. 2-3 ft., 40 cts.

Vulgaris (Coral Berry). Similar to the Snowberry, except that its fruits are red and that the smaller red berries cluster in thick ropes about the stems, which droop beneath their weight. 18-24 in., 25 cts.; 2-3 ft., 40 cts.

Snowberry

Spirea Van Houtte

SYRINGA. Lilac

This group is so well known that there is no need of extended description. To reach perfection, should have a moist, rich soil. We would call special attention to the newer varieties, as great improvement has been made in them.

Vulgaris (Common Purple Lilac). Large shrub, with larger leaves and flowers than above. Flowers bluish purple. 18-24 in., 25 cts.; 2-3 ft., 40 cts.

V. Alba (Common White Lilac). Flowers in slender panicles, pure white and fragrant. 18-24 in., 25 cts.; 2-3 ft., 40 cts.

Persica (Persian Lilac). Of more slender growth and finer foliage than the common Lilac. We have these in pink and white colors. 2-3 ft., 45 cts.

Rhotomagensis var. Rubra (Rouen Lilac). A distinct hybrid variety, with reddish flowers; panicles of great size and very abundant. One of the finest Lilacs. 18-24 in., 35 cts.; 2-3 ft., 50 cts.

Villosa (Japan Lilac). A species from Japan. Large branching panicles; flowers light purple in bud, white when open, fragrant. Especially valuable for later flowering. Single. 18-24 in., 30 cts.; 2-3 ft., 50 cts.; 3-4 ft., 60 cts.

Single and Double Varieties of Syringa Vulgaris Grafted Tree Form

S. V. Charles X. Large trusses, rather loose, reddish purple. Single. 2-3 ft., 50 cts.

S. V. Mad. Abel Chatenay. Milk white. Double. 2-3 ft., 50 cts.

S. V. Mad. Lemoine. Pure white. Double. 2-3 ft., 50 cts.

S. V. Michel Buchner. Clear Lilac. Double. 2-3 ft., 50 cts.

S. V. Pres. Grevy. Large trusses, rosy lilac. Double. 2-3 ft., 50 cts.

S. V. Pres. Carnot. Light Lilac. Double. 2-3 ft., 50 cts.

Jeanne d'Arc. Fine, large-flowered; white. 2-3 ft., 75 cts.

TAMARIX. Tamarisk

The Tamarisks are hardy shrubs, of strong growth, foliage light and feathery, their flowers delicate and fringing, usually in some light shade of red or pink. They will grow anywhere.

Africana. A tall, graceful shrub with small foliage like a Juniper, and delicate small rosy purple flowers, produced in spikes. Very pretty. 2-3 ft., 35 cts.; 3-4 ft., 50 cts.

Odessana (Caspian Tamarisk). A new variety, with pale rose flowers, blooming earlier than Gallica. 2-3 ft., 35 cts.; 3-4 ft., 50 cts.

Persian Lilac

TAMARIX—Continued

Gallica. Delicate pink or white flowers in slender-panicked racemes; leaves bluish green. An exceedingly pretty species. 2-3 ft., 35 cts.; 3-4 ft., 50 cts.

VIBURNUM

Dentatum (Arrowwood). A fine shrub for massing for foliage effect. Flowers greenish white. 2-3 ft., 50 cts.

Lantana. A large, robust shrub, with soft heavy leaves and large clusters of white flowers in May, succeeded with red fruit; retains its foliage very late. 2-3 ft., 40 cts.

Lentago (Sheepberry). Foliage light glossy green. Flowers creamy white, very fragrant. 2-3 ft., 50 cts.

Opulus (High Bush Cranberry). Very ornamental. Berries resembling small cranberries, hang until destroyed by frost late in fall. 18-24 in., 35 cts.; 2-3 ft., 50 cts.

Opulus Sterilis (Common Snow Ball). An old and well-known shrub, bearing large balls of pure white flowers. 18-24 in., 30 cts.; 2-3 ft., 50 cts.

Plicatum (Japan Snow Ball). A rare and exceedingly beautiful species of Japan; flowers in large globular heads; pure white, hanging long on the bush; a very choice and desirable shrub. 18-24 in., 35 cts.; 2-3 ft., 50 cts.

BOXWOOD

Most extensively used of the Evergreen Shrubs, for indoor, porch and lawn decoration. Our stock is of fine quality, shipped with the original ball of earth, either with or without tubs.

Prices on ball, cube and bird shaped specimens furnished on application.

Viburnum (Snowball)

PRICES OF BOXWOOD

2-2½ ft high, 12-14 in. diameter at base \$2.50; in tubs, \$3.25
 2½-3 ft. high, 14-16 in. diameter at base, \$3.00; in tubs, \$3.75

 3½-4 ft. high, 18-20 in. diameter at base, \$6.00; in tubs, \$6.75
 4-4½ ft. high, 22-26 in. dia. base, \$7.50-\$10; in tubs, \$8.50-\$11

Tamarix

Rhodotypos. White Kerria

The builder's art alone will not create the most beautiful homes. A touch of Nature is needed to smooth down the harsh lines of the architecture, no matter how extravagant or humble it may be. The attractive home is always the home that is adorned with beautiful shrubs and flowers. It grows lovelier year by year as the plants increase in age. Make your home beautiful with flowers. The expense is only a trifle; the satisfaction is great, and increases as the years go by.

Roses

TEAS AND HYBRID TEAS

Small size Roses postpaid. Small size Gruss an Teplitz free with any 25c purchase or more.

Cherry Ripe. An extraordinary free flowering Hybrid, branching in habit, vigorous and hardy, and as free as a Tea Rose. The flowers are medium in size, well formed, globular, light rosy-crimson; as fragrant as the Hybrid Perpetuals. Small, 15 cts; large, 35 cts.

Etoile de France (Star of France). A brilliant shade of clear red-crimsoned velvet, centering to vivid cerise; large flowers on long, stiff stems; remarkably vigorous, free blooming and hardy. Grown to some extent at a cut flower variety, but its chief value lies in its striking beauty as an outdoor bloomer and bedder with bronzy-green foliage. Small, 15 cts.; large, 35 cts.

Kaiserin Augusta Victoria. Pure white, does not pink when planted out; splendid, large buds and superb, full double blooms, making the choicest cut flowers. A most sturdy grower, blooming steadily from early spring until late frost. Small, 15 cts.; large, 35 cts.

Killarney (The Irish Beauty). Brilliant sparkling pink with large, pointed buds, broad, wax-like petals with silvery edges and enormous semi-full flowers of exceeding beauty. One of the very finest forcers and has become the type for a numerous family. Small, 15 cts. each; large, 35 cts.

Killarney Brilliant. Newest member of its family and expected to push Killarney, its parent, off the field. Color varying from crimson-pink in winter to a bright true pink in hot weather, brilliant throughout the year. As free a producer and a trifle stronger than the parent, with nearly double the petalage. First years sales enormous. Small 25 cts. each; large, 60 cts.

Killarney Queen. A cerise pink sport from Killarney, unequalled for clearness and brightness of color, with petals larger than in the parent, and its perfect foliage likewise larger than and more glossy. Small, 20 cts. each; large, 50 cts.

White Killarney. A pure white sport from the pink parent above described. Identical with the pink variety except in color. Small, 15 cts. each; large, 35 cts.

Kaiserin

La France. . Silvery-rose, with pink shades and satin-like petals of unsurpassable beauty; large, symmetrical and deliciously fragrant blossoms from June until frost; hardy with protection. Small, 15 cts.; large, 35 cts.

Lemon Queen. Lemon-yellow. The build of the flower is a refined "Druschki." The fragrance is delicious and is a desirable attribute. A rose par excellence. Small 25 cts.; large, 50 cts.

Maman Cochet. Rich, rosy-pink, shaded silvery-rose on outer petals; exquisite in color and graceful in form from bud to bloom and delightfully fragrant; beautiful, healthy foliage and long, stiff stems. Unquestionably the queen of pink Tea Roses and a leading cut flower variety. Small, 15 cts.; large, 35 cts.

White Maman Cochet. Identical with its parent, Maman Cochet, in everything except color. Has same freedom of bloom and magnificent form of buds and flowers and the same hardiness. Vigorous and hardy nearly everywhere. Small 15 cts.; large, 35 cts.

The Bride (White Tea Rose). Flowers very large on long, stiff stems. They last a long time after being cut, making it one of the best for bouquets. Sometimes a pinkish white in very small hot weather, but usually a pure white. Small, 15 cts.; large, 40 cts.

Bridesmaid. Clear, shining pink. Buds of exquisite shape; stems long and stiff; a profuse bloomer. A leader of pink forcing roses since 1893, and likewise an outdoor favorite. Small, 15 cts.; large, 35 cts.

Clothilde Soupert. A really wonderful Rose for bedding out or for pot culture; medium size and very double; white shading to deep pink at center; a profuse bloomer and a strong dwarf grower, deliciously fragrant. Small, 15 cts.; large, 35 cts.

Hermosa. Popular for many years; cup-shaped, finely formed and full flowers of soft, deep pink; ever blooming, beautiful and hardy. Small, 15 cts.; large, 35 cts.

Meteor. Intense velvety-crimson, buds and blooms large, elegantly formed, fully double and borne on nice, long stems, with healthy, bright foliage of the deepest green. Brilliant and highly popular. Small, 15 cts.; large, 35 cts.

Ophelia. Brilliant salmon-flesh shaded with rose on outer edges of petals, with a heart of glowing peach-pink and orange-yellow blippings, all passing finally to lighter shades; fragrant as Richmond, faultless form in bud and flower; erect habit; stiff, long stems; free and continuous in growth and bloom; handsome, bright foliage; immune to mildew and black spot; possesses every requisite of a perfect forcing rose. Small, 35 cts.; large, 75 cts.

Radiance. Brilliant rosy-carmine, shaded with rich opaline-pink tints in the open flower, which is large, full, of fine form, with copper petals. A constant and fragrant forcer, producing strong, upright canes and an excellent keeper in summer. Seedling from Cardinal. Small, 15 cts.; large, 35 cts.

Pink Soupert. Rose-pink in color; otherwise same as Clothilde Soupert: always in bloom. Small, 15 cts.

Pink Frau Karl Druschki

TEAS AND HYBRID TEAS—Continued

Sunburst. This magnificent giant yellow Rose is a fine forcer; it stands head and shoulders above all others of its color and will rank with American Beauty and the Killarneys in value and grandeur. It has long, pointed buds, which can be cut tight for market. The color is orange-copper or golden-orange and golden-yellow; edge of petals lighter; all intense shades, extremely brilliant in effect. Some call the color cadmium-yellow. It makes no difference what you call its color, it is the yellowest of all Roses in the ever-blooming class. Belongs in the class of big Roses; had created a sensation wherever shown. Yes, and something more must be said about this Rose. It puts all the yellows to sleep when it comes to bedding in the garden. The golden-yellow color stays right with the flower until it fully finishes. Better get acquainted with "Sunburst." Small, 25 cts.; large, 60 cts.

HYBRID PERPETUAL ROSES

American Beauty (Mme. Ferd. Jamin.) Generally conceded to be the most grandly beautiful of Roses in size, form and color. Rich red, passing to crimson, very delicately veined and shaded and surpassingly fragrant. A hardy ever-bloomer and rapid grower. Small, 25 cts.; large, 60 cts.

Boule de Neige (Ball of Snow). Pure white, showing light flesh upon opening; elegantly formed, very full and double, with beautifully shaped petals evenly arranged; hardy. Small, 15 cts.; large, 40 cts.

J. B. Clarke. Intense scarlet, shaded crimson-maroon, very dark and rich, and sweetly fragrant; petals large, deep and smooth; extremely high pointed center; foliage bronzy-green changing to dark-green; growth strong and upright, making a large, handsome bush. Small, 15 cts.; large, 40 cts.

Frau Karl Druschki (The White American Beauty, or Snow Queen). An everywhere hardy, vigorous grower, with bright green leaves, delicately veined; splendid long buds and magnificent snow-white blooms with large saucer-shaped petals. Rightly named and deservedly a prize winner. Small, 25 cts.; large, 50 cts.

General Jacqueminot. A celebrated and much sought after variety, both for planting out and pot forcing; shapely buds and handsome blooms of bright, shining crimson, rich, brilliant, velvety and fragrant. Everybody knows and wants the "Jack" for its all 'round good qualities. Small, 15 cts.; large, 40 cts.

Gruss an Teplitz. Hardy in all sections; grows freely to a height of four to five feet; vivid, dazzling, fiery crimson; sweetly fragrant; produces a mass of gorgeous blooms on long stems. Greatest rose for cold climates. Small, 15 cts.; large, 35 cts.

Hugh Dickson. Brilliant crimson, shaded scarlet; very large and beautiful in form, with large, smooth petals, slightly reflexed on the edges. A vigorous grower, with handsome foliage, very fragrant. Small, 15 cts.; large, 40 cts.

Madame Plantier. A June Rose, well worthy of its long and continued popularity. Pure white, large and double, hardy as a forest tree; a free and continuous bloomer of the best white Hybrid Perpetuals, used extensively for cemetery planting. Small, 15 cts.; large, 40 cts.

Mistress John Laing. A beauty in clear, bright, shining pink; each bud in its long, serrated calyx with adjacent green foliage, forms a dainty and lovely boutonniere; immense, full bloom on long, stiff stems, sweetly scented. Small, 15 cts.; large, 40 cts.

Paul Neyron. The largest of all Rose blooms; bright, shining pink, clear and beautiful; very double and full; finely scented; blooms first season and all summer. Grows to a great height in a single season and stems are almost thornless. Small, 15 cts.; large, 40 cts.

Pink Frau Karl Druschki (George Arends). This is the wonderful "Pink Druschki." Do not confound it with the much inferior sort "Heinrich Munch," which is being offered in some quarters as "Pink Druschki." This Rose we predict will have as large a following and be as widely planted in a very few years as the now famous "White Druschki." We have looked it over in the field and grown it in pots for the market, and we absolutely cannot detect a single fault in it or about it. The growth and makeup of the plants are superb, while the delicate pink color is unapproachable. Small, 35 cts.; large, 75 cts.

Prince Camille de Rohan (La Rosiere). Universally known as "The Black Rose," owing to its very deep, velvety crimson color, passing to intense maroon, and shaded black; large, handsome and fragrant blooms. Small, 15 cts.; large, 40 cts.

Ulrich Brunner. Brilliant cherry-red flowers of immense size and bold globular form. Seedling of Paul Neyron, strong and disease resisting. Small, 15 cts.; large, 40 cts.

HARDY CLIMBING ROSES

Blue Rambler. A sport from Crimson Rambler and as vigorous a climber; produces immense panicles of blooms, opening reddish-lilac, changing to amethyst and steel-blue. A German novelty of recent introduction. Small, 15 cts.; large, 35 cts.

Climbing American Beauty. A seedling from American Beauty with an admixture of Wichuriana and Tea Blood. Same as its namesake in size, color and fragrance, with the addition of the climbing habit. Better blooming qualities, good foliage, and has proven hardy and withstood heat and drought. Small, 20 cts.; large, 50 cts.

Dorothy Perkins. Beautiful shell-pink color, which holds for a long time, fading finally to a lovely deep rose; very sweet-scented; fully equal to Crimson Rambler in foliage, hardiness, habit of growth and blooming qualities. Small, 15 cts.; large, 35 cts.

Dorothy Perkins

Gruss an Teplitz

HARDY CLIMBING ROSES—Continued

Crimson Rambler. The most popular out-of-door climber of today; a rapid producer of long, heavy canes, reaching a height of ten to twenty feet in one season; rich clusters of bloom from a mass of vivid crimson beauty until late in the season. Perfectly hardy in the most trying climates, being a native of Japan. Small, 15 cts.; large, 35 cts.

Excelsa (Red Dorothy Perkins). Intense crimson-scarlet; double flowers in brilliant clusters set in glossy, shining foliage which never mildews nor spots. An intensified Crimson Rambler, which it promises to displace. Extremely vigorous and the handsomest of all red climbers. Small, 20 cts.; large, 40 cts.

White Dorothy Perkins. A pure white sport from Dorothy Perkins, with which it is identical in foliage and habit. A valuable addition to the hardy climber class. Small, 15 cts.; large, 35 cts.

Shower of Gold. Deep golden-yellow orange flowers borne in splendid trusses forming a mass of bloom. Extremely long laterals are densely clad with a beautiful Wichuraiana foliage, the leaves on upper side a vivid, glossy green, the under side and stems a reddish-brown shot with a silvery sheen. Small, 20 cts.; large, 50 cts.

Tausendschoen (Thousand Beauties). Varying shades from a delicately flushed white to a deep pink or rosy-carmine, in bright clusters of blossoms almost covering the handsome pale-green foliage. A vigorous hardy climber with few thorns, of German origin. Small, 20 cts.; large, 50 cts.

MEMORIAL OR EVERGREEN ROSES

The type of this group of Roses, Rosa Wichuraiana, is of Japanese origin, and flowers during June and July. This, as well as the varieties that have originated from it, are of a trailing habit of growth, very hardy, and are recommended for covering graves; hence one of its names—Memorial Rose—climbing over walls, arbors, stumps of trees or for trailing over rocks or rough ground; in fact, anywhere where a climbing or trailing rose can be used. The foliage is of a leathery texture, of a beautiful shining green, and not only proof against all insects, but is retained on the plants until late in the winter, making them almost evergreen. The flowers are an ivory white. Small size, 15 cts.; large, 40 cts.

POLYANTHA OR BABY RAMBLERS

Anna Muller. This rose is very much the same as the Crimson Baby Rambler, except in the color of its flowers, which are a shiny, brilliant pink produced in the greatest profusion in large clusters. It is a splendid companion to the other excellent members of this family. This is the original pink Baby Rambler. Small, 15 cts.; large, 35 cts.

Baby Rambler. The Crimson Rambler in dwarf form, with the same clear, brilliant, ruby-red color. Hardy and healthy everywhere, attaining a height of twenty inches, and blooming in profuse clusters until frost and throughout winter if taken indoors. Small, 15 cts.; large, 35 cts.

the variable coloring in its flowers that its parent has, being firm white, delicately flushed pink, changing to deep rosy-carmine. This is a splendid Rose. Try it. Small, 20 cts.; large, 50 cts.

Erna Teschendorff. Carmine-red sport from and fuller than Mme. Norbert Levavasseur, of fiery color similar to Gruss an Teplitz; never blues. Blooms from May to end of October. Claimed the newest and best of the Baby Rambler class; a medal winner. Small, 20 cts.; large, 50 cts.

White Baby Rambler. Pure snow-white, double blooms in profuse clusters, making a sheet of white color, with a fragrance similar to Hyacinths. Compact, bushy grower of dwarf habit; foliage dark, glossy and finely cut; ever blooming and hardy. Small, 15 cts.; large, 35 cts.

George Elger. Golden-yellow buds opening to a deep clear yellow; growth upright. Very free flowering. Fine for massing and pot culture. This is the finest yellow Polyantha and should become as famous as Mlle. Cecile Brunner. Small, 35 cts.; large, 75 cts.

RUGOSA ROSES

Conrad Ferdinand Meyer. Pure, silvery-pink, surpassing all others of the Rugosa family in beauty of color and fullness of form; fragrant and hardy; will not mildew nor black-spot; handsome in foliage and valuable as an ornamental shrub. Large, 50 cts.

New Century. A grand Rose that is entirely hardy, bearing beautiful silvery-pink flowers in clusters. This Rose is in bloom all the time. Extra fine for cold climate. Small, 25 cts.; large, 60 cts.

Sir Thomas Lipton. The best pure white Rugosa Rose. Strong and vigorous; grows four feet high. Flowers perfectly double, pure snow-white. Fragrant, borne on stems continuously throughout the season. Absolutely hardy everywhere. Splendid for hedging, cemetery and park work. Small, 25 cts.; large, 60 cts.

MOSS ROSES

Mousseline. Pure white flower, buds heavily and beautifully mossed. Small, 25 cts.; large, 50 cts.

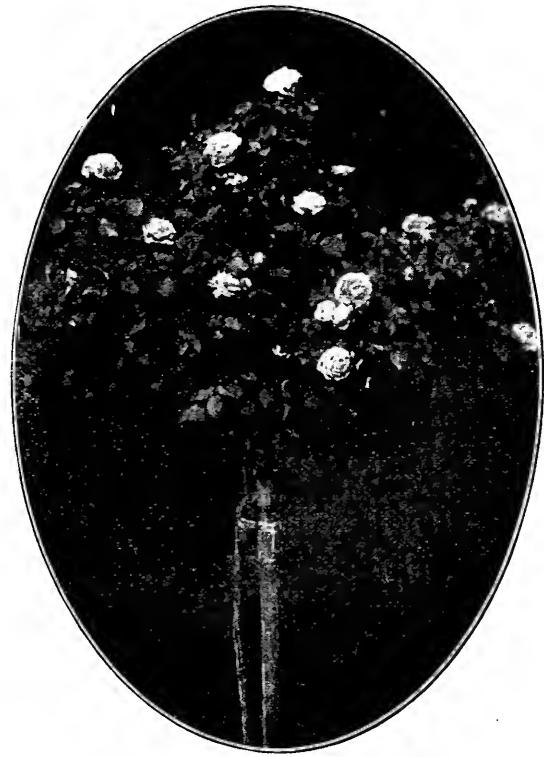

Princesse Adelaide. Bright, rosy-pink; large, double and fragrant; buds beautifully mossed. Small, 25 cts.; large, 50 cts.

STANDARD OR TREE ROSES

The Tree Roses are grafted on hardy Rose stalks four to five feet high, and when in full bloom are objects of beauty, making handsome plants for the lawn or Rose border. In this shape we offer only the Hybrid Perpetual and hardy classes. We have them in white, the different shades of pink, red and crimson. Fine, strong trees; bloom nicely first year. \$1.25, \$1.50, 2.00. State colors desired.

Crimson Rambler

Tree Rose

Ornamental Vines and Climbers

AMPELOPSIS

Engelmannii (Engelmann Ivy). Shorter jointed than *Quinquefolia*. A good climber; grows 6 to 10 feet in a season. Small size, 15 cts.; large size, 40 cts.

Quinquefolia (Woodbine or Virginia Creeper). Has beautiful digitate leaves that become rich crimson in autumn; a very rapid grower. One of the finest vines for covering walls, verandas or trunks of trees. Large size, 40 cts.

Veitchii (Boston Ivy). Of Japanese origin; entirely hardy, with foliage turning brilliant red in the autumn. It clings tightly to walls and is unsurpassed as a basket or vase plant. Small size, 15 cts.; large size, 45 cts.

ARISTOLOCHIA. Dutchman's Pipe

Siphon. A fine, hardy climber and well known in some parts of the country as Chinese Yam. The tubers grow very large and are edible, like sweet potatoes. The vine is a beautiful, rapid grower, producing sweet scented flowers. Small size, 35 cts.; large size, 75 cts.

BIGNONIA. Trumpet Vine

Grandiflora. A strong, rapid grower, of rather bushy habit and bearing large flowers of brilliant orange red. Large size only 45 cts.

CELASTRUS. Bitter Sweet

Scandens. A native climber, with handsome, glossy foliage and large clusters of beautiful orange-crimson fruits retaining all winter. Very bright in effect and charming for winter house decorations. Large size only 50 cts.

CLEMATIS

A beautiful class of hardy climbers, excellent for pillars or trellises. They delight in a rich soil and sunny situations, and are perfectly hardy.

Duchess of Edinburgh. Double, pure white, 50 cts.

Henryii. A magnificent, large white flower, a free grower and bloomer. 50 cts.

Jackmannii. Deep violet purple, with a rich velvety appearance. One of the best. 50 cts.

Madame Baron-Veillard. Of recent introduction and quite like its parent, the popular *Jackmannii*, in habit and make-up, except that its flowers are a lively, satiny lavender-pink; entirely distinct from any other variety and charming in effect. 50 cts.

Madame Edouard Andre. Also of the *Jackmannii* type and is the nearest approach to a bright red that has yet appeared. The flowers are very large, usually six-petaled, of a distinct, pleasing shade of carmine, and are produced in bewildering profusion. 50 cts.

Ramona. Lavender-blue, flowers large, often nine inches across. Most beautiful of its color known. 50 cts.

Paniculata (Small Flowered Clematis). A vine of very rapid growth, quickly covering trellises and arbors with handsome, clean, glossy, green foliage. The flowers are of medium size, pure white, borne in immense sheets, and of a most delicious and penetrating fragrance. Small size, 15 cts., 3 for 40 cts; large size, 40 cts.

LONICERA. Climbing Honeysuckle

Aurea Reticulata (Golden Leaved). A variety with beautifully variegated foliage; leaves netted and veined with clear yellow; flowers yellow and fragrant. Small size, 15 cts.; large size, 45 cts.

Brachypoda (Yellow Trumpet). A strong, vigorous grower; dark green foliage; flowers yellow and fragrant. Small size, 15 cts.; large size, 45 cts.

Japonica var. Chinensis (Chinese Evergreen). Blooms at intervals through the summer and retains its foliage late in winter. Flowers nearly white. Small size, 15 cts.; large size, 45 cts.

Japonica var. Halleana (Hall's Japan). Color white, changing to yellow, very fragrant, blooms from June to November. Small size, 15 cts.; large size, 45 cts.

Periclymenum var. Belgica (Monthly Fragrant). A fine rapid growing variety; flowers large and very fragrant; color red and yellow; a constant bloomer. Large size only 45 cts.

Sempervirens (Scarlet Trumpet). A strong rapid climber; blooms very freely the entire season; bright red, trumpet shaped flowers. Small, 15c; large, 45c.

LYCIUM. Matrimony Vine

Chinese. Very hardy; grows anywhere. The slender drooping branches are somewhat thorny and bear grayish green leaves. Flowers small pink and purple from June to September, and are then succeeded by a profusion of bright scarlet and orange fruits through late fall and winter. A good plant for covering trellis work and bowers; also for covering bare places or rock. 40 cts.

PUERARIA THUNBERGIANA. Kudzu Vine

Thunbergiana. This is without a doubt the fastest growing vine we know of. We grow, and recommend it to our customers who want a fast growing vine for covering arbors and trellises, also for covering rocky slopes. It is only lately we have become acquainted with its many good qualities. Small 15 cts.; large, 25 cts.

WISTARIA

Chinensis (Chinese). Flowers in clusters, pale blue, sometimes give a second crop of flowers in the fall. Small size, 15 cts.; large size, 50 cts.

Chinensis Alba. Of similar habit to *Chinensis*, with pure white flowers. Small size, 15 cts.; large size, 50 cts.

Clematis Henryii

Wistaria

Perennials

ACHILLEA. Milfoil, Yarrow

Free flowering plants of easy culture, well adapted for the mixed hardy border. The Achilleas are very hardy, and give a wealth of bloom the entire summer.

Ageratum. June-August. Yellow, very fragrant flowers. 10 cts.

Boule de Neige (Ball of Snow). 2 ft. June-August. An improvement on the Pearl; the flowers being of more perfect form with fuller centers. 20 cts.

Millefolea Rosea. 2 feet. June-July. Large umbels of bright rose colored flowers. 15 cts.

Ptarmica fl. pl. (The Pearl). 2 ft. June-August. Pure white flowers borne in greatest profusion the whole summer on strong, erect stems, and of great value as a cut flower. 15 cts.

ACONITUM. Monkshood

Handsome herbaceous plants, with bold spikes of hood-shaped flowers thriving in either shade or sun. The roots are poisonous and should not be planted where the tubers might be mistaken for vegetables.

Fischeri. Stout spikes of large, clear blue flowers and bright, glossy foliage. 3 ft. 15 cts. each; \$1.50 per doz.; \$10.00 per 100.

Napellus. 2 1/2 ft. August-September. Rich dark blue flowers. 25 cts.

Wilsonii. 6 ft. A new variety from China, with fine spikes of deep blue flowers. 25 cts.

(Small size Perennials go forward postpaid.)

Achillea

AGROSTEMMA. Rose of Heaven or Mullein Pink

Coronaria. 1-2 ft. June-September. Flowers growing pink, coming in loose panicles of phlox-like blossoms. Fine for cutting. 15 cts.

Flox Jovis. Deep pink flowers on 12-inch stems. 15 cts.

ANCHUSA. Alkanet, Buglos

Very pretty hardy perennials with blue or purple flowers in racemes, of easy cultivation and preferring a sunny position. The honey bee is very fond of this species.

Italica Dropmore variety. A great improvement on the old Italian Alkanet; gentian-blue flowers that make it one of the most desirable of all perennials. 4 to 5 ft. 25 cts.

Myosotidiflora. A pretty Russian variety with large umbels of pale blue Forget-Me-Not-like flowers. 6 in. to 1 ft. 35 cts.

Opal. Large pale blue flowers, very beautiful. 3 to 4 ft. Blooms most of the summer. 25 cts.

AQUILEGIA. Columbine

The Columbines are one of the most elegant and beautiful of the hardy plants, producing their graceful spurred flowers on stems rising 2 feet or more above the beautiful divided foliage. They should be planted freely as there is no plant that will add so airy a grace to your gardens and borders as the Columbine. They thrive in any well-drained soil; either in sun or half shade. The varieties we offer are the latest and best of this favorite, old-fashioned garden flower.

Canadensis. Handsome scarlet and orange flowers. 15 cts.

Coerulea (Rocky Mountain Columbine). 3 ft. One of the most beautiful of our native American

flowers. Sepals, deep blue; petals, white. 15 cts.

Crysanthia. 3 ft. Bright yellow, long spurred flowers. 15 cts.

Grandiflora Alba. Large flowering, pure white, long spurs. 15 cts.

ANTHEMIS. Hardy Marguerite

Kelwayi. 18 in. A paler variety of the above. 15 cts.

Tinctoria. 2 ft. Handsome, finely cut foliage, and large, golden-yellow, daisy-like flowers. 15 cts.

ASTER. Michaelmas Daisies

Michaelmas Daisies now fill a most important place in all hardy flower gardens, lighting up the shrubberies and borders with their masses and clouds of dainty and brightly colored blossoms throughout the autumn months up to November, when other flowers are scarce. To cut for vases or church decoration they are invaluable, providing as they do, an inexhaustible supply of bloom.

A. Bessarabicus. 2 ft. Very deep blue. 15 cts.

A. Grandiflorus. 2 ft. Single blue and pink flowers of great size. 20 cts.

Beauty of Colwall. New. A distinct novelty, and the first double variety raised. Flowers a pleasing shade of lavender. 4 ft. Sept. 35 cts.

Dainty. Very fine white. 25 cts. (Collection of above four varieties, 75c.)

Mixed Hybrids. In the finest array of sizes and colors. 15 cts.; extra large clumps, 35 cts.

Centaurea

BELLIS PERENNIS. Double English Daisy

April-June. 6-8 in. Greatly improved varieties of the popular Double Daisy. Admirably adapted for edges, borders and low beds and also well suited for growing in pots.

Mammoth Double Pink. 15 cts. each; \$1.25 per doz.; \$10 per 100.

Mammoth Double White. 15 cts. each; \$1.25 per doz.; \$10 per 100.

BOCCONIA CORDATA. Plume Poppy

July-September. 4-6 ft. A handsome border plant having large, globular, heart-shaped leaves with silvery undersurface and flower plumes of pretty cream color. 15 cts.

BOLTONIA. Fale Camomile

4-6 ft. One of the showiest of our native hardy perennials, with daisy-like flowers in countless thousands in July to September. Very effective.

Asteroidea. White. 15 cts.

Latisquama. Pink tinged with lilac. 15 cts.

CAMPANIA. Bell Flower

Bell-shaped flowers well-known and most easily grown. Equally useful for flower borders, shrubs or wild garden.

Calycanthema (Cup and Saucer or Canterbury Bells). Colors, rose, pink, blue and white. 15 cts. each; \$1.25 per doz.; \$10 per 100.

Medium (Original Canterbury Bells). The old-fashioned sort, with beautiful bell-shaped blossoms. We offer in four different colors or mixed. Dark blue, light blue, rose and white. 15 cts. each; \$1.25 per doz.; \$10.00 per 100.

Persicifolia Grandiflora (Peach Bell). Undoubtedly one of the finest bell flowers. Grows from 2 to 3 ft. high. Large blue flowers. 15 cts.

CENTAUREA. Hard Heads or Knap Weed

July until August. Of easy culture and delighting in an open, sunny position, producing a wealth of bloom which not only makes a fine display in borders, but is excellent for cutting.

Alba. Large white variety of the above, very showy. 15 cts.

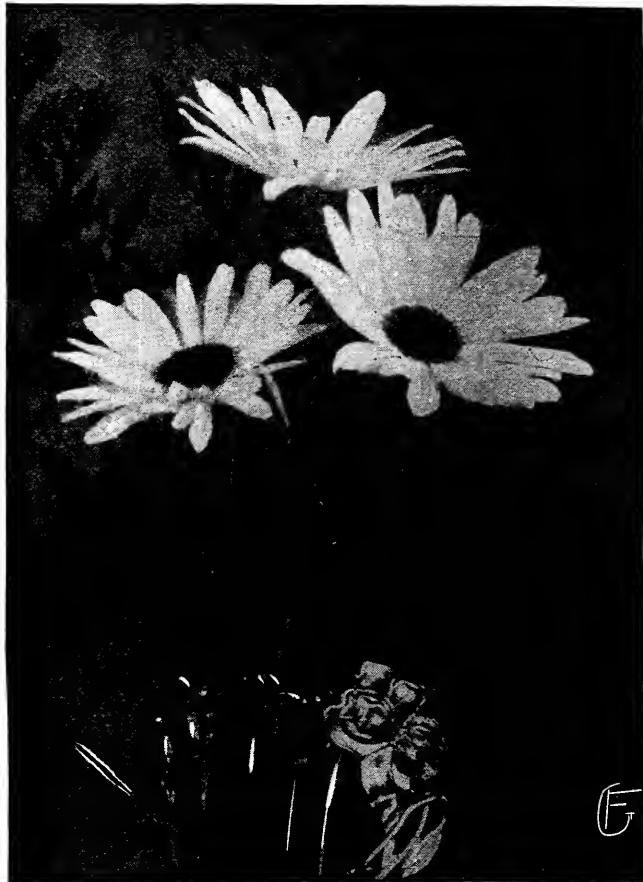

Montana (Perennial Corn Flower). 2 ft. Large violet blue flowers. 15 cts.

CHRYSANTHEMUM MAXIMA. Moon Penny Daisy

2-3 ft. June until October. The Moon Penny Daisy is one of the most satisfactory of hardy perennials as it has a wealth of bloom the entire summer, and is unsurpassed for cut flowers and decorations.

Giant Shasta. This is the largest of the Moon Penny family and was originated by Burbank, who experimented extensively with this flower. 15 cts.; large clumps, 25 cts.

Leucanthemum. Very pretty, clear white flowers with ox eye. 15 cts.

Shasta Daisy

OLD-FASHIONED LARGE FLOWERING HARDY CHRYSANTHEMUM

We offer five fine large flowering varieties which have proven absolutely hardy in this latitude, having withstood the severe winters of 1911 and 1915 without injury. We have found these to be the best of the hardy "Mums."

Autumn Glow. Rosy crimson. 15 cts.

Golden Queen. Yellow. 15 cts.

Indian Red. 15 cts.

Old Homestead. Pink. 15 cts.

Victory. White. 15 cts.

Five Varieties
60 cents

COREOPSIS

Lanceolata Grandiflora. 2-3 ft. One of the most popular hardy plants. The flowers are a rich golden yellow and of graceful form and invaluable for cutting. The main crop comes during the latter part of June but continues in bloom the entire summer and autumn. Will succeed in any soil. 15 cts.

Rosea. 1 ft. Finely-divided dark green foliage bearing in August and September numerous small pink flowers. Very useful in the hardy border. 20 cts.

DICENTRA SPECTABILIS. Bleeding Heart

An old-fashioned favorite; its long racemes of graceful heart-shaped flowers are always attractive and is always at home in any part of the hardy border, and especially valuable for planting in the shade. Our stock of this perennial is the finest we have seen. 15c; extra large clumps, 25c.

DELphinium. Hardy Larkspur

Few flowers are so handsome as the perennial Larkspur, which supplies our gardens with a wealth of blue that would be sadly lacking if it were not for these magnificent plants. No other flower combines so many varied shades of this lovely color, which is always the rarest in the garden. The soft azure of the Forget-Me-Not, the rich blue of the Gentian, the deep sapphire and royal purple hues, are all represented and form a brilliant setting for the small, white, gold or black centered petals, while over all is suffused a beautiful rose fringe impossible to describe. There are many species in cultivation, but the most desirable are the tall hybrids, of which we hold a large and up-to-date assortment, including the very newest.

Album. 2 ft. Pure white. 15 cts.

Funkia

DELPHINIUM—Continued

Belladonna (Everblooming Hardy Larkspur). This is the freest and most continuous bloomer of the hardy Larkspurs. The color—turquoise blue—of its flowers is not equaled for delicacy and beauty. A really exquisite variety. 25 cts. Large clumps, 50 cts.

Chinense (Chinese). 2 ft. Pure blue in branching dwarf spikes. 15 cts. Large clumps, 25 cts.

Coelestinum. Exquisite celestial blue with white centers. A most beautiful variety. 15 cts.

Elatum (Bee Larkspur). 3-5 ft., 25 cts.

Formosum. Beautiful spikes of blue flowers with white centers. 15 cts. Large clumps, 25 cts.

Indigo (New). 4 ft. Pure indigo blue. 25 cts. } **Collection of 7 sorts**
Named sorts in choice assortment on application. } \$1.20 Postpaid

DIANTHUS or PINKS

A magnificent genius representing some of the most popular flowers in cultivation, producing a great variety of brilliant colors and profusion of bloom.

Cyclops (Clove Pinks). 12-18 in. An exquisite mixture of colors, large free blooming. 15 cts.

Plumarius (Grass Pink, or Pheasant-eye Pink). 12 in. A beautiful single hardy pink with fringed white flowers and dark centers. 15 cts.

Deltoides (Maiden Pink). 9 in. Masses of small deep rose flowers of neat creeping habit. 15 cts.

Gaillardia

FUNKIA. Blue and White Day Lily

These handsome, hardy, herbaceous plants develop their ornamental foliage early in the spring, and in the summer and autumn throw up a profusion of lily-like flower spikes that succeed either in sun or shade, but the foliage will grow to larger size in partial shade. They are very effective in formal border. We offer a very fine collection.

Cucullata Medio Picta. 4 ft. August. Rich purple flowers. 20 cts.

Fortunei. 12 in. Aug. Glaucous blue foliage, flowers pale mauve. 20c.

Lanceolata. 12 in. Sept. Valuable for its lilac blue flowers. 15 cts.

Subcordata Grandiflora Alba. Large spikes of new white fragrant flowers. 15 cts.

Sir Thomas Hogg. 12 in. Large foliage elegantly margined white. 25c.

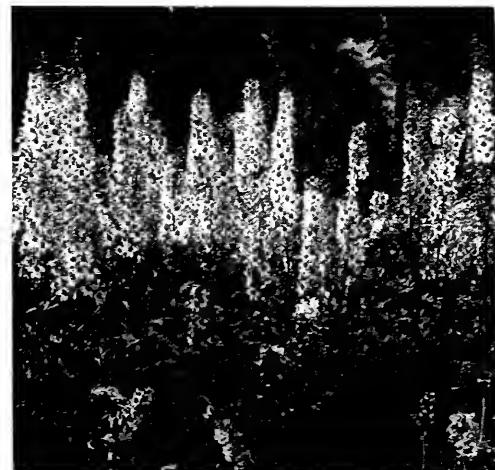

Undulata Medic Variegata. 12 in. Silvery white, lined green. A very ornamental foliage plant. 25 cts.

GAILLARDI. Blanket Flower

2 ft. June to October. The flowers are often 4 to 5 inches across, colored in a great diversity of varieties and blendings, including such combinations as scarlet with gold edge, blood red with yellow edge, yellow with orange disk, golden with scarlet border, pure yellow, fiery-crimson and others. These hardy perennials are of compact growth and produce a succession of flowers all summer and fall. For cut flowers they will last in water for days. Following varieties, each, 15 cts.

Maxima Kermesina Splendens. Center crimson, canary yellow border.

Newest Hybrids Mixed. Including the finest of these choice flowers.

Delphinium

Semperflorens (Everblooming Garden Pinks). 15 in. Very beautiful sweet-scented, double, semi-double and single flowers in great diversity of color. 15c.

DIANTHUS BARBATUS. Sweet William

Double Blood Red. 15 cts.

Johnson's Giant. The range of color includes shades which are not to be found in other strains, and the peculiar and delicate markings on the flowers are most attractive. 15 cts.

Double White. 15 cts.

Roseus (Pink Beauty). Flowers pink. 15 cts.

DICTAMNUS. Gas Plant

A very showy border perennial, having fragrant foliage and spikes of curious flowers, giving off during hot weather a fragrant volatile oil, which ignites when a match is applied to it.

Alba. Pure white. 15 cts.

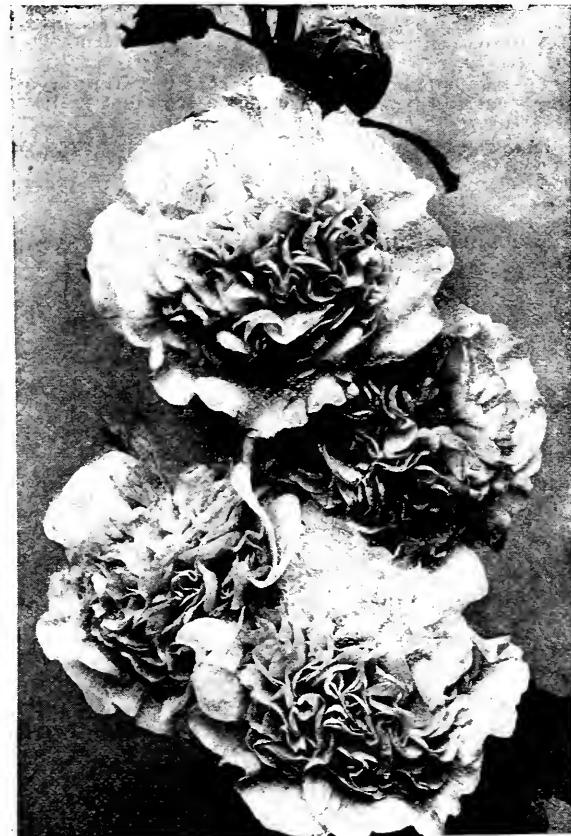

Caucasicus. A gigantic form, which has recently been brought from Russia, with flowers twice the size of the type. 25 cts.

Fraxinella. 3 ft. Showy rosy-pink flowers, with deeper rings. 15 cts.

DIGITALIS. Fox Gloves

A handsome and highly ornamental plant of stately growth, succeeding under almost all conditions and with but little attention will give a wealth of flowers during June and July. They require protection in winter. We furnish them in Purple, Rose, White and Yellow. 15 cts. each; \$1.50 per doz.; \$10.00 per 100.

FEVERFEW. See Matricaria

Hollyhock.

GOLDEN ROD. See *Solidago*.

GYPSOPHILA. *Baby's Breath*

Paniculata. 2 ft. July-August. Small flowers on branched stems so thick as to give the plant a lace-like effect. 15 cts.

HELENIUM. *Sneezewort*

Riverton Gem. 4 ft. Old gold, changing to wall flower red. 20 cts.

Riverton Beauty. 4 ft. Rich lemon yellow with large purplish-black cone from August to September. 15 cts.

HEMEROCALLIS. *Yellow Day Lily*

These popular hardy plants belong to the lily family. They succeed everywhere, and should always be included in the border of old-fashioned hardy flowers.

Aurantica (Orange Lily). 25 cts.

Citrina. Pale citron-yellow flowers. 35 cts.

Dr. Regel. Broad-petaled rich orange flowers. 30 cts.

Flava. Pleasing pale yellow. 15 cts.

Fulva. Showy coppery red. 15 cts.

HOLLYHOCK

6 to 8 ft. Aug.-Sept. One of the most majestic of hardy plants, and a clump or line in any garden gives an effect not attainable with any other plant. For planting among shrubs or forming a background for other flowers it is without equal. We offer a very choice collection of these fine old plants.

Allegheny Mixed. 15 cts.

Double Mixed. 15 cts.

Double Varieties. White, Crimson, Dr. Faust (Black), Salmon, Deep Rose, Blood Red, Yellow, White with Pink Center. 15 cts.

Single Varieties, Mixed. 15 cts.

IRIS

These flowers have been overlooked. They are perfectly hardy and exceedingly beautiful, multiplying with great rapidity. Put the Iris in a sunny place if possible, where they will have some building or a hedge to protect them from the wind. Ground should be rich and well supplied with water. Spade the earth deep and plant the roots 18 inches apart, covering them 2 inches. Cultivate well.

Agnes. S. white frilled, and shaded lilac; F. white, traced lilac at the base, or claw; a beautiful variety. 2 ft. 15 cts.

Albino. S. pale lavender; F. tipped with royal purple. 18 in. 15 cts.

Aurea. A beautiful species from the Himalayas, with handsome, large flowers of the deepest golden yellow. 4 ft. June and July. 35 cts. each; \$3.50 doz.

Black Knight (Syn. Black Price). A rare and beautiful new iris. S. intense, deep violet-blue; F. velvety purple, exceedingly rich and striking. Very late bloomer; scarce; dis-

tinct from the variety Kochii, which is being sold under the name Black Prince. 75 cts.

Canary Bird. S. bright yellow; F. deeper yellow, with orange beard. 9 in. 25 cts.

Celeste. Pale azure-blue. Very delicate. 30 in. 25 cts.

Cherion. 30 in. Medium. S. smoky lavender; F. violet, veined white. 15 cts.

Coerulea. Very dwarf, admirably adapted for the rockery, uniform shade of blue. 15 cts.

Darius. 18 in. Medium. S. primrose yellow; F. lilac with primrose margin. 15 cts.

Delicata. S. pale lavender; F. white, delicately traced and tipped lavender. 15 cts.

Dove. 30 in. Medium. S. lavender buff; F. darker. 15 cts.

Edith. 22 in. Medium. S. porcelain blue; F. velvety blue veined white. 15 cts.

Elegans (Vidonne). 30 in. Medium. S. nearly white, dashed and splashed with violet; F. violet, veined white. 25 cts.

Fairy. 36 in. Medium. S. nearly white; F. white charmingly veined. Odor of peach blossoms. 25c.

Florentina Alba (Silver King). 30 in. Very early. S. white; F. porcelain changing to white. A splendid fragrant flower. 15 cts.

Florentina Blue. Very pale blue. 15 cts.

Fragrantissima. Medium. The most fragrant iris we know. S. clouded old gold; F. dark purple rose. 25 cts.

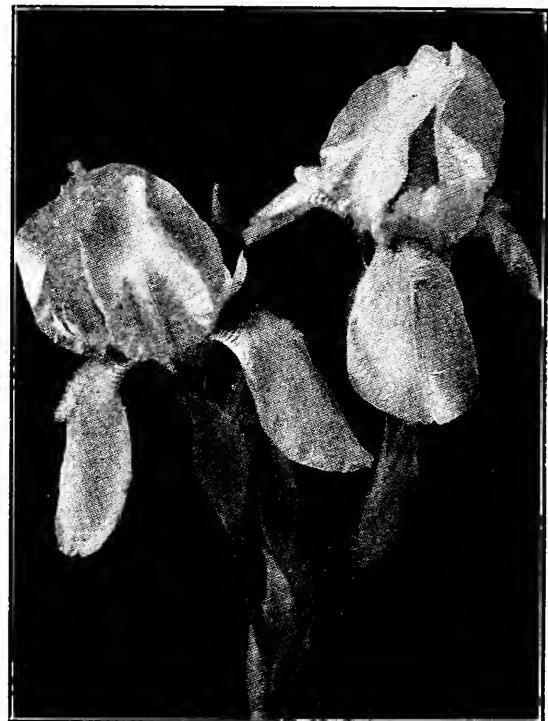

Graccus. 24 in. Medium. Delightfully fragrant. One of the most winsome flowers. S. light yellow; F. yellow, charmingly veined with purple. 20 cts.

Her Majesty. 32 in. Late. S. soft rose; F. red, deeply veined. Extra fine. 25 cts.

Iris King. S. Clear lemon-yellow; F. rich maroon, bordered yellow. A beautiful new iris obtained by crossing Maori King with *I. Pallida*, combining the brilliant colors of the former with the large flowers and tall growth of the latter. 50 cts.

Iris King

Madame Chereau

IRIS—Continued

Juniata. New. S. soft blue; F. violet-purple. A strong-growing species from the East. Allied to Trojana. Massive flowers on stems 3 to 5 feet high. \$1.00.

Khedive. Beautiful soft lavender with distinct orange beard. 33 in., 15 cts.

Kochi. 24 in. Medium. Rich purple. 15 cts.

Lady Jane. 30 in. Medium. S., bronze rose. F., madder red, veined white. 20 cts.

Madam Chereau. White, elegantly frilled with border of pale blue. 15 cts.

Madame Pacquitté. Bright rosy claret; very handsome; early. 42 in., 25 cts.

Marmorata. S. Sulphur and fawn; F. crimson-purple, margined lavender. 22 in., 15 cts.

Monhassan. Lively yellow standards; F. brown, with a wide yellow border. 25 cts.

Mandraliscae. Rich lavender-purple; large and handsome; very early. 25 cts.

Nymph. 30 in. Medium. S., pale lavender. F., purple, reticulated white. 15 cts.

Odoratissimi. Beautiful shade of clear blue, faintly scented. 15 cts.

Pallida Foliis Argentea Variegata. New. Foliage beautifully variegated silvery white; flowers blue. 75 cts.

Pallida Dalmatica (Syn. Princess Beatrice). S. Fine lavender; F., clear deep lavender; flowers very large, extra fine. A superb variety for planting in masses and for cut-flowers. The true variety is very scarce. Albert Victor or Speciosa being usually sold for Dalmatica. 40 in., 35 cts.

Pallida Foliis Variegata. New. Flowers soft pale blue; foliage beautifully variegated gold and silver. 50 cts.

Pallida Speciosa (Syn. Great Purple or Turkey Flag). S. dark lavender shaded lighter; F., shaded light purple. 42 in., 25 cts.

Pallida Plumeri. S., coppery rose; F., velvety claret; tall, free bloomer. 25 cts.

Purple King. Full purple; very effective. 2 ft., 25 cts.

Queen of May. A lovely soft rose-lilac, almost pink; beautiful. 15 cts.

Shakespeare. S., bronzy yellow; F., maroon reticulated yellow. 26 in., 15 cts.

Siberian Blue. Probably the finest blue flower on earth. The stems are long and as the flowers last a long time in water, they are excellent for cutting. 15 cts.

F.G.C.

Pallida Delmatica

Japan Iris

Snow Queen. Large, ivory-white flowers. A beautiful new variety found in Japan by Mr. Barr. 25 cts.

Stenophylla. S., pale blue, indistinct stripes; F., darker. Tall. 15 cts.

Japan Iris (Iris Kaempferi). A splendid plant of easy growth; delights in constant cool moist soil. In its native home it flourishes in swamps succeeding admirably by the side of streams, lakes and ponds. Few people are aware of the beauty of this class of Iris which commences blooming about the middle of June and continues for five or six weeks. Many of the flowers measure 8 to 10 inches in diameter, the various shades of color are exquisite. Mixed sorts including rose, deep red, blue, white, etc. 25 cts.; \$2.50 doz.; in colors, 15 cts.

HARDY LILIES

With the exception of Lily Candidum, which seems to prefer an open position, most lilies thrive best when planted in a semi-shaded position where the ground can be kept cool and moist by the protection of shrubs and a carpet of lawn grass. Planted among shallow rooting perennials they find a congenial setting both as to soil and shelter. The bulbs should be planted from 6 to 8 inches deep with a little sand or moss under the base of each bulb. Candidum Superbum and Tigrinum we can supply early from home-grown stock. The varieties coming from Japan we can seldom supply until the end of November, but can ship immediately upon their arrival here.

Lilium Canadense. Wild Yellow Lily. Flowers vary in color, red and yellow. Grows 2 to 5 feet high, and is a most hardy species. Nice to plant among shrubbery and does quite well in shade. June and July. 15 cts.; \$1.50 doz.

Lilium Longiflorum. Pure white, trumpet-shaped flowers in June or July; hardy. Can also be grown as a pot plant. Bulbs, 25c; \$2.50 doz.

Lilium Speciosum Melpomene. Words cannot describe the beauty of this variety. Frosted white, spotted, clouded and bordered, with pinkish crimson. Petals deeply recurved and widely bordered. 35 cts. \$3.50 doz.

Lilium Speciosum Magnificum. Rich crimson. The finest colored of all Speciosums. 25 cts.; \$2.50 doz.

Auratum (Gold Banded Lily). Very large, white spotted crimson with broad yellow banks. 20 cts.

Candidum. One of the best hardy lilies. Flowers pure white, large and of delightful fragrance. Blooms in June. 15 cts.

Elegans. Perfectly hardy and will succeed in most any position. Flowers large and showy; bright red, flushed orange. 1½ feet high. Blooms in June and July. 15 cts.

Lily of the Valley. Bearing slender stems set with tiny white bells, delightfully fragrant, do well in shady situations. Flower each season without any attention. 6 cts.; 3 for 15 cts.; 40 cts. doz.

HARDY LILIES—Continued

Speciosum Rubrum. White, beautifully spotted with red; very fragrant; flowers in August. This is one of the most useful lilies; perfectly hardy and flowering well under all conditions. 20 cts.

Speciosum Album. Same as the above, but pure white. 25 cts.

Superbum. Flowers bright orange red; thickly spotted with purple. Remarkable for immense height (often 8 feet) and profusion of bloom; a strong plant, bearing from 20 to 30 flowers. Blooms in July. 15 cts.

Tenuifolium. Vivid scarlet with reflexed petals. Very easy culture. 15 cts.

Tigrinum Splendens. The well known "Tiger Lily," grows from 4 to 5 feet high and bears an immense number of bright orange flowers spotted with black. Blooms in August. 10 cts.

Tigrinum. fl. pl. A variety of the Tiger Lily with double flowers. 15 cts.

Wallacei. Flowers rich, clear buff, spotted black, late bloomer. 15 cts.

LOBELIA. Cardinal Flower

Cardinalis. Rich fiery cardinal flowers; strong plants, often producing 10 to 18 spikes, 24 to 30 inches long. 15 cts.

Syphilitica. A choice selection of our native Lobelia, producing dense spikes of rich blue flowers. 15 cts.

LUPINUS. Lupine

Most beautiful hardy border plants, producing tufts of soft green foliage, from which arise in continuous succession the stately spikes of bloom.

Albus. Large, pure white spikes. 25 cts.

Polyphyllus. 3 ft. Stately spikes of blue flowers all summer. 15 cts.

Roseus. 4 ft. Light and dark rose flowers on long spikes. 25 cts.

LYCHNIS. Burning Star

Chaledonia (Jerusalem Cross). 2½ ft. Brilliant scarlet in dense, flat heads. 15 cts.

Rose Campion. Handsome hardy perennial plants of easy culture for massing in beds and borders; bloom the first year if sown very early. 15 cts.

MATRICARIA. Feverfew

Little Gem. 1½ to 2 ft. A most useful summer cutting flower with very double white flowers from June to October. 15 cts.

MYOSOTIS. Forget-Me-Not

It flourishes best in a moist, shady situation. Bright blue. 15 cts.

PENSTEMON

Most useful showy perennial either for border or clumps.

Barbatus Torreyei. 3 to 4 ft. June to August. Spikes of brilliant scarlet flowers, 15 cts.

Digitalis. 2 to 3 ft. Large spikes of pure white flowers with purple throats. Blooms during June and July. 15 cts.

PHLOX

Among hardy perennial plants no class is of more importance than the phloxes, succeeding in almost any soil and position, and flowering through a long season; and while they continue in good condition and flower freely for many seasons without any attention, yet they respond quickly to and are improved by liberal cultivation. They bloom from July to late in the autumn and produce most brilliant effects when massed. The varieties we offer we consider the choicest that can be had. We call special attention to some of the newest varieties which we have included in our list this year.

Africa. Brilliant carmine-purple. Dark blood-red center. 15 cts.

Athis. Clear salmon. Some claim this to be the showiest variety in cultivation. 15 cts.

Boule de Feu. Dwarf; brilliant cherry-red. 15 cts.

Champ's Elysee. A bright rosy magenta; very effective. 15 cts.

Coquelicot. The most brilliant orange-scarlet. 15 cts.

Comte Ungerer Sternberg. White ground, overlaid carmine-rose, dark carmine eye; very large flowers, extra fine. 25 cts.

Eclaireur. Clear rosy-red, with lighter large center; large florets and a magnificent bedder. 15 cts.

Elizabeth Campbell. New. Very large spikes, with flowers of a quite new color, light salmon, changing to pink in the center. Extra, 20 cts.

Europa. A new variety. A very large, perfectly formed white flower with crimson-carmine eye; fine shaped trusses. 15 cts.

Lily of the Valley

Miss Lingard

good condition and flower freely for many seasons without any attention, yet they respond quickly to and are improved by liberal cultivation. They bloom from July to late in the autumn and produce most brilliant effects when massed. The varieties we offer we consider the choicest that can be had. We call special attention to some of the newest varieties which we have included in our list this year.

Africa. Brilliant carmine-purple. Dark blood-red center. 15 cts.

Athis. Clear salmon. Some claim this to be the showiest variety in cultivation. 15 cts.

Boule de Feu. Dwarf; brilliant cherry-red. 15 cts.

Champ's Elysee. A bright rosy magenta; very effective. 15 cts.

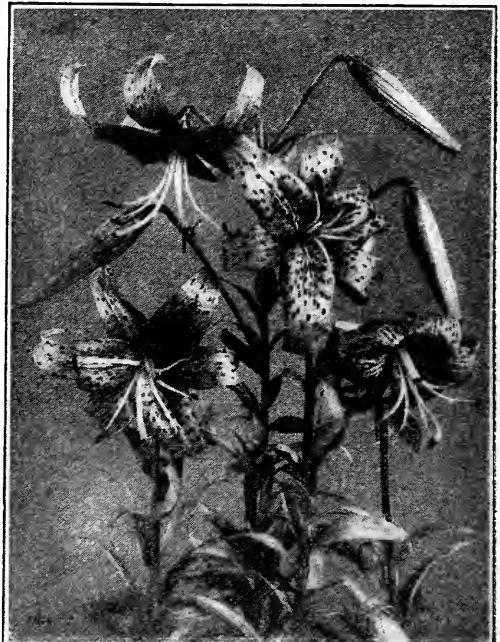

Coquelicot. The most brilliant orange-scarlet. 15 cts.

Comte Ungerer Sternberg. White ground, overlaid carmine-rose, dark carmine eye; very large flowers, extra fine. 25 cts.

Eclaireur. Clear rosy-red, with lighter large center; large florets and a magnificent bedder. 15 cts.

Elizabeth Campbell. New. Very large spikes, with flowers of a quite new color, light salmon, changing to pink in the center. Extra, 20 cts.

Europa. A new variety. A very large, perfectly formed white flower with crimson-carmine eye; fine shaped trusses. 15 cts.

Tiger Lily

PHLOX—Continued

F. G. Von Lassburg. Very large; fine, white. One of the best. 25 cts.

Gerbaux. Large white with red eye. 20 cts.

Gruppenkoenigin. Pure flesh colored rose with a carmine eye. 15 cts.

Gustave Nadaud. Gray-mauve, deepening toward the center, yellow eye. 25 cts.

Jeanne d'Arc. Syn. Pearl. A very fine late white. 15 cts.

Le Mahdi. Metallic, plush violet; fine large trusses; individual flowers, very large. 25 cts.

Loki (New). Salmon-pink, dark carmine eye. 25 cts.

Madame Neera. One of the finest; large, circular flower and fine truss, petal white, bordered lilac. 25 cts.

Miss Lingard. Pearly white flower, with a very faint, pink eye; very remarkable bloomer, producing two or three crops of flowers during the season. 15 cts.

Pantheon. Cerise-salmon, white center; large, branching spikes. 15 cts.

Reichsgraf v. Hochberg. Large dark red. 20 cts.

Richard Wallace. Pure white, with violet-rose eye; large flowers in immense panicles. Too much cannot be said of this variety. 15 cts.

Rhynstrom. Beautiful color not unlike that of Paul Neyron Rose. A good strong grower and a very free-flowering variety. 25 cts.

Selma. Tender soft pink with a large crimson center. A lovely new variety of perfect form. 15 cts.

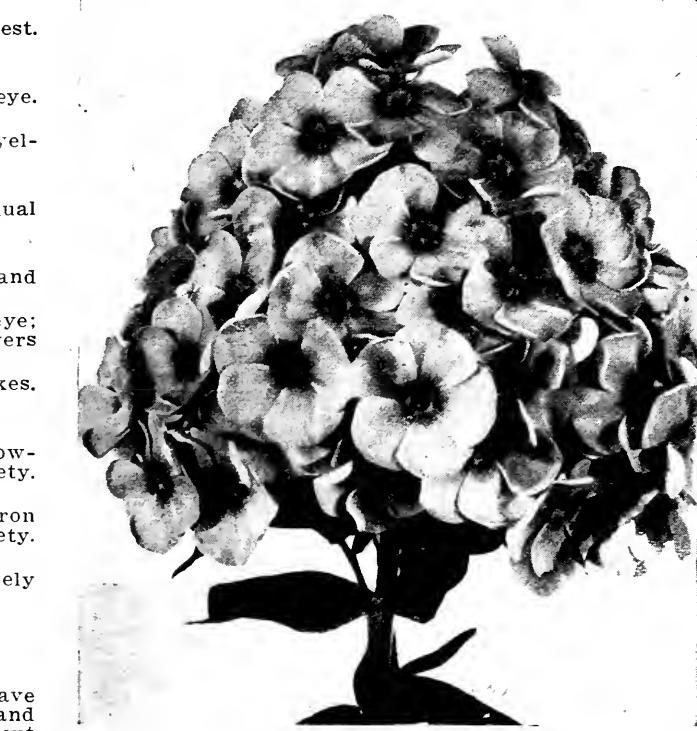

Snowdon. Pure snow-white. 20 cts.

POPPY. Oriental

Two to 2½ feet. For gorgeous coloring the Oriental Poppies have few rivals among the hardy plants. The flowers are immense and often measure 6 inches or more across. They are also grand cut in bud state for vases. We offer a fine collection in various colors. We have a very fine strain grown from the choicest seed. 25 cts.

PAEONIES

Paeonies, especially the modern introductions, are probably the most valuable and beloved of all perennial plants. Planted in sun or semi-shade, in single clumps or long beds or bordering lawns or shrub rows; they give a grand display of large fragrant blossoms during June, followed by their exquisite foliage, which is very ornamental during the sum-

Coquelicot

mer months. They are most effective for home and table decorations, and last longer in water than any other perennial. We have endeavored to throw out of our list all the poorer, cheaper sorts, which we advise not buying as they take as much care and space as the better kinds. There is nothing that gives so grand a display of bloom about Decoration Day, as the paeonies. Every year we sell them by the thousands to the local florists and people of this vicinity for decoration purposes. This year we have added a great many to the sorts we had, and we are sure you will find many varieties among them, which you will desire. The prices on some may seem a little high but these sorts are very scarce, and we are furnishing you good, strong plants. We absolutely guarantee every root we send out to be true to name. If you desire paeonies in large quantities will be glad to give you special quotations.

Achille. Large, medium compact, rose type; shell-pink, fading to lilac-white. Erect, tall, free bloomer. Early mid-season. 50 cts.

Adelaide Delache. Large soft pink Rose. 50 cts.

Albatre. Very large, compact, globular, rose type. Milk white, shaded ivory, wide center petals tinged lilac, edged with a minute line of carmine. Very strong, vigorous, tall grower, very free bloomer. Mid-season. Unsurpassed by any other white paeony on our list. \$1.75.

Alexandriana. Very large, full, double rose type. Light violet-rose. Fragrant. Very strong, upright grower, and free bloomer. Early. 50 cts.

Andre Lauries. Very large, very compact, globular, rose type. Dark Tyrian rose, shading deeper in center, with red reflex and white splashes, occasionally splashed green. Medium tall. Very late. Extra good. \$1.00 each.

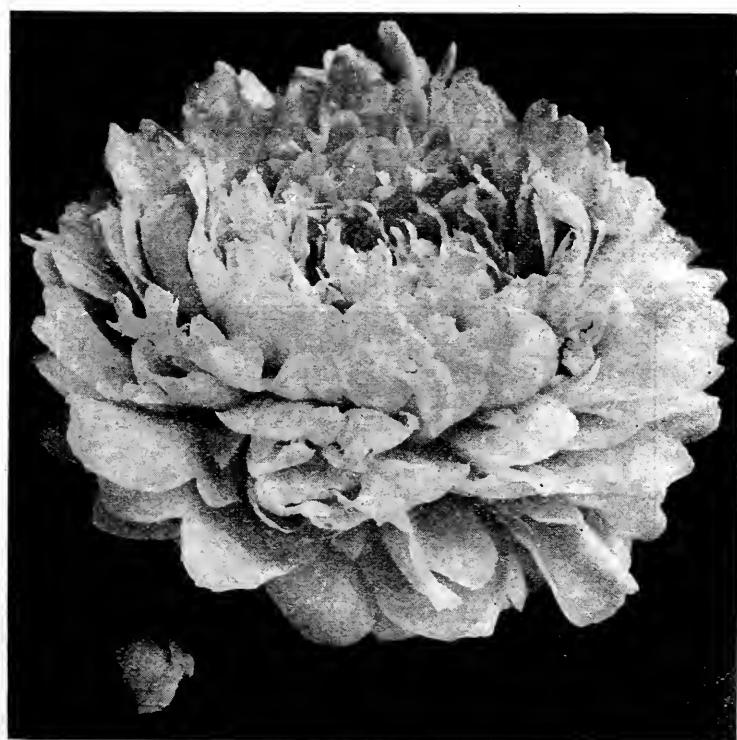

Anemoneaeflora Rubra. Medium size, anemone like bloom. Deep brilliant Tyrian rose, carpels dark crimson. Strong, tall, free bloomer. Mid-season. 50 cts.

Asa Gray. Pale lilac sprinkled with minute dots of deeper lilac. A very distinct variety. \$1.00.

Boule De Neige. Very large, medium, globular, compact, semi-rose type. Milk white, guards and center prominently flecked crimson. Tall erect, free bloomer; extra good. Early mid-season. 75 cts.

Candidissima. Full, double, rose type. Pure white, with sulphur; carpelodes in center tipped green. Tall, vigorous; free bloomer. Early. 50 cts.

Claire Dubois. Very large, globular, rose type. Uniform color, clear deep violet rose, tipped silvery white. Erect, tall strong grower. Late. Extra good. \$1.50.

Festiva Maxima

PAEONIES—Continued

Couronne d'Or. Large flat semi-rose type; pure white with rings of yellow stamens around the tuft of center petals tipped with carmine; medium tall, strong grower and free bloomer; late; one of the best. 50 cts.

Due de Cazes. Medium size, loose crown. Dark pink (Solferino-red), silvery collar. Fragrant. Weak, spreading habit, free bloomer. Early. 50 cts.

Due de Wellington. Large globular shape with white guards, sulphur center. Medium height and vigorous grower. 50 cts.

Due Esse Nemours. Pure white crown with sulphur white color, very fragrant, vigorous grower, very free bloomer. Early, comes a day or two later than *Festiva Maxima*. Has a high commercial value. 35 cts.

Edulis Superba. Large flat crown, bright mauve-pink color mixed with narrow circles of lilac around the collar; fragrant. Early, strong, upright, free bloomer. The very best for Decoration Day. 40 cts.

Edouard Andre. Medium loose, semi-double. Dark carmine-violet, petals widely notched. Dwarf habit. Mid-season. \$1.00 each.

Eugenie Verdier. Large, medium compact, flat, semi-rose type. Pale hydrangea-pink, collar lighter, center deeper, flecked crimson. Tall, medium, erect, free bloomer. Mid-season. Extra fine variety. \$1.00.

Felix Crousse. Large globular brilliant red flowers. A strong, vigorous grower of medium height. One of the best varieties. 75 cts.

Festiva Maxima. This is not only the finest white in existence, but may be regarded as the queen of all the paeonies.

Golden Harvest

La Tendresse. Large, compact, flat rose type. Uniform milk-white, guards slightly splashed and center flecked with crimson. Tall, strong, very free bloomer. Early. Extra good. \$2.00.

Louis Van Houtte. Medium size, semi-rose type. Deep carmine-rose, tipped silver, with fiery reflex. Very brilliant coloring. Fragrant. Medium height and habit. 35 cts.

Madame Calot. Very large, rose type. Pale Hydrangea-pink, center shaded darker; collar tinted silver. Tall, strong grower, free bloomer. Early 50 cts.

Marie Crousse. Large, globular, medium to loose bomb. Uniform pale lilac-rose. Tall, erect, strong grower and free bloomer. Mid-season. Extra good. \$3.00.

Marechal Valliant. This is the old *Grandiflora Rubra*. A large, light red-colored flower. 35 cts.

Magnifica. Large, compact, globular, rose type. Hydrangea-pink, erect, dwarf habit. Late. Good. \$1.00.

Marie Lemoine. Large, very compact, rose type. Pure white, with cream-white center, occasional carmine tip. Fragrant. Medium height, extra strong stem. Very late. Extra good commercial variety. 75 cts.

Madame Emile Lemoine. Large, globular, compact, semi-rose type. Milk-white. Medium height, spreading habit, medium bloomer. Mid-season. Extra good. \$2.00.

Marie. Medium size, flat, compact, semi-rose type. Lilac-white, fading to milk-white, narrow petals around the collar. Very tall, free bloomer. Very late. 75 cts.

Madame Vilmorin. Medium size, medium globular, rose type. Uniform rose white, shading to amber at base of petals, center splashed rose. Habit medium; free bloomer. Late. 50 cts.

A Corner of Our Paeony Field

ies. A grand cut flower variety, coming in bloom usually for Decoration Day. 50 cts.

Madame Forel. Large, very compact, rose type. Violet-rose, with a silvery-tipped center. Medium tall, spreading habit. Late. \$1.00.

Golden Harvest. A most striking variety, producing large, tri-colored blooms. The guard petals are blush pink with creamy white center. It combines cream, gold, white, pink, salmon, peach and apricot. The total color effect of the flower being creamy-pink; strong, delicate fragrance. 50 cts.

Glory of Boskoop. Very large, rose type. Very fine creamy white, collar tinted silver. Tall, strong grower, free bloomer. Early. 75 cts.

Grandiflora Alba. Early standard sort. Opens straw color, fading to pure white. Tuft in center sometimes marked with carmine. Often sold for *Festiva Maxima*. 30 cts.

Grandiflora Rosea. Very fine, fragrant rose pink. Of the hardest and independent of late frosts. 30 cts.

Humei. Immense late cinnamon scented flower of varnished pink. 30 cts.

Jeanne d'Arc. Large globular bomb-shaped flowers; guards pale lilac-rose, collar cream-white shaded with sulphur. Mid-season. 50 cts.

La Sublime. A very striking flower of deep, rich crimson color. A sure bloomer. 40 cts.

Lamartine (Lemoine Variety). Large, compact, globular, rose type. Carmine-rose petals bordered silvery white. Tall, erect, strong grower. Late. Extra good. A very beautiful variety. \$7.50 each.

Lamartine (Calot Variety). Very large, rose type. Pale lilac-rose. Center shaded darker, guards and collar fading to rose-white. Agreeable, spicy fragrance, distinct from any other. Tall, free bloomer. Mid-season. Very attractive. Must not be confused with the new variety of Lemoine's by the same name. \$1.00.

L'Esperence. Very early; a great favorite; rosy pink; free flowering. 30 cts.

L'Esperence

PAEONIES—Continued

Monsieur Dupont. Semi-rose type, mid-season. Very large, well built, cup-shaped bloom, ivory-white; center petals bordered with a tracing of lively carmine and lit up with golden stamens at base of petals. A truly royal flower. 75 cts.

Monsieur Krelage. Large, compact semi-rose type; dark salferino red with silvery tips. Free bloomer. 75 cts.

Monsieur Jules Elie. Very large, compact, high crown, pale lilac-rose collar shading amber; yellow at the base. Very fragrant. Strong grower, early flowering, extra fine variety. \$1.00.

Officinalis Rosea Pallida Plena. Large, full bloom; glossy, soft pink, shaded chamois, changing to pure white. \$1.00.

Officinalis Rosea Superba. Very full; soft pink. 75 cts.

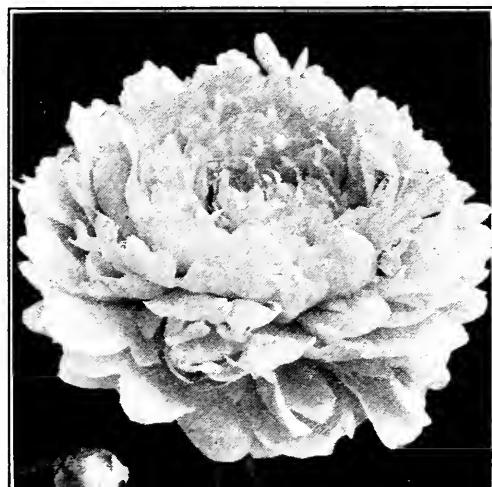

Officinalis Rubra Plena. Large globular blooms; brilliant crimson. This is the early flowering red paeony so common to the old-time gardens; much used on Decoration Day. 75 cts.

Plenissima Rosea Superba. Medium size, loose, pale lilac-rose, center tipped with silver, flecked crimson and green. Fragrant. Medium habit. Mid-season. 50 cts.

Prince Imperial. Brilliant purplish scarlet; one of the good medium priced reds. 50 cts.

President Roosevelt. Very large, robust flowering. Dark red; one of the finest of its color. 50 cts.

Queen Victoria. Milk-white guards tipped flesh color, center cream-white with crimson spots. A strong, free bloomer. A very distinct variety. 50 cts.

Solfatare

Rose D'Amour. Large, medium compact, globular, bomb type. Hydrangea-pink. Tall, medium habit. Early mid-season. 75 cts.

Solfatare. Milk-white guards; with sulphur colored center, fading to sulphur-white. The nearest approach to yellow that has been reached in the work on the paeony. A decided acquisition to your collection of peonies. This variety is very distinct and desirable. 75 cts.

Splendida. Very large, globular, cup-shaped, rose type. Uniform, light violaceous pink. Very strong, upright habit, very free bloomer. Beautiful; delightfully fragrant. \$2.00.

Tenuifolia Fl. Pl. Dazzling crimson-red; double flowers; foliage finely cut. 75 cts.

Victoria Tricolor. Large, purplish rose, center straw, tipped white. Very brilliant and effective; strong grower. 35 cts.

RUDBECKIA. Cone Flower

Somewhat resembling the Perennial Sunflower, but having a more graceful and refined flower. It is a valuable ornamental late summer and autumn flowering plant, and very valuable for cutting.

Lacinata. fl. pl. Golden Glow. A well known popular plant of strong, robust growth, attaining a height of from 6 to 8 feet and producing masses of double golden yellow cactus dahlia-like flowers from July to September. An effective sort. 15 cts; large clumps, 25 cts.

Newmannii. One of the finest of all the flowering perennials, bearing large flowers; bright orange petals, surrounding a large, black cone. Very showy. 15 cts.

Purpurea (Giant Purple Cone Flower). A most interesting, hardy perennial, large flowers about 4 inches across with remarkably large cone-shaped center of brown; thick set with golden tips of spireal lines. Makes a fine cut flower. Hardy as an oak. 15 cts.

SOLIDAGO. Golden Rod

One of our most common native plants which we have brought into our nursery and find it makes a very fine plant for a hardy border. 15 cts.

SWEET WILLIAM. See Dianthus Barbatus

TRITOMA. Torch Lily, or Red Hot Poker

A very handsome, showy border plant. Flowers borne in compact form on stout 3 to 4 foot stems, having the appearance at a distance of orange and colored spear heads. Requires protection during winter unless in very sheltered position. A good plan is to take up the roots and store them in the basement during the winter. This flower is a rare beauty and will greatly repay you for what little trouble it may cause. 25 cts.; heavy, 45 cts.

STOKESIA CYANEA. Stokes' Aster, or Corn Flower Aster

A beautiful native plant, growing from 18 to 24 inches, bearing from early June to September. It's handsome lavender blue cornflower-like blossoms, which measure from 4 to 5 inches across. It is of the easiest culture, succeeding in any open, sunny position. 15 cts.

Alba. A white variety of the above, 15 cts.

YUCCA FILAMENTOSA. Adam's Needle

Among the hardy ornamental foliage plants this may be classed at the head of the list. Broad, sword-like foliage from 5 to 6 feet tall; branched spikes of large, fragrant, drooping creamy-white flowers during June and July makes it an effective plant for all position. 25 cts.; large clumps, 50 cts. and 75 cts.

Rudbeckia. Golden Glow

Greenhouse Department

Prices on all Greenhouse stock postpaid except where noted.

AIR POTATOES

A brand new climbing vine of recent introduction. It has large, heart-shaped leaves, they are so glossy that they look as if varnished, and grow at a rapid rate. They produce a quantity of round tubers all up the vine from the size of birds' eggs to a goose egg. It belongs to the same family as the old cinnamon vine, but is much more handsome and greatly superior to it in every way. The tubers can be stored over the winter like potatoes, and planted in the spring. 15 cts. each; 3 for 40 cts.

AGERATUM

Stella Gurney. A fine dwarf blue, fine for bedding and borders. 10 cts. each; \$1.00 per doz.

Mont Blanc. Large flowered white. 10 cts. each; \$1.00 per doz.

ALTERNANTHERA

Bright foliaged plants of dwarf habit, much used for carpet bedding.

Aurea Nana. Bright yellow and green foliage. 8 cts. each; 70 cts per doz.; \$5.00 per 100.

Brilliantissima. Dwarf growing, bright red foliage. 8 cts. each; 70 cts. per doz.; \$5.00 per 100.

Versicolor. Olive, crimson and chocolate. 8 cts each; 70 cts. per doz.; \$5.00 per 100.

ARAUCARIA

Norfolk Island Pine. 12 in. high, \$1.00 each; larger, \$1.50 and \$2.00. Shipped by express only.

CANNAS

Allemania. Scarlet orange bordered with yellow. 6 ft.

Alphonse Bouvier. Richest red; showy variety. 5 ft.

Austria. Fine dwarf, pure canary yellow, extra large. 3 ft.

Beaute Pointevine. A rich glowing crimson. 2½ ft.

Burbank. Immense flowers of a rich yellow. 3½ ft.

Egendale. Bronze foliage, flowers deep red. 4½ ft.

Elizabeth Hoss. New spotted canna on the style of Florence Vaughan. Height, 3½ ft., foliage dark green, thick and leathery. The flowers are extra large, of good substance and of a deep yellow, heavily dotted with crimson spots. A strong robust grower and very free flowering.

Fire Bird. This is by all means the very best red-flowered green-leaved Canna today. The flowers are borne in immense trusses, on strong stalks well above the leaves. They are of splendid form, round and shapely. The petals measure and sometimes exceed 2½ inches across, and the color is a clear glistening scarlet without any streaks, spots or blotches. We have seen and tested many varieties during the years we have devoted to their culture and have never seen one that can approach it. Customers who have grown this Canna concede its worthiness to rank with the Grand Bronze King Humbert. Our rapid propagation the past two years now brings it within the reach of all. Strong plants. 35 cts. each; 3 for \$1.00; \$3.50 doz.; \$25.00 100.

Florence Vaughan. Pure yellow dotted with red. 5 ft.

Frederic Benary. Currant with orange throat and yellow edge.

Graf. Waldersee. 4 ft., foliage rich, bronzy red. Flowers very large and of a rich orange red color. The flower spikes are large and full, carried well above the foliage. An early and profuse bloomer.

King Humbert. Giant flowered; orange scarlet; bronze leaf. 4 ft.

Mme. Berat. Large flower of soft rosy-carmine, nearly pink. 6 ft.

Madame Crozy. Crimson scarlet with yellow border. 3½ ft.

Papa Nardy. New French Canna. Height 4 to 5 ft., green foliage. A strong grower and free-flowering habit; large rounding flowers of a beautiful purplish-crimson. Flower spikes large and numerous and are carried well above the foliage. A great show when massed on account of its attractive color and free flowering habit. It is without doubt one of the best Cannas of today.

Partenope. Large flowers of a reddish salmon color, fine. 6 ft.

Pennsylvania. Deep scarlet one of the best. 5 ft.

Queen Charlotte. Rich crimson with band of yellow. 4 ft.

Sou de Antonie Crozy. Rich crimson scarlet, with wide golden border on each petal. 3 ft.

BEGONIAS

Argentea Guttata. A very handsome variety, foliage oblong in form, purplish bronze in color, handsomely marked with silvery gray spots and dashes. The flowers are borne in large clusters, and of pure, waxy whiteness. 15 cts each; large, 30 cts. each.

Gracilis Luminosa. Magnificent new specimen; exceptionally sturdy and vigorous; unquestionably one of the choicest bedding sorts. Flowers are large, perfect, plentiful and never out of bloom. Color, the brightest scarlet. 15 cts. each; large size, 30 cts. each.

Sandersonii (Coral Begonia). Flowers bright scarlet. A profuse bloomer almost always in bloom summer and winter. Excellent for vases, window boxes, etc. 15 cts. each; large size, 30 cts. each.

Thurstonii. A beautiful, stately plant; glossy foliage. Under side of leaves rich, purplish red; veinings are very prominent. Upper side, bronzy green, shaded with crimson and olive, with peculiar, glossy metallic lustre over all. Flowers beautiful shell-pink. 15 cts. each; large size, 30 cts. each.

Peperomia Muscosa (Silver Leaved Begonia). Here is a most beautiful plant for pot culture, easy to grow and thrives anywhere; leaves deep olive-green, distinctly marked with silvery-white. Thick and waxy-like; leaves distinctly variegated white and green, and have the appearance of being powdered with frosted silver. 25 cts.

Allemania

PRICES OF ALL CANNAS

Dormant Roots, 10 cts. each; 90 cts. per doz.; postpaid. By Express, per doz., 75 cts.; per 100, \$6.00.

We cannot supply dormant roots after April 1st.

Started plants ready May 10, 15 cts. each; \$1.25 per doz., postpaid. By express, per doz., \$1.00; per 100, \$7.50.

CALADIUM ESCULENTUM. Elephant's Ear

Fine tropical plant, bearing immense leaves. Start as directed for cannas, when growing you cannot make the soil too rich or keep it too wet. 15 cts. each; 2 for 25 cts.

CARNATIONS. The Divine Flower

Price, except Nebraska, 12 cts. each; any 3 of your selection, 30 cts.

Enchantress (The Great \$10,000 Beauty). Is pronounced superior to the Mrs. Thomas W. Lawson. The flowers are $3\frac{1}{2}$ to 4 inches across when well grown. The color is a superb shade of rosy blush-pink.

May Day. This is the largest Carnation ever offered. It is a wonderfully free bloomer, considering the monster size the flowers attain. White, overlaid with pink, reminding one of the beautiful tints seen in Azaleas.

Nebraska. This grand flower has caused a sensation among Carnation growers. It is the best red Carnation in existence. Monster flowers of the best and most lasting shade of beautiful, bright, crimson-scarlet. Every flower is perfect, born on long, strong stems. It is the finest bloomer of any of the carnations. 25 cts. each; 3 for 65 cts.

Victory. The flowers measure $3\frac{1}{2}$ inches when well grown. Long, strong stems, 2 to 3 ft. A healthy, vigorous grower. Glowing scarlet-crimson, intense and fiery with its rich ox-blood shadings.

White Enchantress. A running mate for the Enchantress, its color is a clear white, flowers like Enchantress are very large, borne on a long, stiff stem.

White Wonder. The young plants produce flowers quicker than any other white carnation, are of good size and lasting. The queen of its class.

CINNAMON VINE

A beautiful hardy climbing vine, which will quickly surround an arbor, window or veranda with a profusion of vines covered with handsome glossy, heart-shaped leaves, bearing great numbers of delicate white blossoms, which emit a delicious cinnamon fragrance. We know of no vine that is more satisfactory, being perfectly hardy, thriving everywhere, and when once planted will grow for many years and be a source of constant delight. The vines quickly make long shoots 25 feet or more in length, and can be used for all purposes where a beautiful climbing vine is needed. Ornamental climbers are Nature's drapery, and few, if any, other plants can compare with the Cinnamon twining and climbing in its own native graceful beauty. It should be planted by everyone. Plant the bulbs about one inch deep in rich soil, and with the approach of winter cover lightly with straw and leaves to prevent freezing. 3 for 15 cts.; 6 for 25 cts.

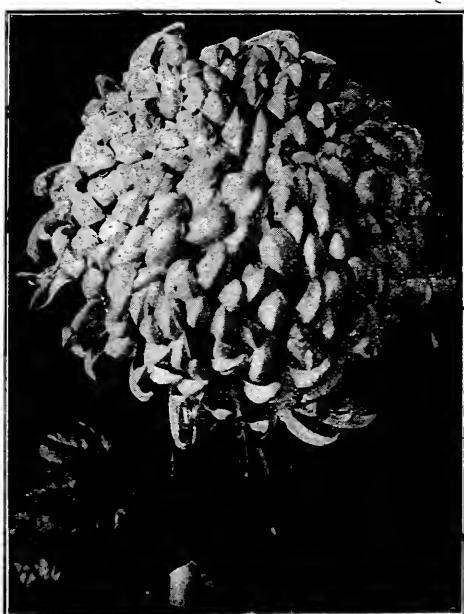

COLEUS

General Assortment. We have a collection of 25 kinds of the most distinct sorts. Leave the selection of varieties to us, as it is hard to describe the various tints. These are all good betters, standing in the hot sun without losing their color. 5 cts. each; any 6 for 25c; \$3.75 per 100.

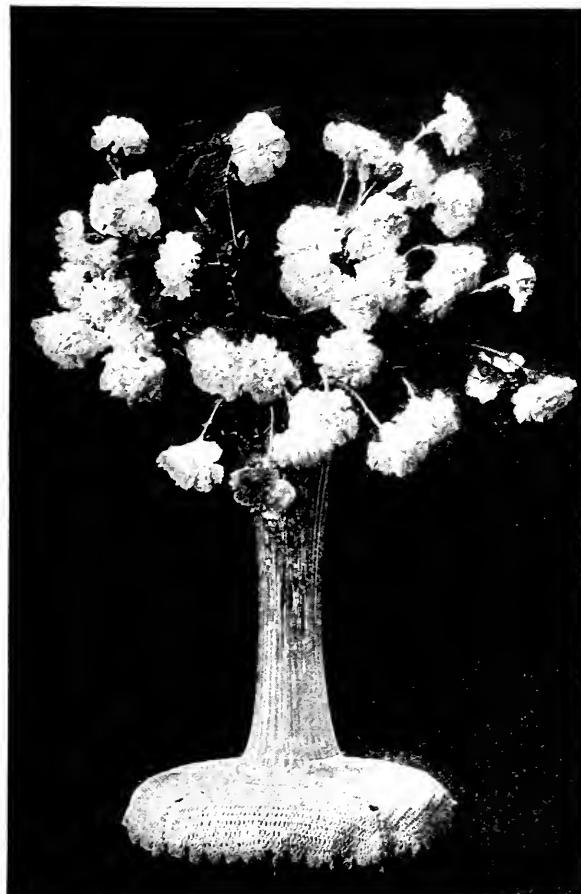

Coleus Christmas Gem. Has broad leaves that often measure eight inches across, beautifully marked with yellow and brightest crimson. The prettiest foliage plant we know. The finest Coleus ever introduced. 20 cts. each; \$2.00 per doz.

CROTONS

Splendid decorative plants for conservatory use in carpet bedding. Fine selection of varieties. 30 cts. and 50 cts. each.

Chrysanthemum

Carnations

CHRYSANTHEMUMS

Can be supplied up to about June 1.

Of the easiest growth, they quickly make large bushes, either in open ground or in pots. We offer the best kinds known. At the low prices for which we offer them every one should have Chrysanthemums. They are the people's flowers.

Black Hawk. An extra fine deep, crimson variety of the largest size: none finer of its color. 15 cts. each.

Golden Glow. Bright yellow of velvety finish. Flower $5\frac{1}{2}$ inches in diameter. 12 cts. each.

Golden Wedding. Nothing finer among yellows; shines like burnished gold. The standard for measuring yellows; of mammoth size. 15 cts. each.

John Shrimpton. A rich red that has many admirers; of the largest size. Extra. 15 cts. each.

Lavender Queen. A lovely shade of pinkish lilac. Very desirable. 15 cts. each.

Percy Plumridge. The grand variety has literally leaped into popularity. Flowers are so large as to startle you. The color shades from a few rows of lavender pearl to the richest pink. 15 cts. each.

Robert Halliday. Flowers of Mammoth size and deep golden yellow; really a wonder. 10 cts. each.

Timothy Eaton. The largest and grandest of all white mums; simply immense. 10 cts. each.

DAHLIAS. Decorative Dahlias

Decorative Dahlias are known by their large flowers and flat petals, being intermediate between the Cactus and Show types. Among these varieties will be found those mostly used for cut-flowers since they are those having the greatest substance and are the best shippers. Those we include are the result of careful selection.

Arabella. Very large and beautiful. Color soft primrose shaded with rose. 20c.

Bouton. Splendid crimson. 20 cts.

Crimson Giant. Richest glowing crimson. 20 cts.

Delice. Bright rose pink. 20 cts.

Elegans. Rosy purple, tipped white. 20 cts.

Golden Wedding. Very large, rich golden yellow. 20 cts.

DAHLIAS—Continued

Jack Rose. In color it resembles the Jacqueminot rose. Profuse bloomer and splendid for cutting purposes. 20 cts.

Jumbo. Deep red. 20 cts.

La France. Rich cerise. 25 cts.

Lyndhurst. Brightest vermillion; the best bright red for cutting. An early, free and continuous bloomer, with long straight stems. 20 cts.

Pres. Wilson. New 1912. Bright glowing cardinal red; destined to supplant Lyndhurst, as it is large, richer colored and more profuse bloomer. 25 cts.

Professor Mansfield. A giant decorative and most unique coloring; a pleasing combination of yellow, red and white. 20 cts.

Red Hussar. Richest cardinal red, with long stems. Splendid for cutting. 20 cts.

Sylvia. A beautiful deep pink, shading lighter to the center. 20c.

SHOW DAHLIAS

Show Dahlias are usually of solid color, but in certain varieties the tips of the petals may be of another. They are usually round, ball-shaped, and are always beautiful and compact, desirable for cut flowers.

A. D. Livoni. Rich pink, finely formed; a very handsome flower. 20 cts.

Dorothy Peacock. The world's best pink. Strong field grown roots. 25 cts.

Mrs. Roosevelt. Very large, soft pink. 25 cts.

Princess Victoria. Very large, clear canary yellow. 20 cts.

PAEONY-FLOWERED DAHLIAS

Paeony-flowered Dahlias are those having irregularly curved and twisted petals and are as beautiful as they are odd.

Mrs. Carter Lewis. Pale lilac, suffused with rose. 25 cts.

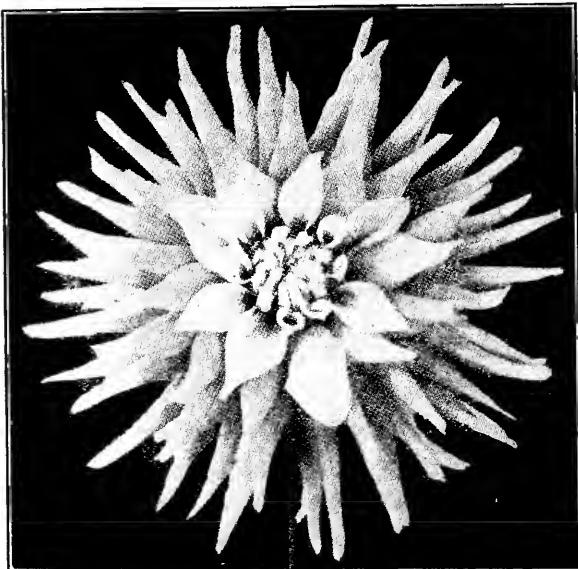

Geisha. The most striking color combination, golden yellow, changing to bright scarlet at the center of the petal and back to gold at the tip. Giant flowers on long wiry stems. Strong plants. 40 cts.

John Wanamaker. This is an ideal among the Paeony-flowered varieties, its color is an exquisite and fashionable shade of rose-lake, or, as popularly called orchid-pink. As the flower develops the color softens, and must be seen to be fully appreciated. \$1.00.

CACTUS DAHLIAS

The cactus forms of Dahlias are exceedingly beautiful, and are hard to excel. They have long twisted petals and embrace nearly all the colors and shades to be found in any of the other types. The advances made in these in recent years is very noticeable, some charming blends of color being introduced, together with a form of flower, which is a great improvement on the old varieties. To produce the finest flowers most of the side shoots or laterals should be pinched out when the plants get strong, leaving the terminal buds, which then make fine flowers.

Country Girl. Large, deep golden yellow, tipped bright amber. Beautifully incurved petals. 20 cts.

Gov. Warfield

Elegans

Dahliamum. Another new break in Dahlias, the large very full flower is borne on long slender wiry stems. Color is a rich creamy white, shading to primrose at the center and tinting to white at the tips. 50 cts.

Gov. Warfield. Pure white. 20 cts.

COLLAR ETTE DAHLIAS

This uniquely distinct class or type is rapidly gaining in popularity. The flowers are single with a row of smaller or collar petals around the center. These collar petals are generally distinct in color from the rest of the flower.

Exposition de Lyon. Beautiful red; white collar. 25 cts.

Mme. L. Viger. Bright crimson pointed petals, white collar. 25 cts.

Mons. L. Ferard. Rich rosy crimson, edged and marked white; very large collar of same color. 25 cts.

NEW CENTURY. Single Dahlias

Anna Long. Clear rosy pink, with white band running through each petal; sometimes solid pink. Profuse bloomer on long slender stems. Height, 5 ft. 25 cts.

Blackbird. Maroon shaded black, with red spot at base of each petal. 15 cts.

Apple Blossom. Most delicately lovely, apple blossom colors. Flowers are perfectly formed, delicate pink, heavily tipped deep carmine pink. 20c.

Cardinal Century. Very large, rich cardinal red, the best deep red. Height, 5 ft. 20 cts.

Crimson Century. Rich crimson, rose band around disc. Height, 4 ft. 20 cts.

Eckford Century. Probably the largest single Dahlia in existence; the immense flowers, pure white, spotted pink and penciled crimson, are produced in abundance on long stiff stems. Height, 5 ft. 20 cts.

Fringed 20th Century. The first of a new race, with cleft or serated petals. A great improvement of 20th Century, much larger, brighter color, while the stems are long, slender and stiff. Color bright, rosy crimson, with lighter markings. Height, 4 ft. 20 cts.

Mrs. J. C. Hance Century. Bright carmine pink, with blush white disc. An exquisitely lovely flower, of largest size, with long stems. Height, 4 ft. 30 cts.

Rose Pink Century. The largest and best deep pink; enormous flowers on long 3 feet stems; sure and continuous bloomer, vigorous plant. Height, 5 ft. 20 cts.

NEW CENTURY DAHLIAS—Continued

Wildfire Century. Century size, with the brilliant, rich scarlet of the old Wildfire. Acknowledged the best commercial scarlet. Height, 3 ft. 20 cts.

TRINIDAD DASHEEN

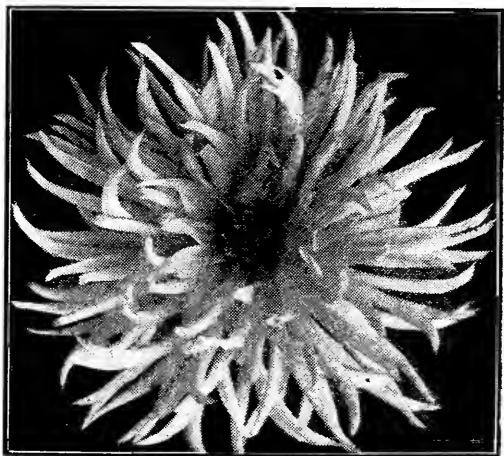

The Trinidad Dasheen is probably the most wonderful yielder of tuberous roots that are valuable for human food and stock food as well, and will often yield 500 to 700 bushels per acre. They belong to the same family as the well known Elephant Ear or Calladium Excentrum, so often grown all over the country for ornamental use in our gardens and somewhat resemble them, but grow more upright, leaf is rounder and of a much darker green in color. They like an abundance of water and will grow on land too wet for almost all other crops. Even an overflow of several days at a time will do them no harm whatever, and they will also endure considerable of a drought without great disadvantage. They will thrive where it is too dry for the common Elephant Ear and many prefer them for ornamental planting to that old favorite. In fact, we believe that they will, as soon as well known, rapidly supersede them for general ornamental planting. They will, on good rich soil, reach a height of 6 feet and upwards; and, if planted 2x4, will yield enormous crops. The shoots in early spring are often cooked like asparagus and make an excellent substitute for that vegetable. The tubers are much richer in food values than either Irish or Sweet Potatoes and are cooked in various ways. A bulletin containing a variety of recipes for cooking them has been issued by the Agricultural Department at Washington that can be had for the asking. They mature such a wonderful crop of tubers that it is thought they will prove a very profitable crop. At any rate everyone should try a few. Small size, 10 cts.; large size, 20 cts.; postpaid. Express, small size, \$6.00 per 100; large size, \$15.00 per 100.

FARFUGIUM GRANDE—LEOPARD PLANT

A decidedly striking and effective plant. Is also known as the **Leopard Geranium**. Fine for house culture; easy to grow. Also fine out-of-doors, hardy as far north as Tennessee. Leaves ten to twelve inches across, distinctly marked with creamy-white and yellow spots. Large size, 60 cts.; small, size, 35 cts.

FERNS

Asparagus Plumosa. Climbing lace fern. A finer and more delicate plant than the Sprengerii, but hardy and easily grown; very satisfactory for window and house culture; an extremely graceful window climber, bright green feathery foliage, as fine as the finest silk or lace. The fronds retain their freshness for weeks when cut, and are greatly admired for floral decorations. An exceedingly beautiful plant for house and conservatory, and will thrive nicely in the temperature of an ordinary living room. Entirely unequalled

Country Girl

for the grace and beauty of its lovely spray-like fronds. Small size, 20 cts.; large size, 40 cts.

Asparagus Sprengerii. Emerald Feather Asparagus. This is undoubtedly one of the handsomest and most valuable evergreen training plants for hanging baskets and porch boxes. Small size, 20c; large, 30c and 40c.

Teddy Junior. The fern for every household. It is sport from the now famous Roosevelt Fern, and while its habits of growth is to produce a shorter frond it retains all the valuable characteristics of the parent plant. The fronds are broad and beautifully tapered from base to tip. The pinnae are distinctly undulated. It is such a compact, vigorous grower that it will thrive under the most adverse conditions making an exceptionally rapid growth and producing a plant of rare beauty and perfection in the average dwelling house without special care or attention. 20 cts.; large size, 40 cts.

The Roosevelt Fern (*Nephrolepis Roosevelt*). In general characteristics it resembles the world famous Boston Fern, but it produces many more fronds than the Boston, thus making a bushier, handsomer plant. Roosevelt will make a better plant in a 6-inch pot than any other Fern in a 10-inch pot. The pinnae are beautifully undulated, giving the Roosevelt a pronounced wavy effect seen in no other Fern; as the plant ages this effect becomes quite distinct, 20 cts.; larger sizes, 40c; 75c; \$1.00.

Ostrich Plume Fern (*Nephrolepis Whitmanii*). We have never sold a Fern that has created so much favorable comment. It appears to delight in hot weather and hence seems to thrive perfectly in the warm atmosphere of living rooms. Combines graceful plumbiness and charm with additional features of good shape, size and growth, but equalizes matters by compactness and a wider, stockier shape. The accompanying illustration was made from a photograph and gives only a fair idea of its graceful appearance. The fronds, although even more fine cut, are more erect and have proved less liable to revert to original type. 20 cts.; larger sizes, 40c; 75c; \$1.00.

Boston Sword Fern (*Nephrolepis Bostoniensis*). This Fern has proven to be a most popular decorative plant. It is a rapid grower of very easy culture, soon forming a large, graceful plant. Its beautiful fronds often attaining a length of 4 to 5 feet, which arch and droop so gracefully that it is sometimes called the Fountain Fern. No plant ever introduced has had a larger sale than the popular "Boston Fern." You can make no mistake in ordering this magnificent Fern, as it is sure to please you. We receive many letters from patrons who are highly pleased with the Boston Fern purchased from us. 20 cts.; larger sizes, 40 cts.; 75 cts.; \$1.00; \$1.50.

Fish Tail Fern (*Nephrolepis Davallioides Falcans*). This is a grand fern entirely distinct from any of the other varieties of Nephrolepis. The ends of the pinnae are so formed as to resemble a fish tail giving the fronds a crested appearance, very effective. It grows into the most shapely plant of any of the Nephrolepis. Grand for house culture. 20 cts.; larger size, 50 cts.

Dwarf Ferns for Fern Dishes. We have selected a few of the hardiest and most satisfactory varieties for filling fern dishes of which there is no prettier table decoration. 15 cts. each or 6 different dwarf ferns for 75 cts.

The Roosevelt Fern

LARGE SIZED FERNS SHIPPED BY EXPRESS ONLY

FERNS—Continued

Baby's Breath Fern (*Nephrolepsis Goodii*). This has the finest foliage of all the ferns. It is so delicate and dainty in texture that baby's breath will set its fluffy foliage in motion. The fronds are very fine and filmy on which account it has been called by some the lace fern. Nothing is daintier or more exquisite than well grown specimens in any size. No fern in existence can compare with "Baby's Breath" in fluffiness. 25 cts.

FUCHSIAS. Ladies' Eardrops

15 cts each. Set of 4 for 50 cts.

Black Prince. This is, without question, the very finest Fuchsia grown for the amateur to cultivate. It makes a shapely bush, is robust in growth, free from disease and insects, and is probably the freest in blooming. We have seen specimen plants 6 feet in height and 4 feet across loaded with bright buds and blossoms of a beautiful waxy carmine or pink color. .

Enfant Prodigy. A grand Fuchsia; bright red sepals, deep purple corolla.

Monstrosa. Of the largest size; scarlet sepals, double snow-white corolla.

Speciosa. Habit erect and compact, presenting a decidedly neat and attractive appearance as a pot plant. The fine star-shaped flowers are produced in profusion, and begin when plants are quite young. The flowers are three inches or more in length; tube and sepals bright rose, corolla brilliant carmine; it blooms quite freely.

Jean Vaud

GERANIUMS

12 cts. each except where noted; 20 cts. each large size; any 6 priced 12 cts. each for 60 cts.

Alphonse Ricard. Large, perfectly formed semi-double flowers of bright vermillion-red are freely produced in enormous trusses during the entire season.

Beaute Pointevine. The color is a beautiful shade of shrimp pink, delicately shading to white. The flowers are large, splendid trusses; a most profuse bloomer the entire season.

Heteranthe or Double General Grant. Bright orange-scarlet flowers, profusely produced during the entire season in good sized trusses; a vigorous grower. Will stand the sun well.

Jean Vaud. Beautiful shade of mauve pink, shading to clear white throat; the flowers and trusses are enormous, sometimes measuring 6 inches in diameter. Extra fine.

La Favorite. Flowers purest white; very free flowering; always a perfect mass of white; an old favorite.

Madame Barney. A profuse bloomer of an enormous semi-double flower of a deep pure pink color, of dwarf and branching habit. A perfect bedder and pot variety. 15 cts.

Marquise de Castellane. Magnificent double flowers and enormous trusses of a beautiful soft crimson varying to a lighter red, freely produced the entire season on rigid stems well above the foliage, will satisfy the most discriminating.

Mrs. E. G. Hill. A profuse bloomer of a soft, light salmon color, each petal bordered with a salmon-rose; will resist the heat of the sun; excellent for bedding. An exquisite Geranium. 15 cts.

Mrs. Lawrence. One of the finest varieties we have in this color, especially as a winter or early spring bloomer, continuing throughout the entire summer an exquisite shade of soft satiny salmon-pink, slightly tinged with white. Extra, 15 cts.

S. A. Nutt. This is more generally used as a pot plant and for bedding than any other variety. The color is a handsome dark velvety scarlet with maroon shadings. A vigorous grower.

SWEET-SCENTED GERANIUMS

12 cts. each; 3 for 30 cts. Large size, 20 cts.

Lemon. The foliage is pronouncedly lemon-scented.

Nutmeg. Foliage has true nutmeg fragrance.

Rose. The famous sweet rose-scented geranium; very fragrant.

IVY-LEAVED GERANIUMS

These have a trailing habit, and are extra fine for basket, vase or porch work. 15 cts. each; 2 for 25 cts.; 5 for 60 cts.

Caesar Franck. Color is a magnificent shade of soft, rich crimson, with an exquisite shading of tender rose at the base of petals.

Incomparable. A glorious bright red.

Joan d'Arc. Flowers perfectly double; color pure snow-white.

Mrs. Banks. Flowers large, semi-double; color a pleasing shade of bluish-white, upper petals feathered Neyron pink.

Rycrofts Surprise. Charming bright clear pink.

PELARGONIUM or LADY WASHINGTON GERANIUMS

Easter Greeting. This new ever-blooming Pelargonium was shown at the Mannheim horticultural exhibition in Germany. Planted out as a bedding plant and bloomed continually until late in the fall. It will prove the forerunner of a new race of ever-blooming kinds, as it rivals the orchids in beauty. The following description is from the German introducer, Carl Faiss: "This new species is the earliest of all Pelargoniums with enormous florets and clusters, having light green foliage and of dwarf, robust growth. It blooms from March until fall. The florets are fiery amaranth-red, with five large, regular shaped spots. The first and only kind to bloom as well bedded out as in pots, and to do so all summer." 30 cts.; 50 cts.; 75 cts.

Gardener's Joy. The ground color is apple blossom pink, the two upper petals have blotches of carbon-brown, the florets are three and one-half inches in diameter and are joined to enormous clusters which rise above the beautiful foliage and remind one of a Rhododendron cluster. It is of a half dwarf nature and very sturdy. On account of its rapid, luxuriant growth it is a very profitable market variety. 35 cts.; 60 cts.

German Glory. This splendid novelty is quite remontant, florets and cluster very large; ground color Cattleya-blue, very much like the Cattleya orchid. The upper petals contain two large purple magenta-red spots, distinctly veined. An exceedingly beautiful and entirely new color in Pelargoniums. This kind has a very robust growth. 35 cts.

Prince Bismarck. Immense large flowers, strongly crimped, of fine shade, with from six to ten petals; color rich purple with velvety black blotches. Remarkably robust habit. The large clusters rise gracefully above the beautiful foliage. The blooming plant with its enormous flowers makes a striking impression.. 30 cts.

Bridgroom. Rosy-blush, with maroon shading. Beautiful crimped flowers. 30 cts.

PANSY GERANIUM—MRS. LAYAL

A Wonderful Plant

This new and wonderful Pansy Geranium is of the easiest growth, dwarf in habit, and literally covered with flowers all the time, and as it requires little or no attention it is invaluable as a window plant. The coloring and markings of the flowers are most extraordinary light pink, white, dark purple, black, etc., almost rivaling the pansy in uniqueness of flower. It is this combination of coloring which obtained for it the popular name of Pansy Geranium. 30 cts.

GLADIOLI

This is one of the best summer-flowering bulbs. It is a flower anyone can grow and is lovely enough to satisfy the most exacting. The flowering season may be continued by planting from middle of April to the first of June. Set the bulbs 6 inches apart and 2 to 4 inches deep.

America. The finest pink Gladiolus yet introduced; especially valuable to florists; spikes 2 to 3 feet long; flowers are large, open and spreading. Color delicate lavender pink. 5 cts. each 40 cts. doz.

Augusta. Lovely pure white, blue anthers. 5 cts. each; 40 cts. doz.

Baron Hulot. Dark purplish violet. 5 cts. each; 50 cts. doz.

Brenchleyensis. Intense fiery scarlet. 5 cts. each; 40 cts. doz.

Electra. Most brilliant orange scarlet of perfect shape, very early. 15 cts. each; \$1.50 per doz.

Empress of India. Dark red. 8 cts. each; 75 cts. doz.

Europe. The first perfectly pure white Gladiolus, very large and free flowering. Very often over a dozen flowers open at the same time and even the last bud opens perfectly. 25 cts. each; \$2.50 per doz.

Mrs. Frances King. Bright "Flamingo" pink, strikingly attractive. Flowers 4 to 5 inches across, are borne on stalks 5 feet high. 5 cts. each; 50 cts. doz.

Golden West. Bright orange with small black spots on the lower petals. 15 cts. each; \$1.50 per doz.

Lily Lehman. Very nice pinkish white. 8 cts. each; 75 cts. doz.

Niagara. The best yellow. 10 cts. each; \$1.00 per doz.

Pink Beauty. A beautiful deep pink variety, very early. One of the best. 5 cts. each; 50 cts. per doz.

Pink Perfection. Delicate apple blossom color with a white stripe in the center of each petal and a dark rose feathered border. 10 cts. each; \$1.00 per doz.

Principis. Beautiful large expanded flowers of a bright scarlet. 5 cts. each; 40 cts. per doz.

Groff's Hybrids. The size and beautiful shadings of this strain give the greatest possible range of varieties. 5 cts. each; 45 cts. per doz., prepaid.

HEDERA. Ivy

Helix (English Ivy). A familiar evergreen vine, dark green leaves, favors shady locations. The young wood sometimes winter-kills in this section, due to the action of the sun more than the cold. Suitable to cover buildings, rocks, trellis work, graves and as a carpet under trees in places where grass will not grow. 10 cts. each.

Germanica (German or Parlor Ivy). A rapid growing plant, well adapted for training in the parlor. Leaves glossy green and flowers yellow, in clusters. 10 cts. each.

HELIOTROPE

A favorite flower with everyone. 15 cts. each; \$1.50 doz.

America

Golden West

HEDYCHIUM. Butterfly Lily

Grows best on low, damp ground. Are much like Cannas, but the leaves are narrower and the flowers are produced from a close head. Blooms about 4 o'clock in the afternoon. The pure white flowers look much like butterflies and are very fragrant. If kept in the house in a growing state it blooms continually. 15 cts. each; 3 for 40 cts.

IPOMEA MAXIMA. New Moonflower

The Giant Moonflower. This grand new Moonflower is a decided improvement over all the Moonflowers. The flowers are more than twice the size of the old variety, oftentimes measuring from six to seven and one-half inches across, and are produced in such wonderful profusion that they completely cover the vine with a veil of glistening waxy white. 15c each; 2 for 25c.

Leari or Heavily Blue. This makes a splendid companion plant to the white "Moonflower." It is equally rapid in growth and as free blooming as the white variety, although blooming in the morning and dull days. The flowers are the most heavenly blue, with reddish-purple rays, and are six inches across. 15c each.

LANTANA

Showy bedding or basket plants. 15 cts. each; 3 for 40 cts. Larger size, 25c.

Alba Perfecta. Pure white.

Countesse De Biencourt. Clear, bright pink.

Grand Sultan. Crimson; fine.

Jaune d'Or. Cream and Orange.

Weeping. One of the grandest basket plants grown. The plant has a most graceful, drooping habit, grows very rapidly and blooms continually summer and winter, producing large clusters of the most delicate lilac or rosy-pink. 20 cts. each.

LEMON

American Wonder or Ponderosa. It is a cross between the ordinary lemon and grape fruit, or Pomelo, of rapid growth; large dark green foliage and bears fruit when quite young, often weighs 3 to 5 lbs. Very ornamental on account of large shiny foliage and wonderful immense fruit borne very freely. The fruit is edible and may be used for all culinary purposes. 20 cts. each; large size, 35 cts.

OTAHEITE ORANGE

Chinese Dwarf. A grand pot plant of great beauty and novelty. It is a dwarf orange that grows, blooms and fruits freely in pots, even when only a foot or two high. Fruit is about half the size of ordinary orange; is sweet and luscious. Blooms are produced in greatest abundance, are delicate and beautiful in color, and rich in delicious perfume. Blooms most freely during winter, although very likely to bloom at all times of the year. With 1 or 2 plants you can raise an abundance of fragrant blossoms. 20 cts. each; large, 35 cts.

1 each Lemon and Orange; smaller size, 35 cts.; larger, 60 cts.

MADEIRA VINE

A rapid climber, twining to great heights. Thick, glossy leaves and feathery, very fragrant flowers. It grows anywhere, but does better in a warm, sunny location. It is also very pretty for training in the house. 5 cts. each; 45 cts. doz.

OXALIS

Summer-blooming. A very pretty plant for edging flower beds. Bears an abundance of pink and white flowers and delicate foliage. 20c per doz.

PALMS

Kentia Belmoreana. Of dwarfer habit than Fosteriana, but with more spreading leaves. The Kentias are the hardiest house plants. They are of slow growth and are less affected by dust and dry atmosphere. 4 in pot. \$1.00.

Kentia Fosteriana. Of taller habit than the Belmoreana; somewhat heavier foliage. 4 in pot. \$1.00.

PANSIES

We offer the best assortment of pansy plants that can be had anywhere. We grow these plants from seed taken from ten of the best pansy growers in the United States and Europe. These plants are the giant flowered sorts in the greatest array of colors. Price, 35 cts. per doz.; \$3.00 per 100.

SMILAX

For using as a green with cut flowers, it has no equal, its hard texture enabling it to keep for several days without wilting after being cut. It is also fine as a parlor or window plant. 10 cts. each.

VIOLETS

Swanley White. Double white flowers. 15 cts. each.

Lady Hume Campbell. Double blue flowers. 15 cts. each.

Princess of Wales. Single blue flowers. 15 cts. each.

Russian Hardy Violet. Is good as a house plant or may be used outside, where it is absolutely hardy, withstanding both drought and cold weather. 15 cts. each; \$1.50 per doz.

XANTHOSOMA

Bataviensis. The Xanthosomas are similar to Caladiums, having great arrow-shaped leaves. This variety has very dark purple stems and dark green leaves and is one of the best ornamentals we know of. Fine for either garden or home culture, where one has room enough for a magnificent plant.

SALVIA

Splendens Dreer "Bonfire." A splendid dwarf variety, growing about 2 ft. high, and is especially valuable on account of being the earliest to bloom, flowering ten days in advance of any other sort. 10 cts. each; 95 cts. per doz.; \$8.00 per 100.

SANSEVIERA

Sansevieria Zeylanica (Zebra Plant). A beautiful plant of low habit, leaves nearly round and striped freely with silver bands, blooms white, of great beauty and borne in spikes nearly twelve inches high. Fine for hanging baskets, vases, etc. 25 cts. each.

TRADESCANTIA. Wandering Jew

Beautiful variegated foliage. Fine for baskets and vases. We have two sorts, the Tricolor and the White Striped; both are showy and fine. 10 cts. each.

Palms

TUBEROSE

Dwarf Excelsior Pearl Tuberose. We have procured the finest lot of Tuberoses it has ever been our pleasure to handle. Every bulb should throw an immense spike of bloom. 5 cts. each; 45 cts. per doz.

Mexican Everblooming Tuberose. These come from the high table-lands of Central Mexico. They have tall, stiff stems, flowers pure white, single, delicately fragrant. They withstand all kinds of wind and weather except hard frosts, commence to bloom in May and are a mass of white till cut down by frost. They never blight and the smallest bulb blooms the first season, generally sending up 3 to 10 flower stalks. If the stalk is cut when the first flower opens and put in water, the flowers increase in size and whiteness and keep for a week or ten days. 10 cts. each; 3 for 25 cts.

VINCA

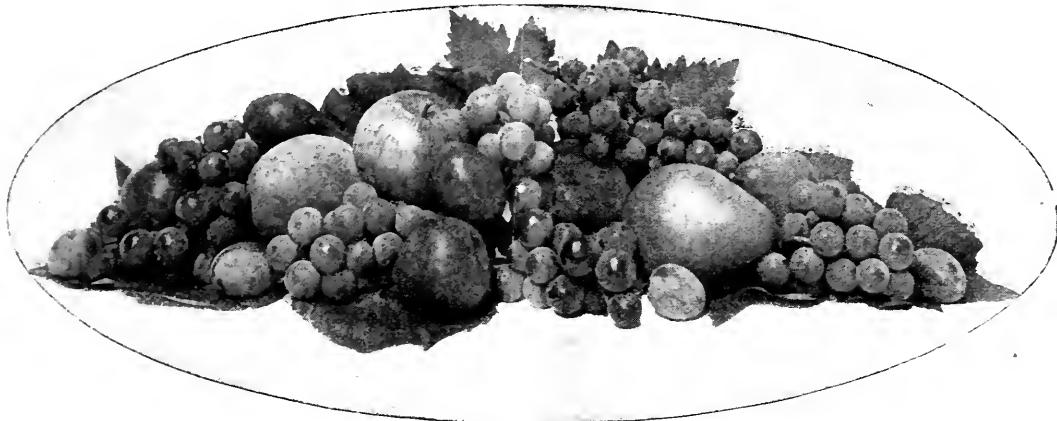

Vinca Major Variegata. This is a beautiful variegated trailing vine admirably adapted for hanging baskets and vases. The leaves are a glossy green, broadly margined a creamy-white, flowers blue. More Vincas are employed in vase and basket work than all other vines combined. 15 and 20 cts. each.

Violets

We can supply house plants both in Spring and Fall. There are many varieties not listed owing to lack of space but we can furnish you with most all house plants.

Porch baskets ready for shipment May 1st, filled with Springerii and Geraniums — sent by Express at \$1.25, \$1.50 and \$2.00.

Fruit Department

There never was a better time for planting apple trees than right now, both for home and commercial orchard purposes. There should be an apple tree in every door-yard; several of them on every farm and many commercial orchards to take the place of those which are passing. No fruit gives greater, year-round satisfaction than apples and none produce a better profit. Plant some apple trees this year.

Apples

Ben Davis. Tree thrifty, upright grower of almost perfect shape. Fruit large and round, sometimes variable in form; surface smooth, often polished yellow, covered and splashed bright red; flesh white, tender and juicy; flavor is sub-acid, not rich; quality only good; best for market and cooking. November to spring.

Delicious. The best and most noted apple in the world. A beautiful, large, red winter apple that will keep until May. It will average 12 ounces in weight and only sixty apples for a bushel, heaping full. The flesh is of the very finest texture, neither sweet nor sour, but just the proper flavor to make it the most sought after apple in the market. Fruit stands readily sell Delicious for 15 cents each when the best of Jonathans are selling two for a nickel. After once seeing the Delicious you never forget it. Uniform in size and shape slightly tapering, with five marble-like protuberances on the blossom end. Any good apple will pay you a profit on your investment of time, labor and money, but my Delicious, like all my other trees, are really pedigreed trees. The scions are taken from bearing trees and grafted on whole roots which are hardy and Northern grown.

Duchess of Oldenburg. A beautiful round apple. Streaked red and yellow. Tender, juicy and pleasant. Tree a vigorous grower, early and abundant bearer; fruit very attractive in appearance. Very hardy.

Gano (Black Ben Davis). Fruit is bright red on yellow ground, with no stripes; large and oblong in shape, surface smooth and polished. Tree healthy, vigorous and prolific bearer. January to April.

Grimes Golden. This is one of the most popular apples in cultivation. Tree strong, thrifty grower. Fruit medium to large, cylindrical in shape; regular surface yellow veined, russeted; flesh yellow, firm, very fine grained, juicy; flavor sub-acid; quality rich. For dessert, cooking and market. November and December.

Jonathan. Tree of rather slender growth and spreading habit; fruit medium or above in size, round or oblong; surface very smooth, waxy yellow, often wholly covered with brilliant red; flesh whitish yellow, tender, very juicy; for dessert or cooking; quality best. October to November.

Maiden Blush. Large, flat, regular, smooth, evenly shaded, with a red cheek or blush on a pale yellowish ground; flesh white and tender, with a pleasant sub-acid flavor; tree erect, vigorous and a regular and abundant bearer.

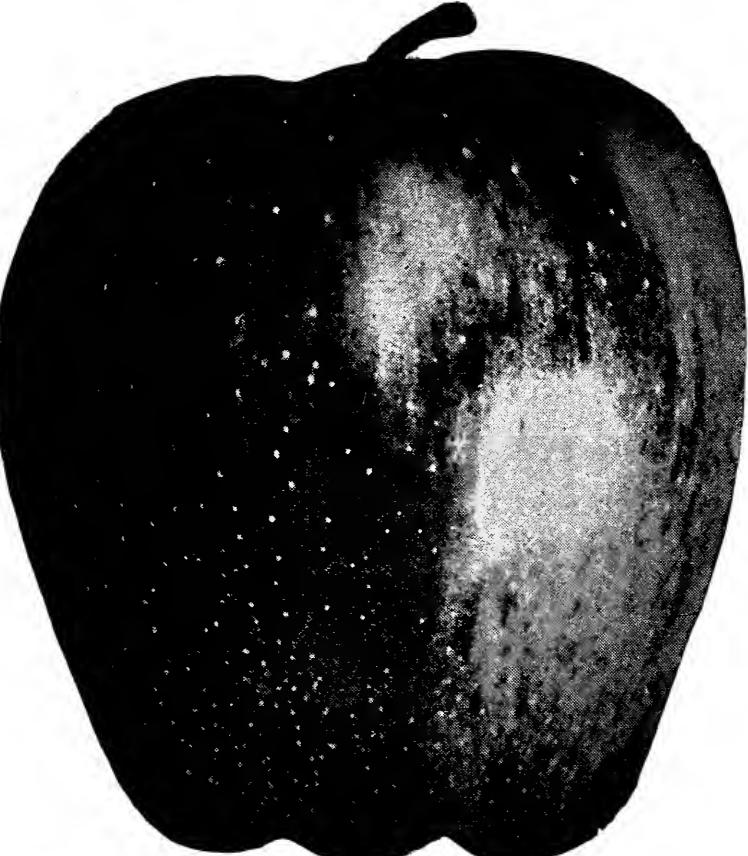

Northwestern Greening. Fruit large, greenish, yellow, firm and fine grained. Tree is very hardy, a thrifty, upright grower, an early and productive bearer. One of the longest keepers known.

Red June. Medium size; skin red; flesh white, tender, juicy, sub-acid; an abundant bearer. Tree an upright grower.

Walbridge. Medium size, striped with red, good cooker; vigorous grower and productive. Very hardy and considered of value in the North. December to January.

Wealthy. Medium size; round in shape; skin smooth, oily, light yellow, almost entirely covered with dark red; flesh white, fine, juicy and sub-acid; one of the best and finest apples grown. Tree vigorous, extremely hardy, one of the iron-clads; a very early and abundant bearer.

Winesap. One of the best little apples grown; red. A fine eating apple. One of the best for baking. Shape is round, conical, sometimes obscurely flattened. Flesh yellowish, firm, crisp, rich sub-acid or rather acid flavor. Keeps all winter.

APPLES—Continued

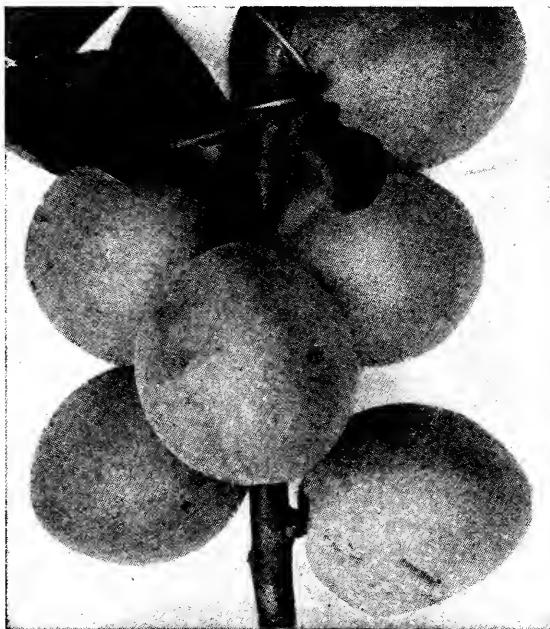

Yellow Transparent. The tree is a hardy, upright grower, a regular and early bearer; medium size. Color a rich, transparent yellow, with a warm faint flush on the sunny side; flesh is melting, juicy, sub-acid. This Russian variety is especially adapted for a cold climate. The trees bear very young.

CRAB APPLES

Florence. A hardy tree, bearing young; fruit medium, of carmine color; flesh yellowish; medium, fine; a fine jelly crab.

Martha. A vigorous grower and free from blight. Fruit large yellow with heavy blush of light red, flesh fine grained, firm; very juicy and fine for cooking.

Whitney No. 20 (Hybrid). A beautiful, upright growing tree. A young and abundant annual bearer and very hardy. Fruit of large size, conical, yellow striped with red, and covered with a whitish bloom. Flesh, white, crisp, sub-acid, almost sweet and very fine for eating; good for sweet pickles. Season August to September.

Wilson Apricot

greater value than most other varieties. The fruit is of high color and great beauty.

Seckel. Autumn. Small in size; skin a rich yellowish brown; flesh very fine grained, sweet, juicy and melting. Bears regular and abundant crops in clusters at ends of branches. Tree a strong grower. Considered one of the best pears. Among the healthiest and hardiest of pears; makes a beautiful tree.

Apricots

Alexander (Russian). Medium to large, light orange, yellow flecked with red; flesh tender, juicy, sweet and good quality; hardy; very productive. July.

Budd (Russian). Medium to large; light orange with blush on sunny side; flesh sweet, juicy with flavor of the peach; hardy and productive. August.

Superb (Russian). Medium, roundish-oval, smooth, light salmon with numerous red or russet dots; flesh yellow, firm, sub-acid and good; tree hardy and productive; middle of July.

Wilson. Discovered on the Wilson (Travis) ranch, near Cory, Delta County, Colorado. Compared with Moorpark, it is seven to ten days earlier, larger, flesh of deeper color, cheek shows more red, richer quality.

Cherries

Compass Cherry. Absolutely hardy everywhere. Nearly an inch in diameter, bright red, sweet and juicy and of very fine flavor. The original tree bore fruit the third year from the seed and has borne a full crop every year since. The tree is a regular and heavy bearer and produces fruit the next year after setting out. For exposed situations and for the North and West it is "the Cherry." Requires no protection whatever; in every particular is hardy as an oak.

Late Duke. Fruit similar to May Duke, but later and not so sweet.

Florence Crab

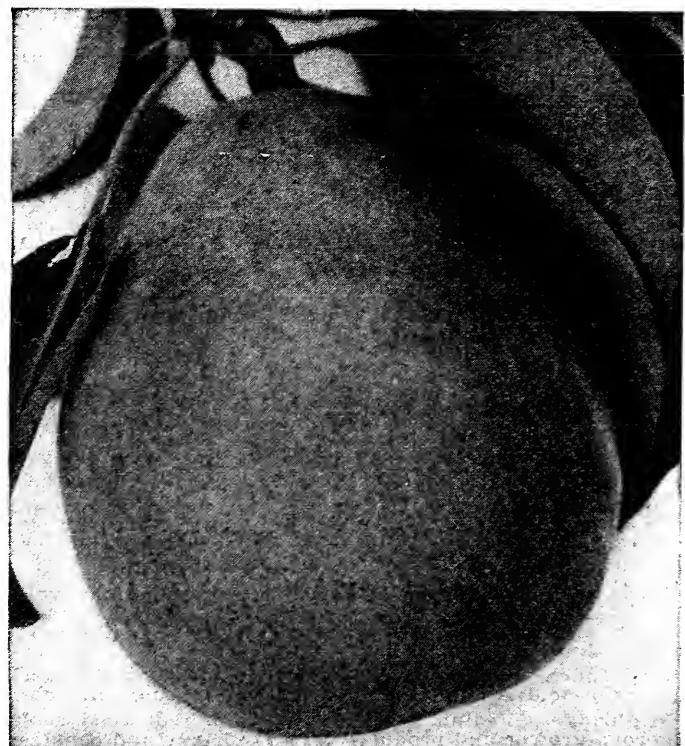

✓ **Bartlett.** Summer. Large size, with a beautiful blush next to the sun; very juicy and highly flavored; bears early. One of the most popular sorts. Delicious for eating.

Clapp's Favorite. A large, fine pear, resembling the Bartlett, but without its musky flavor. Pale lemon yellow with brown dots, very juicy with a delicate flavor.

✓ **Duchess.** Autumn. Very large, dull greenish yellow, streaked and spotted with russet; flesh white and very juicy, with a rich, excellent flavor, tree vigorous.

✓ **Garber.** Large bright yellow with red dots; juicy and good, splendid for canning. Trees not subject to blight and the fruit ripens just after Bartlett.

✓ **Keiffer.** Autumn. Large; rich golden yellow, sometimes mottled red on the sun-exposed side. Fruit very large; flesh is white, crisp, juicy and of a slight quince flavor. Highly prized for canning. It has become a profitable market variety on account of its good shipping and keeping qualities. To properly ripen, the fruit should remain on the tree until leaves begin to fall, then gather carefully and allow to ripen in a cool, dark cellar or other place of even temperature. Tree a most vigorous grower and early bearer; one of the most resistant to blight; very prolific, and widely planted throughout the country. The tree is so hardy and free from insect pests as to give it

Keiffer

CHERRIES—Continued

✓ **Early Richmond.** Medium size light red; melting, juicy, sprightly acid flavor. Tree healthy and productive. One of the most popular early cherries.

✓ **English Morello.** Medium to large, roundish, dark red, nearly black when ripe, flesh purplish red, meaty, juicy, very productive.

✓ **Montmorency.** Large red cherry, ripening ten to fourteen days after Early Richmond. Tree a low but stiff grower; very prolific bearer; valuable late sour cherry.

Plums

✓ **Burbank.** Medium to large, orange-yellow, dotted and marbled with red; flesh meaty, yellow, sweet and good; valuable for canning and a good market plum; mid-June. Hardest and most prolific of the Japan varieties.

✓ **Burwood.** Largest and finest of the hardy plums, being a cross between Burbank and Brittlewood. More productive and profitable than Burbank or any of the native varieties.

✓ **Damson (Common Blue).** A valuable market sort. It bears enormous crops. Thousands of bushels are annually sold in our markets. It is the best plum for preserving. August and September.

✓ **Hawkeye.** One of the largest and best plums grown in the Northwest. Fruit large, round, oval, thick skin that bears handling; color dull red over yellow; flesh yellow and of prime quality. Tree hardy and vigorous, bears young and reported everywhere as prolific and regular. A profitable market plum, stands shipping well. Highly valued for fresh fruit and culinary purposes.

✓ **Admiral Schley.** A new variety sent out by Mr. Terry, of Iowa, a plum expert. The tree resembles somewhat the Stoddard and the Forest Garden. The fruit is much larger though, and of fully better quality. For two seasons it has taken the premiums over all plums at the Iowa State Fair. One of the very best and most profitable of the native type of plums. Although it is a recent introduction we offer them at the same price as other plums.

✓ **Weaver.** Large, oblong, flattened at ends, dark mottled red with purplish bloom; flesh firm; meaty and very good; a constant and regular bearer and very hardy.

✓ **Wyant.** Medium to large, oblong, purple-red on yellow ground; flesh firm and good quality; one of the most popular of the American sorts.

Peaches

✓ **Alexander (Cling).** Medium size, greenish white, nearly covered with rich red; flesh sweet and juicy. Very productive.

Morello

✓ **Hale's Early (Semi-Cling).** Medium greenish white with red cheek; flesh white, melting, juicy. Abundant bearer.

✓ **Triumph (Free).** Medium round, somewhat flattened; greenish yellow, cheek purplish red. Flesh yellow with red stains; juicy and very good. One of the early sorts.

Mulberries

✓ **Downing.** Very large, black, handsome, sweet, rich and excellent.

✓ **New American.** Equal to Downing in fruit, but much harder. Vigorous grower, very productive; the best variety for fruit; ripe from middle June to middle September.

St. Regis

Small Fruits

As a satisfying fruit for the door-yard and the home, Small Fruits stand by themselves. Their ease of culture, their generous production and their distinctly ornamental nature adapts them especially well. And where is the family that does not like current jelly or raspberry jam? Think of the health-giving satisfaction and rich pleasure you would get from your own blackberry bushes or grape vines. Plant some of them this year and realize that satisfaction.

Gooseberries

✓ **Downing.** Size medium to large, oval, greenish white; plants vigorous, upright, very productive; never mildews. 20 cts. each, postpaid; by express, \$1.80 per doz.

✓ **Houghton.** Fruit small to medium, pale red, of fine flavor. Plants of slender, spreading growth and enormously productive. 15 cts. each; postpaid. By express, \$1.10 per dozen.

Currants

Cherry. Very popular in market and brings several cents more per quart than any other old variety.

Fay's Prolific. The best currant yet introduced; berries are large, uniform in size, with long stems, good flavor and are very productive and easy to pick.

Victoria. Large, bright red with very long bunches; late; a good bearer.

White Grape. An excellent and well known sort.

Wilder. Introducer says: "Wilder will make twice as much wood as will Fay's Prolific, while setting as large fruit with double and triple the quantity; combines more good qualities than any red currant he has ever fruited." It is large, very productive, sweet and hangs a long time on the bushes in fine condition after fully ripe.

PRICES:

All currants, 15 cts. each; \$1.25 per doz.; postpaid; by express, \$1.00 doz.; \$6.00 per 100.

Raspberries

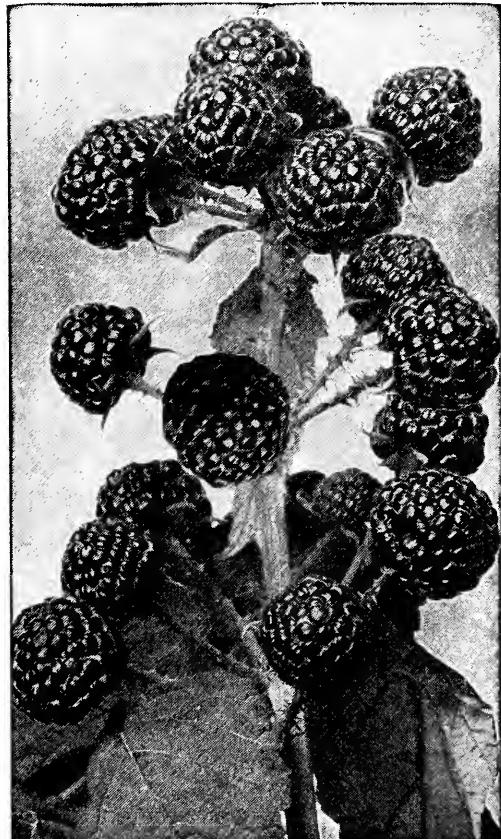

Cardinal. This wonderful berry surprises all by its great growth, extreme hardiness, exceeding productiveness and the unusual richness of its pure flavored, large purple berries. 12 cts. each; \$1.00 per doz.; postpaid. By express, 50 cts. doz.; \$3.50 per 100.

Cumberland. The largest of all black caps. A healthy, vigorous grower, throwing up stout, stocky, well branched canes that produce immense crops of magnificent berries. Fruit very large, firm, quality about same as Gregg; keeps and ships as well as any of the blacks. The most profitable market variety. Each, 8 cts.; 60 cts. doz.; postpaid. By express, 50 cts. doz.; \$3.50 per 100.

Kansas. A strong, vigorous grower, standing extremes of drouth and cold and bearing immense crops. Early, ripening just after Souhegan. Berries size of Gregg, of better color; jet black and almost free from bloom; firm, of best quality; presents a handsome appearance and brings highest price in market. 8 cts each; 65 cts. doz.; postpaid. By express, 55 cts. per doz.; \$3.50 per 100.

Scarff. This valuable new black cap was introduced three seasons ago by Mr. Scarff. We bought a few of these and gave them a good try out, and have found the Scarff Raspberry to be the best all around black cap we know. In size it compares with the Cumberland, probably a trifle larger. In productiveness it is far ahead of any of the black caps we have. It is absolutely hardy, canes free from disease and strong, upright growers. The canes are cleaner by far than any raspberry we have seen, and we know it will stand heat and drouth better. It makes an abundance of good, strong canes; which allows us to sell them at moderate prices. 15 cts. each; \$1.50 per doz.; 25 for \$3.00; postpaid. By express, 25 for \$2.25; 100 for \$7.50; 500 for \$30.00.

St. Regis Everbearing Red Raspberry. This variety has proven its worth again during the season of 1914, producing fine crops of fruit. Begins to ripen with the earliest and continues to bear on young wood until October. Berries bright crimson, large size, rich sugary raspberry flavor. Flesh firm and meaty, a good shipper. Wonderfully productive, the first or main crop equaling any red variety known. Canes stocky, of strong growth, with abundant dark green leathery foliage. Try it. 15 cts. each; \$1.50 per doz.; 25 for \$3.00; postpaid. By express, 25 for \$2.25; 100 for \$7.50; 500 for \$30.00.

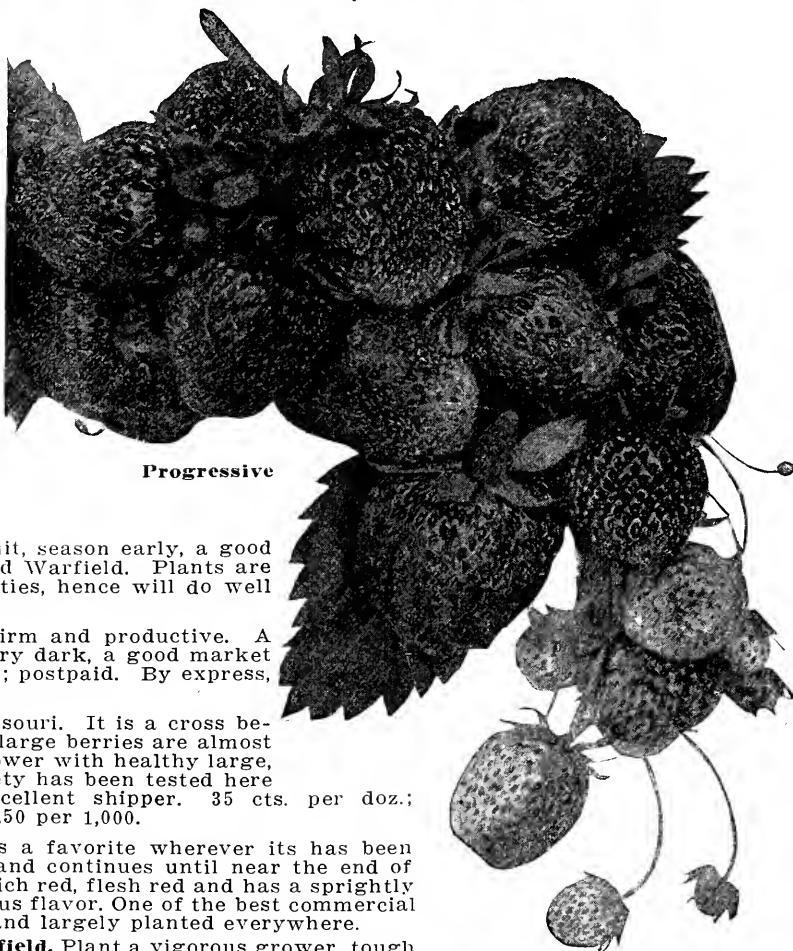

Scarff

Blackberries

Blowers. Originated in Chautauqua County, New York. Claimed to be the hardiest, most productive and the finest quality of all the blackberries. Large size, jet black, good shipper. We believe this variety has special merit. 15 cts. each; 6 for 80 cts; postpaid. By express, 65 cts. per doz.; \$4.50 per 100.

Mesereau. A remarkably strong grower, upright, producing stout, stocky canes. An enormous producer of extra size berries, brilliant black, and retain their color under all conditions; extra quality; sweet; rich and melting; without core. Ripens with Snyder. 10 cts. each; 90 cts. per doz.; postpaid. By express, 50 cts. per doz.; \$3.00 per 100.

Snyder. Extremely hardy, enormously productive, medium size, not hard, sour core. Easy to pick, fruit in clusters, mostly on top like raspberries. 10 cts. each; 80 cts. per doz.; postpaid. By express, 45 cts. per doz.; \$3.00 per 100.

Strawberries

Bederwood. Heavy bearer of good sized roundish fruit, season early, a good staminate variety to fertilize such sorts as Crescent and Warfield. Plants are deep rooted and stand a drouth better than most varieties, hence will do well on light soils.

Brandywine. Good shape, good quality, good size, firm and productive. A fine late berry for canning and for table use. Color very dark, a good market berry and a good shipper. 35 cts. per doz.; \$1.35 per 100; postpaid. By express, \$1.00 per 100; \$6.50 per 1,000.

Early Ozark. A very promising strawberry from Missouri. It is a cross between the popular varieties Aroma and Excelsior. The large berries are almost round and bright red in color. The plant is a grand grower with healthy large, dark green foliage, and exceedingly prolific. The variety has been tested here for several seasons and proven very satisfactory. Excellent shipper. 35 cts. per doz.; \$1.35 per 100; postpaid. By express, \$1.00 per 100; \$6.50 per 1,000.

Senator Dunlap. Of pronounced Warfield type. It is a favorite wherever its has been tried. Begins to ripen soon after the earliest sorts and continues until near the end of the season. Fruit is large, conical in form, color deep rich red, flesh red and has a sprightly delicious flavor. One of the best commercial sorts and largely planted everywhere.

Warfield. Plant a vigorous grower, tough and hardy; very productive. Fruit large, conical, always of regular form and slightly necked. Color dark glossy red: holds its color a long time after being picked; excellent flavor. A great shipping berry.

Price of all except Brandywine and Ozark: Per doz., 30 cts.; \$1.10 per 100; postpaid. By express, 75 cts. per 100; \$5.00 per 1,000.

EVERBEARING STRAWBERRIES

Instructions as to the planting and treatment after planting: Set same as other Strawberries. Remove fruit stems as they appear up to about August 1, then let them mature. Blossoms should be removed from all new set strawberries for best results, but more particularly fall bearing varieties. Fertilize your ground and cultivate well. The better the soil and care, the better the fruit and the more fruit will you obtain.

Progressive. Said to be the best of the fall bearing varieties; immense plant maker. Fruit medium size, high colored, red to the core; if picked before too ripe will ship well.

Superb (Perfect Flower). One of the very best. Plants are strong and stand the winter well after producing a heavy crop of fruit from about August 1 to November, according to season. The fruit of Superb is very large, round, rich, dark colored, glossy, attractive and smooth. Each berry is of good shape and ripens all over at once.

Prices on Everbearing Strawberries: Per doz., 50 cts.; 25 for 90 cts., postpaid; by express, 25 for 75 cts.; 100 for \$2.50; 500 for \$10.00.

Grapes

The grape is the most healthful of all fruits and most highly esteemed for its many uses. It can be grown by anyone who has a garden or yard and a little time to give to it. The vines can be trained up the side of a building or a garden fence or over an arbor, but the more profitable way is to grow them on a wire trellis.

BLACK GRAPES

Campbell's Early. A new, large, early black grape. Strong, vigorous, hardy vine with thick, healthy leaves; clusters very large, usually compact. Berries large and nearly round, rich, sweet flavored, very good; skin thin; seeds few and small, parting easily from the pulp; a good shipper. Ripens very early, but remain sound on the vines for many weeks. This makes it one of the most satisfactory and profitable market sorts to grow.

1 yr. No. 1.....	15 cts. each; \$1.25 doz.; \$ 9.00 per 100
2 yr. No. 1.....	25 cts. each; \$2.25 doz.; \$17.50 per 100

Campbell's Early

GRAPE—Continued

Concord. One of the most popular and reliable varieties we possess; bunch large, compact, berry large, round, almost black, with blue bloom; juicy, very sweet.
 1 yr. No. 1.....9 cts. each; 75 cts. doz.; \$3.50 per 100
 2 yr. No. 1.....11 cts. each; \$1.10 doz.; \$6.50 per 100

Moore's Early. A large grape of good quality, ripening about two weeks earlier than Concord; good grower; makes a moderate yield; very valuable as early grape.
 1 yr. No. 1.....9 cts. each; 90 cts. doz.; \$6.50 per 100
 2 yr. No. 1.....11 cts. each; \$1.25 doz.; \$9.00 per 100

Worden. Seedling of the Concord, which it greatly resembles in appearance, but the berries are larger, and the flavor generally considered better. The fruit ripens several days earlier.
 1 yr. No. 1.....9 cts. each; 90 cts. doz.; \$6.50 per 100
 2 yr. No. 1.....11 cts. each; \$1.25 doz.; \$9.00 per 100

RED GRAPES

Agawam. Bunch large; very large and round; reddish brown in color; tender, juicy and of excellent flavor. Very vigorous and productive. Vine hardy and one of the best of its class.

1 yr. No. 1.....9 cts. each; 90 cts. doz.; \$6.50 per 100
 2 yr. No. 1.....11 cts. each; \$1.25 doz.; \$9.00 per 100

Brighton. Bunch large; berries medium size, round, dark red, tender, very little pulp, sweet, juicy, slightly aromatic. Ripens early.

1 yr. No. 1.....10 cts. each; \$1.00 doz.; \$8.00 per 100
 2 yr. No. 1.....20 cts. each; \$2.00 doz.; \$15.00 per 100

WHITE GRAPES

Niagara. Bunch medium size, compact; fruit of a uniform size; skin thin but tough; pale green at first, changing to a pale yellow when fully ripe; it has a musky odor which disappears when fully ripe; vine vigorous, healthy, productive; ripens with Concord.

1 yr. No. 1.....15 cts. each; \$1.25 doz.; \$9.00 per 100
 2 yr. No. 1.....20 cts. each; \$2.00 doz.; \$15.00 per 100

Pocklington. Seedling of the Concord. This variety is a strong grower and thoroughly hardy; never mildews in vine or foliage. This is called a white grape, but the fruit is a light golden yellow color, clear, juicy and sweet to the center, with little or no pulp; bunches very large; berries round, very large and thickly set, quality fine. Ripens with the Concord.

1 yr. No. 1.....10 cts. each; \$1.00 doz.; \$8.00 per 100
 2 yr. No. 1.....20 cts. each; \$2.00 doz.; \$15.00 per 100

Rhubarb or Pie Plant

Victoria. Stalks very tall and large; skin thick and red-stained; pulp quite acid; very productive.

Large Clumps.....Each, 25 cts.; per 10, \$2.00; per 100, \$10.00
 Large Sets.....Each, 15 cts.; per 10, \$1.00; per 100, \$6.00

Asparagus

Columbian. It produces shoots which are white and remain so as long as fit for use. In addition to the marvelous advantage of its white color, the Columbian Mammoth White Asparagus is even more robust and vigorous in habit, and throws larger shoots and fully as many as Conover's Colossal.
 2 yr.....Per 25, 40 cts.; per 100, \$1.00; per 1,000, \$6.50

NOTE—The sketch need not be drawn to scale, but should give the principal dimensions, direction the house faces: North, East, South or West, and the location of buildings, walks, drives, if any, trees and shrubbery, or any other permanent things already established that are not to be removed. Also location of the entrances to lot and buildings, any objectionable views to be retained, and terraces, or grades of any importance. Unless we have this information it will be impossible to prepare a plan that will be practical.

GENTLEMEN:—On other side of this sheet is a sketch of my grounds I wish to improve, and I shall be pleased to receive a plan from you as per your offer on inside back cover. I enclose \$1.00 (currency) for which you are to send me a coupon good for this amount on my first order amounting to \$5.00 or over.

Yours truly,

Name

Town

Suggestions are always a help to us in preparing a plan that will meet the local conditions and individual tastes of every person, so kindly answer the following questions:

Do you prefer natural effects?.....

Do you prefer formal effects?.....

Do you prefer we use our own judgment?.....

Do you want us to locate walks?.....

Do you want a driveway (if so, show where you prefer it)?

Do you want any tender plants?.....

Do you prefer hardy plants?.....

Do you like a lot of shrubbery?.....

Do you want a rose bed?.....

Do you want any hedges? (Where)?.....

Do you want a formal flower garden?.....

Do you want an Arbor or Pergola?.....

Do you want us to locate trees?.....

Do you want fruit trees?.....

Do you want any street or avenue trees?.....

Do you want any evergreen trees?.....

Do you want any particular kind of trees?.....

Do you want a vegetable garden? (If so, where do you prefer it)?.....

Do you want a windbreak?.....

What is the limit you wish to expend for ornamentals?

This last question is a very important one, owing to many having quite large lawns, yet they do not desire to expend any great amount for ornamental planting. If we know about the amount you wish to expend for flowers, etc., we will arrange the plantings accordingly.

REMARKS

Woods Bros. Landscape Service

We will make your garden bloom from springtime until frost. Let us advise you as to how you can secure the utmost beauty and delight from your garden. We offer the advice and service of our landscape architects and gardeners to assist you in making your surroundings more beautiful.

A plan for laying out grounds properly is as necessary as a plan for building a house. A mistake made in the beginning often costs many times the small expense of a plan or having a landscape architect view the grounds, to say nothing about the annoyance and delay in securing the desired effect. We are prepared to submit ideas for gardens in any climate and any soil.

On the following terms we will make a sketch showing how to lay out and plant your grounds in an artistic and attractive way. Send us a rough sketch of your grounds, showing location of buildings, walks, drives, if any, trees and shrubbery or any other permanent things already established and that are not to be removed. Also location of all the entrances to lot and buildings, any objectionable or desirable views from the residence, and grades of any importance. Photographs will also be of assistance if convenient to send. The sketch need not be drawn to scale, but should give the width and depth of the lot, and other principal dimensions.

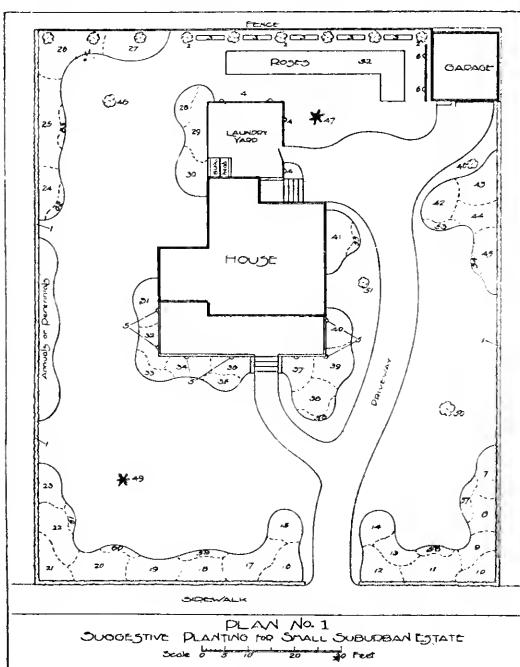

When the sketch is sent us remit one dollar (\$1.00), for which we will at once send a coupon for the amount, and this coupon will be accepted by us as part payment on an order amounting to \$5.00 or more. We wish to impress upon the minds of our customers that this is not a scheme of any kind by which we are receiving pay for the sketch, but it is only as a safeguard against some curious persons that would impose upon us and ask for plans with little or no intention of making use of them. These plans we furnish are not stock plans; but **you will receive a plan made specially for your own grounds.** The planting arrangement is worked out by our Landscape Architects to meet the requirements of your place.

We make plans for the surrounding of the humblest little cottage as well as the extensive and elaborate estate, public parks, factory grounds, schools, universities, sanitaria, etc. We furnish plans by mail, or, when desired, we send a landscape gardener to do the work or instruct you how to do it. Our terms for this class of work are always very reasonable.

The above arrangement applies principally to home grounds of moderate size and not to extensive or elaborate grounds where a large amount of work is involved. We are prepared, also, to do this class of work and solicit correspondence from parties desiring such work.

We Design and Plant Large Public and Private Grounds of all Kinds

Planting and furnishing stock for parks, factory grounds, schools, universities, sanitaria and hotel grounds is one of our specialties and we are prepared to plan and advise how and what to plant to produce the best results with the least amount of labor and expenditure.

Polish Privet

POLISH. This Privet was brought from Poland over twenty years ago, and although it is the most wonderful of the Privet family, it has been little known until the last two or three years. It has been on the campus grounds at the State Agricultural School here at Lincoln for nearly twenty years, and has never been known to freeze. When grown untrimmed, it is upright in habit, usually growing 8 to 12 feet high. The leaves are bluish green and lustrous, half evergreen. The flowers, panicles which resemble Lilacs, are white and from 3 to 5 inches long. The foliage holds its characteristic color throughout the season and does not change in the least at the approach of cold weather. We have seen this privet as green at Christmas time as in August. When trimmed it will grow as dense as a boxwood. In the fall and winter it is covered with black berries. The growth is very rapid. This privet is by far the best and most satisfactory for this section of the country.
